The publisher gives permission to any student who has purchased a Maths Mate Student Pad to print the digital Skill Builder for use in class or at home.

Released: 4th Edition - 2013

#### Maths Mate materials available for use

STUDENT PADS - Hard copy/Digital (with bonus Skill Builder)

Maths Mate 3 Student Pad - 1st Ed.

Maths Mate 4 Student Pad - 1st Ed.

Maths Mate 5 Student Pad - 4th Ed.

Maths Mate 6 Student Pad - 4th Ed.

Maths Mate 7 Student Pad - 5th Ed.

Maths Mate 8 Student Pad - 5th Ed.

Maths Mate 9 Student Pad - 5th Ed.

Maths Mate 9 Gold Student Pad - 2nd Ed.

Maths Mate 10 Student Pad - 5th Ed.

Maths Mate 10 Gold Student Pad - 2nd Ed.

#### SKILL BUILDERS - Digital

Maths Mate 3/4 Skill Builder - 1st Ed.

Maths Mate 5/6 Skill Builder - 4th Ed.

Maths Mate 7/8 Skill Builder - 5th Ed.

Maths Mate 9/10 Skill Builder - 5th Ed.

#### **TEACHER RESOURCES**

Maths Mate Teacher Resource CD - Version 4.0 (covers all Teacher Resource Books)

Maths Mate 3 Teacher Resource Book - 1st Ed.

Maths Mate 4 Teacher Resource Book - 1st Ed.

Maths Mate 5 Teacher Resource Book - 4th Ed.

Maths Mate 6 Teacher Resource Book - 4th Ed.

Maths Mate 7 Teacher Resource Book - 5th Ed.

Maths Mate 8 Teacher Resource Book - 5th Ed.

Maths Mate 9 Teacher Resource Book - 5th Ed.

Maths Mate 9 Gold Teacher Resource Book - 2nd Ed.

Maths Mate 10 Teacher Resource Book - 5th Ed.

Maths Mate 10 Gold Teacher Resource Book - 2nd Ed.

#### TEACHER'S GUIDE

#### **FORWARD**

#### Why use Skill Builders?

Too often, through the teaching, learning and assessment process, teachers identify weaknesses and gaps in student learning but the constraints of the classroom severely limit remediation opportunities.

The Maths Mate Skill Builder series was prepared in response to requests from teachers and parents who want an easy but effective way to help students who identify skill deficiencies using the Maths Mate Program, and are motivated to do something about them.

The Maths Mate record keeping sheets found at the start of each term in each Student Pad (and on each CD ~ Record Keeping Sheets, pages 1 to 4) enable students to find out what they know and what they still need to learn and practise.

The Skill Builders extensively target through instruction and practice, all skills within the related Maths Mate Program except the problem solving questions. The Problem Solving Hints & Solutions (see CD ~ Problem Solving Hints & Solutions) can be used by teachers to develop students' problem solving skills. The Skill Builders also contain a Glossary of important facts and reference material that will provide instant help when students present with difficulties.

#### **Background to the design of Maths Mate and Skill Builders**

Any question on the Maths Mate sheets is part of a set of 4 similar questions in the term. For example, consider sheets 1, 2, 3 and 4 in year 6 term 1. Question 10 on each sheet is similar in design, content and degree of difficulty. This grouping of question style is also true of the next set of four sheets and so on. Thus the Maths Mate tests made available in the Teacher Resource Book and CD (see CD  $\sim$  Test Masters, pages 1 to 32 and Test Answers, pages 1 to 32) also reflect this grouping of question style and substance. Generally too, the Skill Builders can be linked to each set of 4 similar questions. These links are identified in the grid at the title of each skill. The grid shown here for example, would relate a skill to questions in the first 4 sheets of MM5 term 1, the last 4 sheets of MM5 term 2 and the first 4 sheets of MM6 term 1. Once understood, these links will be helpful to students in their selection of Skill Builders and to you in your allocation of Skill Builders to students.

On each Maths Mate worksheet, questions 1 through to 21 get progressively harder. (Refer - How to use the Skill Builders, page iv)

#### Suggestions for the preparation and organisation of Skill Builders

Teachers can either direct students to their digital copies or print copies of particular pages for students. Rather than photocopying Skill Builders one at a time, you may find it helpful to set up a file in a central area that contains perhaps five copies of each Skill Builder. In this way you will save time and be prepared in advance. Students should be reminded that the Glossary is a valuable resource that can be added to. The Glossary too can be photocopied for students as a resource.

#### How you can help

We are confident that your students will be rewarded for the effort you have made in making these worksheets available to them. As with any program, however, there is always room for improvement and we place great value in feedback from people like yourself. Please, if you have any suggestions at all, contact us.

#### **HOW TO USE MATHS MATE SKILL BUILDERS**

#### 1. Determine which Maths Mate questions pose a difficulty

If a student gets one or more incorrect answers, represented by one or more successive unshaded boxes on their worksheet results sheet, then MATHS MATE that question requires a Skill Builder. For example, question 13 in Sheets 1, 2, 3 and 4 is not shaded, so Worksheet Results Skill 13.1 from Skill Builder 13 needs to be handed to the student. Term 1 [+ Whole Numbers to 10]
 [- Whole Numbers to 10] 3. [x Whole Numbers to 10] 4. [+ Whole Numbers to 10] 5. [Large Number +] 6. [Large Number -] 7. [Powers of 10 x +] [Desimals]
 10. [Fractions] 11. [Decimals / Fra 12. [Place Value]

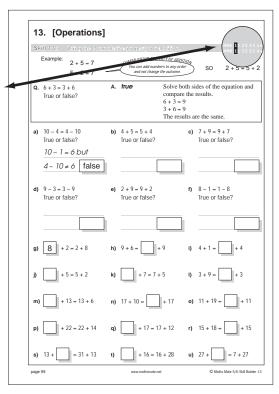

#### 2. Find the relevant Skill Builder on the Maths Mate worksheet results sheet

Check across the question that is posing difficulties on the worksheet results sheet to find the list of skills within the Skill Builder that are most relevant to that question.

Obtain a copy of one or all of the skills listed for that question (pages 1 to 205). You can also double check with the grid at the right of each skill title, that the chosen skill is appropriate.

Remember, students should work through the skills in order. The skills where possible are arranged in increasing degree of difficulty.

Be aware that some skills may require the knowledge of previous skills, so when a student has several areas of weakness, they should work on the lowest numbered skill builders first. For example, a student struggling with Q9 and Q12 may need to build skills required for Q9 before they can improve Q12.

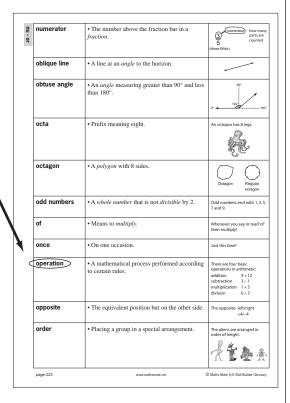

page iv www.mathsmate.net © Maths Mate 5/6 Skill Builder

#### 3. Look up any unknown terms in the Skill Builder glossary

The glossary (pages 207 to 240) is more than just a list of definitions. It contains a wealth of relevant information that may help the students to better understand the question at hand. Weaker students may find that referring to a copy of the glossary, and even building on it, is a helpful strategy for improving their overall mathematical competency.

For example, a student might need to look up the word "operation" before attempting to complete Skill 13.1

#### 4. Complete the relevant Skill Builder

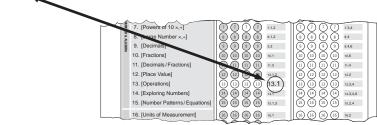

Work through the examples given for that skill, and complete the exercises.

There are many techniques or methods that can be used to teach the same basic skills, even something as simple as adding 7 and 9. It is good for a student to be given a range of alternatives appropriate for each skill but space restrictions make this impossible. These sheets often suggest an approach that may be different to a student's past experience. If a student feels more comfortable with his current technique, that is fine. In most cases it is the end result that counts.

It is possible to take a very weak student back to a Skill Builder from a lower level if this is necessary. It is also possible to use a higher level book for students to have further practice if required.

#### 5. Correct the relevant Skill Builders from the Skill Builder answer sheets (from page 249)

# 6. Circle the completed skill numbers on the Maths Mate worksheet results sheet

#### 7. Go back and repeat previous Maths Mate questions

After completing a Skill Builder, students should be encouraged to go back and attempt again those particular questions on the recently completed Maths Mate worksheets.

**Dear Parents** 

As part of their Mathematics program this year, all students have been given a weekly Maths Mate worksheet.

The program is now under way. The diagnostic nature of the worksheets helps students monitor their own progress. After they correct their worksheet and complete the record keeping sheet, over time, your child will be able to identify areas of strength and weakness in their mathematical learning.

If your child is having difficulty with a question for consecutive weeks or believes that their understanding is not at the level they would like, then Skill Builder sheets will be made available to develop each of the skills in the Maths Mate program. Each Skill Builder focuses on and explores one question from the Maths Mate worksheets.

As each question in the Maths Mate is generally more difficult than the last, finishing with the problem solving questions, then it would be advised that, if students are concerned with more than one question, they tackle lower numbered questions first.

The Skill Builders may also help to motivate students to make another attempt at mastering skills that they have found too difficult in the past, given that it will become clear to them that they will be confronted by the same type of question on a regular basis.

While we will be monitoring your child's progress and supporting their skill development in the school environment, it would be appreciated if you would complete the tear off slip at the bottom of this page so that we can be sure that you are aware of our expectations regarding both the Maths Mate worksheets and the availability of Skill Builder worksheets. We ask also that you continue to sign the completed worksheets each week so that we can ensure each student is working independently and regularly but with your support.

We thank you in anticipation of your involvement and remind you that you are encouraged to call and discuss your child's progress at any time.

,		
Yours sincerely		
Class Teacher		
Principal

Recognising the relative likelihood of an event. Finding the number of objects to achieve a given outcome. Describing the likelihood of an outcome. Calculating the probability of a simple event. Interpreting pie charts.	.191

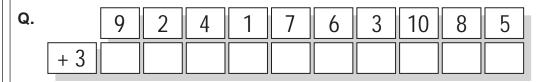

page x www.mathsmate.net © Maths Mate 5/6 Skill Builder

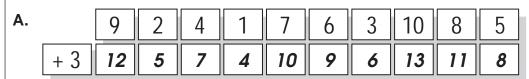

# 1. [+ Whole Numbers to 10]

#### Skill 1.1 Adding whole numbers from 1 to 10 by counting on.

- Start with the largest number.
- Count on the smaller number.

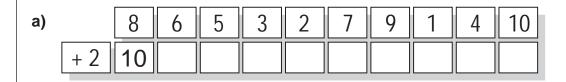

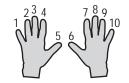

OR

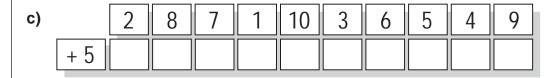

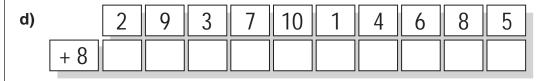

9 + 3 = ? Start with the largest number 9. Count on 3 more.

#### Skill 1.2 Adding whole numbers from 1 to 10 using a number line.

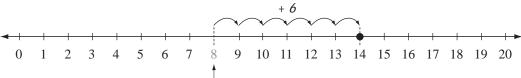

Q.

A.

8 + 6 = ?

Start at 8. Go forward 6 places. You are at 14.

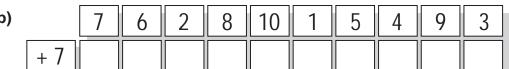

8 + 6 = 14

a)

b)

c)

d)

10 11 12 13 14 15 16 17 18 19 20

#### Skill 1.3 Adding 7, 8 or 9 by making 10.

• Find the largest number.

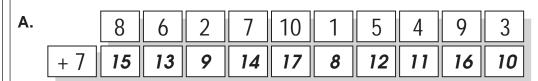

=(8+2)+5

= 10 + 5

= 15

- Work out what number you need to add to the largest number, to make 10.
- Break down the smaller number to include the number you need.
- Regroup the numbers to create a sum of 10. (10's are easy!)

Q.		8	6	2	7	10	1	5	4	9	3
	+ 7										

$$8 + 7 = ?$$
 8 is the largest number.

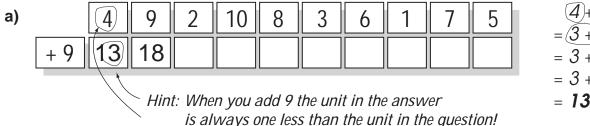

Ask: 'What number added to 8, will make 10?'

$$8 + 7$$
 Answer:  $8 + ? = 10$   
=  $8 + 2 + 5$  You need a 2

Break down the smaller number 7, into 2 and 5.

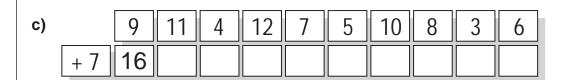

$$2 + 5 = 7$$

Regroup the 2 with the 8 to make 10.

 $\begin{array}{c} (4) + 9 \\ = 3 + 1 + 9 \\ = 3 + (1 + 9) \\ = 3 + 10 \\ = 13 \end{array}$ 

b)		7	6	2	8	10	1	5	4	9	3
	+ 8	15	14								

#### Skill 1.4 Adding whole numbers from 1 to 10 using an addition table.

Q.

	5	7	9	1	8	6	3	10	2	4
+ 8										

A.

	5	7	9	1	8	6	3	10	2	4
+ 8	13	15	17	9	16	14	11	18	10	12

	_	_	_	_		_		_	_	
+	1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10	11
2	3	4	5	6	7	8	9	10	11	12
3	4	5	6	7	8	9	10	11	12	13
4	5	6	7	8	9	10	11	12	13	14
5	6	7	8	9	10	11	12	13	14	15
6	7	8	9	10	11	12	13	14	15	16
7	8	9	10	11	12	13	14	15	16	17
8	9	10	11	12	13	14	15	16	17	18
9	10	11	12	13	14	15	16	17	18	19
10	11	12	13	14	15	16	17	18	19	20

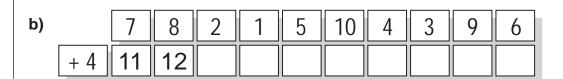

$$5 + 8 = ?$$

Move down the column from 5. Move across the row from 8. The number crossed is the result.

$$5 + 8 = 13$$

$$8 + 5 = 13$$

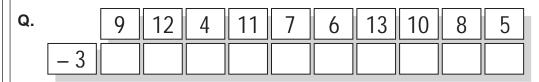

# 2. [- Whole Numbers to 10]

#### Skill 2.1 Subtracting whole numbers from 1 to 10 by counting back.

- Start with the first number given.
- Count backwards the second number.

9 counting back...

OR

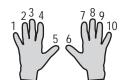

$$9 - 3 = ?$$

Start with the first number given, 9.

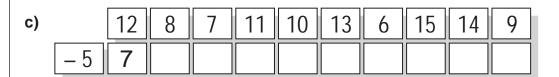

Count backwards 3.

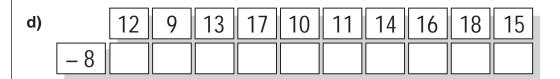

$$9 - 3 = 6$$

b)		13	7	11	10	6	8	14	15	9	12
	<b>–</b> 6	7									

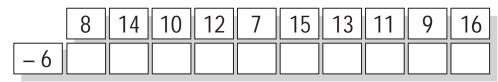

#### Skill 2.2 Subtracting whole numbers from 1 to 10 using a number line.

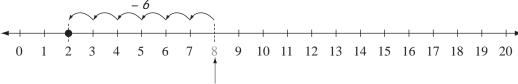

Q.

A.

8 - 6 = ?

Start at 8. Go backward 6 places. You are at 2.

8 - 6 = 2

a)

b)

c)

9 10 11 12 13 14 15 16 17 18 19 20

d)

1 5 6 10 11 12 13 14 15 16 17 18 19 20

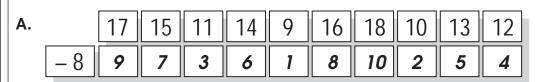

#### Subtracting whole numbers from 1 to 10 from two-digit numbers with smaller unit values (e.g. 13 - 8 = 5).

- Look at the unit value of the two-digit number.
- Break down the single digit number to include this number and the remainder.
- Subtract the number from the two-digit number, 10 will be the result.
- Then subtract the remainder from 10.

Skill 2.3

Q.	17	15	11	14	9	16	18	10	13	12
-8										

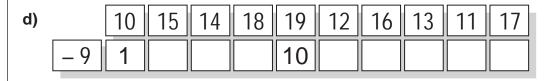

$$= 17 - 7 - 1$$
 Subtract 7 from 17 to get 10.  
 $= 10 - 1$  Subtract 1 from 10.

b)		17	16	12	8	10	11	15	14	9	13
	7	10			1	3				2	

c)		9	11	14	12	17	15	10	18	13	16
	-8	1						2	10		

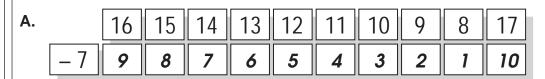

#### Skill 2.4 Subtracting 7, 8 or 9 by building up.

- Build up 7, 8 or 9 to 10 by adding the amount needed.
- Build up the number being subtracted from, by adding the same amount.
- Then complete the subtraction from 10.

Q.		16	15	14	13	12	11	10	9	8	17
	<b>-</b> 7										

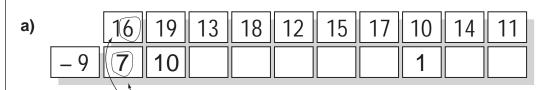

To subtract 7 from 16: Build up 7 to 10 by adding 3.

Also build up 16 by adding 3.

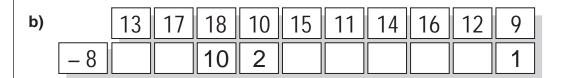

16 becomes 19.

Then subtract 10 from 19.

 $= {16 - 9 \choose 17 - 10}^{+1}$ = **7** 

Hint: When you subtract 9 the unit in the answer is always one more than the unit in the question!

14

#### Skill 2.5 Subtracting whole numbers from 1 to 10 using an addition table.

15 1 1 2 2 3 3 4 4 16 1 1 2 2 3 3 4 4

Q. 15 17 9 11 18 16 13 10 12

A.		15	17	9	11	18	16	13	10	12	14	
	-8	7	9	7	3	10	8	5	2	4	6	

+	1	2	3	4	5	6	7	8	9	10
1	2	3	4	5	6	7	8	9	10	11
2	3	4	5	6	7	8	9	10	11	12
3	4	5	6	7	8	9	10	11	12	13
4	5	6	7	8	9	10	11	12	13	14
5	6	7	8	9	10	11	12	13	14	15
6	7	8	9	10	11	12	13	14	15	16
7	8	9	10	11	12	13	14	15	16	17
8	9	10	11	12	13	14	15	16	17	18
9	10	11	12	13	14	15	16	17	18	19
10	11	12	13	14	15	16	17	18	19	20

15 - 8 = ?

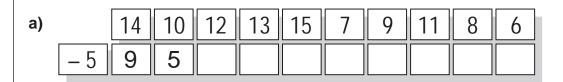

Reword the subtraction by turning it into an addition.

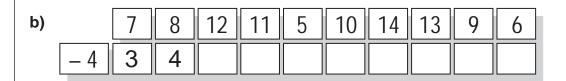

Ask: 'What number, when added to 8, will give 15?'

$$8 + ? = 15$$

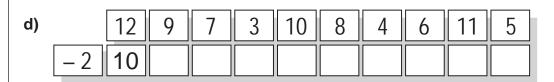

Answer: Using the addition table:

$$8 + 7 = 15$$
  
So  $15 - 8 = 7$ 

page 10 www.mathsmate.net © Maths Mate 5/6 Skill Builder 2

# 3. [× Whole Numbers to 10]

#### Skill 3.1 Multiplying whole numbers from 1 to 10 by 1 or 10.

Multiplication forms patterns.

Multiplication is the same as repeated additions.

Any number, multiplied by 1, equals the sum of 1 of the numbers.

Example:  $6 \times 1 = 6$ 

Hint: The number stays the same.

Any number, multiplied by 10, equals the sum of 10 of the numbers.

Example:

Hint: Add a zero to the number.

×	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

Multiplication is 'counting by' a number of times.

You can multiply by 1 by counting by that number, 1 time.

Example: 6

1 time

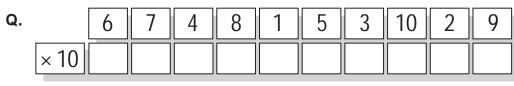

You can multiply by 10 by counting by that number, 10 times.

Example: 6, 12, 18, 24, 30, 36, 42, 48, 54, 60

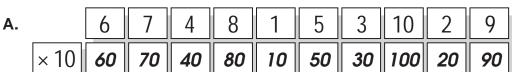

10 times

Multiplication is reversable.

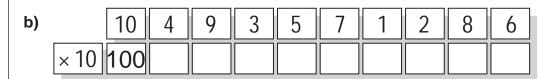

Example:  $10 \times 6 = 6 \times 10$ 

When you multiply a number by 10, add a zero to the end of the number.

#### Skill 3.2 Multiplying whole numbers from 1 to 10 by 5.

Multiplication forms patterns.

Multiplication is the same as repeated additions.

Any number, multiplied by 5, equals the sum of 5 of the numbers.

Example:  $9 \times 5 = 9 + 9 + 9 + 9 + 9 = 45$ 

Multiplication is 'counting by' a number of times.

You can multiply by 5 by counting by that number, 5 times.

Example: 9, 18, 27, 36, 45

5 times

Multiplication is reversable.

Example:  $9 \times 5 = 5 \times 9$ 

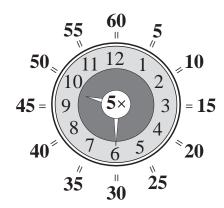

×	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

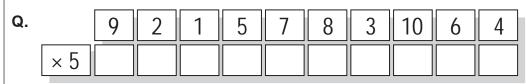

Hint: Multiplying by 5 produces a value that is half that of a multiplication by 10.

 $9 \times 10 = 90$  $9 \times 5 = 45$ 

Hint: Multiplying by 5 produces a value that always ends in 0 or 5.

Hint: Multiplying by 5 produces the same values as the minutes on a clock face.

#### Skill 3.3 Multiplying whole numbers from 1 to 10 by 2 or 4.

Multiplication forms patterns.

Multiplication is the same as repeated additions.

Any number, multiplied by 2, equals the sum of 2 of the numbers.

Example:  $7 \times 2 = 7 + 7 = 14$ 

Any number, multiplied by 4, equals the sum of 4 of the numbers Example:  $7 \times 4 = 7 + 7 + 7 + 7 = 28$ 

Multiplication is 'counting by' a number of times.

You can multiply by 4 by counting by that number, 4 times.

Example: 7, 14, 21, 28

4 times

×	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

Multiplication is reversable. Example:  $7 \times 2 = 2 \times 7$ 

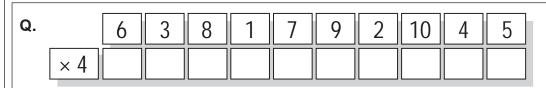

Hint: Multiplying by 2 always produces an even number.

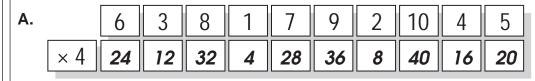

Hint: Multiplying by 2 is the same as doubling.

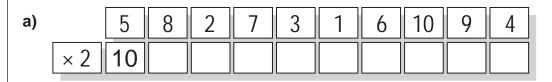

Double 7 is 14 OR  $7 \times 2 = 14$ 

Hint: Multiplying by 4 is the same as doubling the number and then multiplying by 2.

 $7 \times 4 = 14 \times 2 = 28$ 

5 × 2	
= 5 + 5	Repeated
<b>= 10</b>	additions

 $3 \times 4$ =  $6 \times 2$  Double 3 = 12 and  $\times$  by 2

#### Skill 3.4 Multiplying whole numbers from 1 to 10 by 3.

11223344 11223344

Multiplication forms patterns.

Multiplication is the same as repeated additions.

Any number, multiplied by 3, equals the sum of 3 of the numbers. Example:  $8 \times 3 = 8 + 8 + 8 = 24$ 

Multiplication is 'counting by' a number of times.

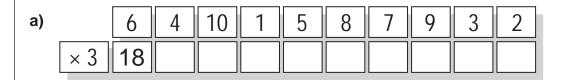

You can multiply by 3 by counting by that number, 3 times. Example: 8, 16, 24

Multiplication is reversable. Example:  $8 \times 3 = 3 \times 8$ 

×	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

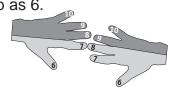

#### Skill 3.5 Multiplying whole numbers from 1 to 10 by 6, 7, 8 or 9.

• Number the fingers on each hand from 6 to 10 starting with the thumb as 6.

- Touch the appropriate fingers together to match the table you are working on. Example:  $7 \times 8$
- Count your thumbs, the touching fingers and any fingers in between (shaded lightly).
   This result makes up the tens.

(2 fingers on left hand, 3 fingers on right hand)  $\Rightarrow$  2 + 3 = 5 5 tens = 50

• Count separately, the fingers on each hand that are beyond the touching fingers (shaded dark).

Multiply the sums. This result makes up the units.

(3 fingers on left hand, 2 fingers on right hand)  $\Rightarrow$  3 × 2 = 6 6 units = 6

• Finally add the tens and units.

50 + 6 = 56

So  $7 \times 8 = 56$ 

Q.		6	2	5	1	8	7	4	10	3	9
	× 7										

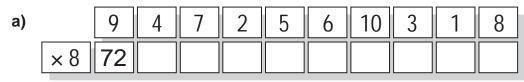

$$6 \times 7 = ?$$

$$1 + 2 = 3$$
 tens = 30 (light fingers)

$$4 \times 3 = 12 \text{ units} = 12 \text{ (dark fingers)}$$

$$30 + 12 = 42$$

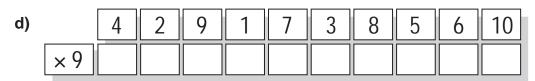

So 
$$6 \times 7 = 42$$

b)		3	6	2	8	10	1	5	4	9	7
	× 7	21									

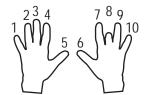

#### Skill 3.6 Multiplying whole numbers from 1 to 10 by 9.

• Number the fingers on each hand from 1 to 10.

• Bend the finger that matches the 9× table you are working on.

Example: For  $8 \times 9$ , bend the 8th finger.

• Count the fingers before the bent finger. This result makes up the tens.

7 fingers  $\Rightarrow$  7 tens = 70

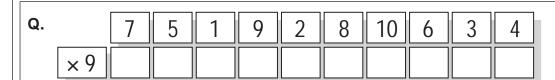

• Count the fingers after the bent finger. This result makes up the units.

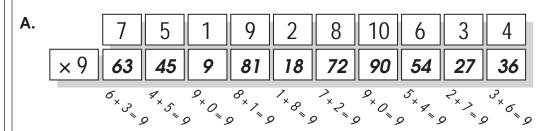

2 fingers  $\Rightarrow$  2 units = 2

Add the tens and units.

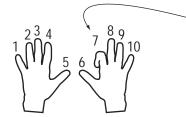

$$70 + 2 = 72$$

So 
$$8 \times 9 = 72$$

Hint: When multiplying by 9, the digits in the answer always add to 9.

To find  $7 \times 9 = ?$ , bend the 7th finger.

6 fingers before the bent finger  $\Rightarrow$  6 tens = 60

3 fingers after the bent finger  $\Rightarrow$  3 units = 3

$$60 + 3 = 63$$

So 
$$7 \times 9 = 63$$

# 4. [÷ Whole Numbers to 10]

# Skill 4.1 Dividing by whole numbers from 1 to 10 using a multiplication

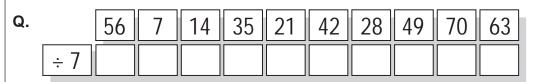

Division forms patterns.

Division and multiplication are inverse operations. (Division undoes multiplication)

Example: If 
$$7 \times 8 = 8 \times 7 = 56$$
  
then  $56 \div 8 = 7$   
or  $56 \div 7 = 8$ 

×	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

 $56 \div 7 = ?$  How many 7's go into 56?

Reword the division by turning it into a multiplication.

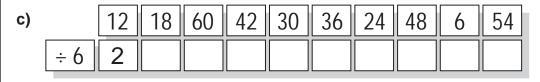

Ask: '7 multiplied by what number makes 56?'  $(7 \times ? = 56)$ 

Answer: Using the multiplication table

$$7 \times 8 = 56$$
  
So  $56 \div 7 = 8$ 

#### Skill 4.2 Dividing by whole numbers from 1 to 10 using subtraction.

Division is the same as repeated subtractions.

Example:  $56 \div 7 = ?$  How many 7's go into 56?

OR If you have 56, how many times can you take away 7?

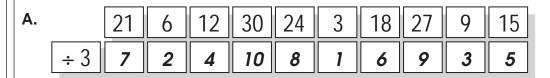

$$56 - \underbrace{7 - 7 - 7 - 7 - 7 - 7 - 7}_{} = 0$$

8 times

If you have 56 you can take 7 away, 8 times.

So  $56 \div 7 = 8$ 

Q.		21	6	12	30	24	3	18	27	9	15
	÷ 3										

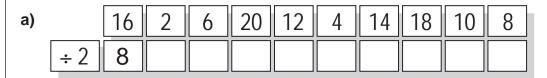

How many 3's go into 21?

Reword the division by turning it into a subtraction.

Ask: 'If you have 21, how many times can you take away 3?'

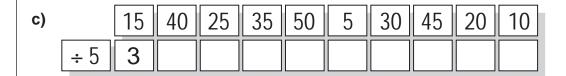

$$21 - 3 - 3 - 3 - 3 - 3 - 3 - 3 = 0$$

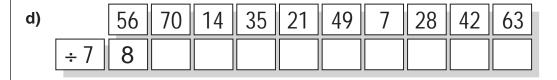

Answer: If you have 21 you can take 3 away, 7 times. So  $21 \div 3 = 7$ 

$$16 \div 2$$
  
 $\Rightarrow 16 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 = 0$  Take 2 away 8 times.  
So  $16 \div 2 = 8$ 

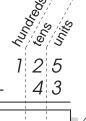

# 5. [Large Number +]

#### **Skill 5.1** Adding large numbers without carry over using columns.

- Always keep your working columns in line, aligning units with units, tens with tens, etc.
- Add from right to left.

A.

**Units:** 

$$5 + 3 = 8$$

⇒ 8 units

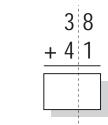

$$2 + 4 = 6$$

 $\Rightarrow$  6 tens

**Hundreds:** 

$$1 + 0 = 1$$

 $\Rightarrow$  1 hundred

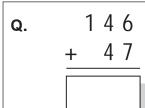

p)	6 1 +	0	0 4 3 2	0 5	

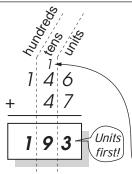

#### Skill 5.2 Adding large numbers with carry over using columns.

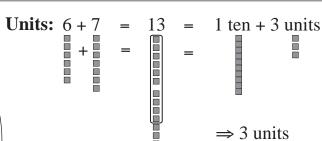

- Always keep your working columns in line, aligning units with units, tens with tens, etc.
- Add from right to left.

A.

Carry over the 1 ten to the tens column.

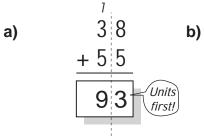

#### Tens:

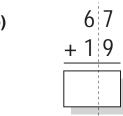

4 + 4 + 1 (carry over) = 9  $\Rightarrow$  9 tens

#### **Hundreds:**

$$1 + 0 = 1$$

 $\Rightarrow$  1 hundred

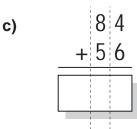

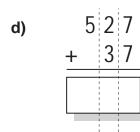

f)

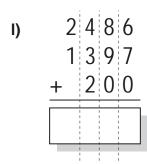

j)

n)

h)	+	0 5	i	i	

0)	+	7	3	 1 6

p)	2 8 3	1	2	_

# **Skill 5.**3 Adding large numbers by adding each place value, then adding the totals.

• Add the digits in each place value.

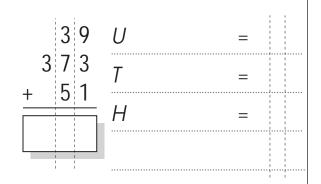

A.

• Then add the totals.

Add the units (U): 5 + 6 = 111Add the tens (T): 80 + 40 = 120Add the hundreds (H): 600 + 200 = 800 931

b)  $\frac{2 \ 6}{+ \ 4 \ 4} \frac{U \ 6 + 4 = 1 \ O}{T \ 2O + 4O =}$ 

3 1 8 U = + 2 4 6 T = H =

1 3 2	<i>U</i> =

# 6. [Large Number –]

#### **Skill 6.1** Subtracting large numbers without carry over using columns.

- Always keep your working columns in line, aligning units with units, tens with tens, etc.
- Subtract from right to left.

$$7 - 3 = 4$$

$$3 = 4$$
  $\Rightarrow 4$  units

$$4 - 4 = 0$$

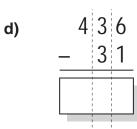

$$\Rightarrow 0$$
 tens

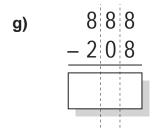

$$1 - 0 = 1$$

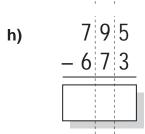

$$\Rightarrow$$
 1 hundred

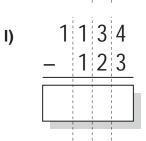

f)

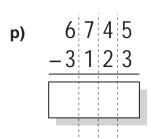

j)

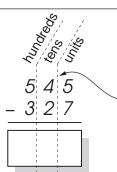

#### Skill 6.2 Subtracting large numbers with carry over using columns.

- Always keep your working columns in line, aligning units with units, tens with tens, etc.
- Subtract from right to left.

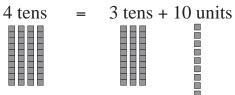

5 4 5 Q. -327

A.

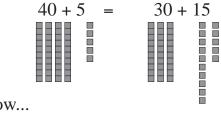

**Units:** 

5 - 7 = ? units. The result is < 0. To make the answer positive break down the 4 tens.

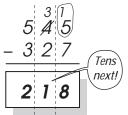

5 A 5 - 3 2 7 Units first! Re-group the 10 units with the 5 units to make 15 units.

Now...

$$15 - 7 = 8$$

 $\Rightarrow$  8 units

Tens:

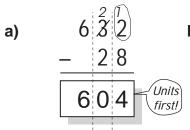

$$3 - 2 = 1$$

 $\Rightarrow$  1 ten

**Hundreds:** 

$$5 - 3 = 2$$

 $\Rightarrow$  2 hundreds

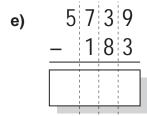

4 4 4 b)

c)

2 4 1 4 f)

g)

h)

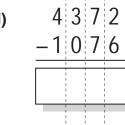

4 5 9 1 i) 2 4 3 5

j)

k)

I)

#### **Skill 6.3** Subtracting from a multiple of 10 (e.g. 20, 700, etc).

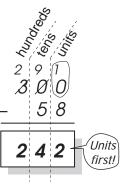

- Always keep your working columns in line, aligning units with units, tens with tens, etc.
- Subtract from right to left.

# Q.

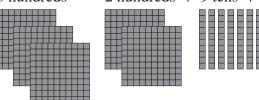

A.

#### **Units:**

0 - 8 = ? units. The result is < 0. To make the answer positive break down the 3 hundreds (no tens available).

3 hundreds = 2 hundreds + 9 tens + 10 units

Now...

$$10 - 8 = 2$$

 $\Rightarrow$  2 units

Tens:

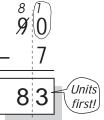

$$9 - 5 = 4$$

 $\Rightarrow$  4 tens

**Hundreds:** 

$$2 - 0 = 2$$

 $\Rightarrow$  2 hundreds

# 7. [Powers of $10 \times , \div$ ]

# Skill 7.1 Multiplying a whole number by a power of 10 using zeros as place holders.

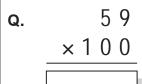

• When multiplying by 10 move each digit one place to the left.

Hint: Multiplying by a power of 10 does not change the digits in the number. Example:  $25 \times 10 = 250$  the 2 and the 5 remain in the answer.

- When multiplying by 100 move each digit two places to the left.
- When multiplying by 1000 move each digit three places to the left.
- Add zeros as place holders in the vacated places.

 $59 \times 100$  means 59 groups of 100.

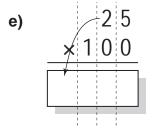

Shift 5 and 9 two places to the left.

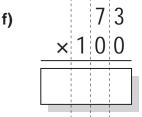

**5 9 0 0** Units Use 0's as place holders in the vacated units and tens places.

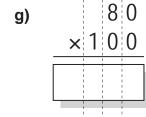

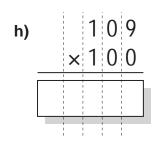

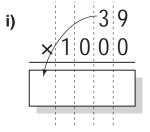

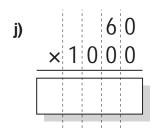

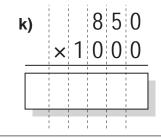

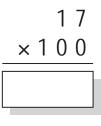

I)	×	1	2	4 0	i	_

#### Skill 7.2 Multiplying a whole number by a power of 10 using columns.

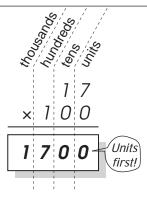

When multiplying a number by a power of 10, simply add the same number of zeros at the end of the number.

Q.

Α.

**Units:** 

$$0 \times 17 = 0$$

 $\Rightarrow$  0 units

Tens:

$$0 \times 17 = 0$$

 $\Rightarrow$  0 tens

**Hundreds:** 

$$1 \times 17 = 17$$

17 hundreds = 1 thousand + 7 hundreds $\Rightarrow$  7 hundreds

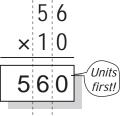

Carry over the 1 thousand to the thousands column.

Hint: One thousand, seven hundred can also be called seventeen hundred.

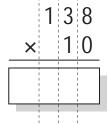

**Thousands:** 

 $\Rightarrow$  1 thousand

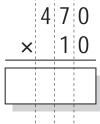

a)

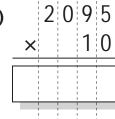

b)

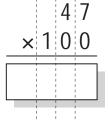

c)

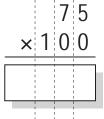

d)

k)

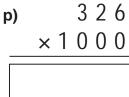

I)

m)

n)

#### Skill 7.3 Dividing a whole number by a power of 10 using fractions.

• Convert the division to a fraction and......

#### **EITHER**

 Divide both the numerator and the denominator by the value of the denominator.

$$40 \div 10 = \frac{40}{10} = \frac{40}{10} \div \frac{10}{10} = \frac{4}{1} = 4$$

$$600 \div 100 = \frac{600}{100} = \frac{600}{100} \div \frac{100}{100} = \frac{6}{1} = 6$$

#### OR

 Cancel the zeros in the numerator against the zeros in the denominator.

$$\frac{40}{10} = \frac{40}{10} = \frac{4}{1} = 4$$

$$\frac{600}{100} = \frac{600}{100} = \frac{6}{1} = 6$$

**Q.** 
$$5400 \div 100 =$$

**A.** 
$$5400 \div 100 =$$

$$= \frac{5400}{100} {}^{\div 100}$$

$$= \frac{54}{1}$$

$$= 54$$

How many groups of 100 make up 5400?

Convert the division to a fraction.

Divide the numerator and the denominator by 100.

54 groups of 100 make up 5400.

Hint: Five thousand, four hundred can also be called fifty-four hundred.

a) 
$$800 \div 100 =$$

**b)** 
$$70 \div 10 =$$

c) 
$$850 \div 10 =$$

d) 
$$900 \div 100 =$$

e) 
$$500 \div 100 =$$

f) 
$$2400 \div 100 =$$

8

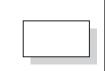

h) 
$$9800 \div 10 =$$

i) 
$$15000 \div 1000 =$$

.....

#### Skill 7.4 Dividing a whole number by a power of 10 by removing zeros or mind 12 3 2 changing place values.

#### **EITHER**

Remove the same number of zeros as in the divisor from the end of the whole number.

(1 for 10.

2 for 100,

3 for 1000, etc.)

Example:

$$98000 \div 10 = 9800$$

 $98000 \div 100 = 980$ 

 $98000 \div 1000 = 98$ 

#### OR

Move the decimal point the same number of places to the left as there are zeros in the divisor.

Hint: There is a decimal point and zeros which are not written, at the end of any whole number.

 $98000.0 \Rightarrow 9800$ 

1 zero ⇒ 1 place left. 2 zeros ⇒ 2 places left.  $2 \text{ zeros} \Rightarrow 2 \text{ places left.}$ 

 $98000.0 \Rightarrow 980$ 

 $3 \text{ zeros} \Rightarrow 3 \text{ places left.}$ 

 $98000.0 \Rightarrow 98$ 

**Q.**  $44\,000 \div 1000 =$  **A.**  $44\,000 \div 1000 =$ 

**A.** 
$$44\,000 \div 1000 =$$
  $= 44\,000 \div 1000$ 

**= 44** 

1000 has 3 zeros.

To divide by 1000 remove

3 zeros from both numbers.

 $600 \div 10 =$ 

$$=600.0 \div 10$$

b)  $90 \div 10 =$ 

c)  $330 \div 10 =$ 

60

 $1600 \div 10 =$  e)  $5500 \div 10 =$  f)  $400 \div 100 =$ 

q)

d)

$$800 \div 100 =$$

h)  $9500 \div 100 =$  i)  $7100 \div 100 =$ 

k)  $9000 \div 1000 =$  1)  $74\,000 \div 1000 =$ 

# 8. [Large Number $\times$ , $\div$ ]

**Skill 8.1** Multiplying a large number by a single digit without carry over, using columns.

- Multiply the units, tens, hundreds and thousands by the single digit.
- Multiply from right to left.

Q.

Α.

**Units:** 

$$3 \times 2 = 6$$

 $\Rightarrow$  6 units

$$3 \times 1 = 3$$

 $\Rightarrow$  3 tens

**Hundreds:** 

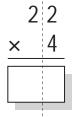

$$3 \times 3 = 9$$

 $\Rightarrow$  9 hundreds

#### Skill 8.2 Multiplying a large number by a single digit with carry over, using columns.

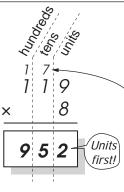

- Multiply the units, tens, hundreds and thousands by the single digit.
- Multiply from right to left.
- If there is a 'carry over': First multiply.

Then add on the carry over.

Q.

Α.

**Units:** 

$$8 \times 9 = 72$$

72 units = 7 tens and 2 units  $\Rightarrow$  2 units Carry over the 7 tens to the tens column.

#### Tens:

$$8 \times 1 = 8$$

8 + 7 (carry over) = 15

15 tens = 1 hundred and 5 tens  $\Rightarrow$  5 tens Carry over the 1 hundred to the hundreds column.

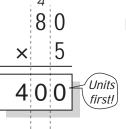

#### **Hundreds:**

$$8 \times 1 = 8$$

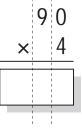

8 + 1 (carry over) = 9

 $\Rightarrow$  9 hundreds

#### Skill 8.3 Multiplying a large number by a two-digit number, using columns.

- Multiply by the unit digit first, working from right to left. Reminder: Put a zero in the units place before you start multiplying by the tens.
- Then multiply by the ten digit, working from right to left.
- Add the results last.

A.

 $\times 114$ 3 4 0

2

 $\times 1.14$ 

3 4 0

8 5 0

190

8 5

First multiply 85 by the 4 units.

#### **Units:**

$$4 \times 5 = 20$$

20 units = 2 tens and 0 units $\Rightarrow$  0 units Carry over the 2 tens to the tens column.

#### Tens:

$$4 \times 8 = 32$$

$$32 + 2$$
 (carry over) = 34

34 tens = 3 hundreds and 4 tens  $\Rightarrow$  4 tens

#### **Hundreds:**

 $\Rightarrow$  3 hundreds

Then multiply 85 by the 1 ten.

#### **Units:**

Write 0 as a place holder for the ten.

 $\Rightarrow$  0 units

#### Tens:

last!

$$1 \times 5 = 5$$

 $\Rightarrow$  5 tens

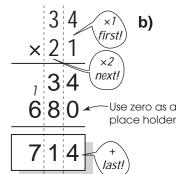

#### **Hundreds:**

$$1 \times 8 = 8$$

 $\Rightarrow$  8 hundreds

Add these results: 340 + 850 = 1190

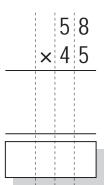

×2 first!

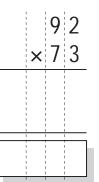

c) next!

d)

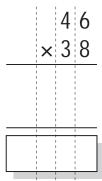

e)

f)

g)

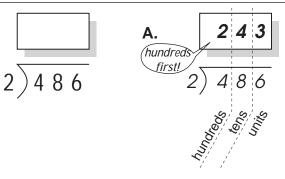

h)

#### Skill 8.4 Dividing a large number by a single digit, without carry over.

Divide from left to right across the digits, one at a time.

Q.

**Hundreds:** 

$$4 \div 2 = 2$$

 $\Rightarrow$  2 hundreds

Tens:

$$8 \div 2 = 4$$

 $\Rightarrow$  4 tens

**Units:** 

$$6 \div 2 = 3$$

 $\Rightarrow$  3 units

Read as: 486 divided by 2 equals?

OR

How many 2's go into 486?

OR

486 divides by 2 how many times?

Consider:

$$486 \div 2 = 243$$

 $2 \times 243 = 486$ 

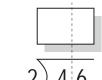

a)

# **Skill 8.5** Dividing a large number by a single digit, with carry over - no remainder.

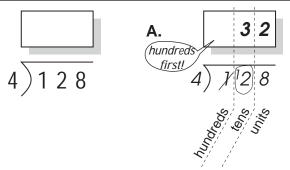

- Divide from left to right across the digits one at a time.
- If any result is less than 1: Break down the number being divided into.

'Carry over' this amount to the next column.

Add on the carry.

Then try dividing again.

Q.

#### **Hundreds:**

$$1 \div 4 = ?$$

The result is < 1.

Break down the 1 hundred into 10 tens and carry them to the tens column.

#### Tens:

$$2 + 10$$
 (carry over) = 12

$$12 \div 4 = 3$$

 $\Rightarrow$  3 tens

#### **Units:**

$$8 \div 4 = 2$$

 $\Rightarrow$  2 units

Read as: 128 divided by 4 equals?

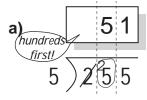

OR How many 4's go into 128?

OR 128 divides by 4 how many times?

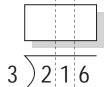

Consider:

$$128 \div 4 = 32$$

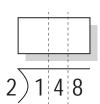

$$4 \times 32 = 128$$

# 9. [Decimals]

#### **Skill 9.1** Counting tenths and hundredths in a $10 \times 10$ grid (1).

MM5 11 2 2 3 3 4 4 MM6 11 2 2 3 3 4 4

• Count the number of squares in 1 row or 1 column.

Hint: Each row (or column) shows 10 tenths. The whole grid shows 100 hundredths.

To count tenths

• Count the number of completely shaded rows (or columns).

To count hundredths

- Add on the amount of shaded squares in the shorter shaded row (or column) to the number of tenths. OR
- Count the total number of shaded squares.

Q.

tenths +

hundredths =

0.

A. 6 tenths +4 hundredths= 0.64

**Tenths:** 

There are 6 rows completely shaded

 $\Rightarrow$  6 tenths

**Hundredths:** 

There are 4 shaded squares in the shorter row

 $\Rightarrow$  4 hundredths

a)

47 hundredths =

0.47

0.

b)

35 hundredths =

0.

0.

c)

## Skill 9.3 Reading a decimal number on a scale (1).

- Count the number of spaces between two whole numbers. (Always one more than the number of marks.)
- Work out the value of each space.

Example: 10 spaces between each whole number  $\Rightarrow 1 \div 10 = 0.1$ Each mark is further along the scale by one tenth or 0.1

- Starting at the last whole number, count on by 0.1. Point to each mark as you go.
- **Q.** Show with an arrow the number 0.7 on the scale.

A. |0 |1 |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 || |1 ||

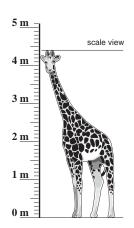

There are 10 spaces between 0 and 1.

Each space is worth one tenth:

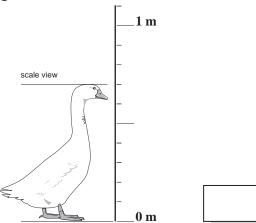

$$\frac{1}{10} = 1 \div 10 = 0.1$$

From '0' you can count on: 0, 0.1, 0.2, 0.3, 0.4, 0.5, 0.6, 0.7 OR Knowing the middle mark is 0.5, count on from 0.5: 0.5, 0.6, 0.7

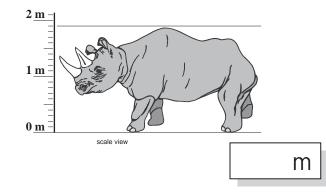

a) Use the scale to find the height of the giraffe in metres.

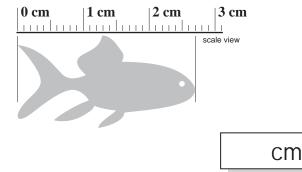

**b)** Use the scale to find the height of the goose in metres.

c) Use the scale to find the height of the rhinoceros in metres.

**d)** Use the scale to find the length of the fish in centimetres.

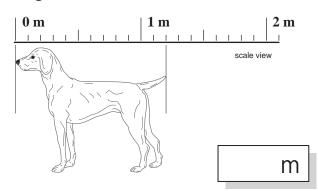

4.4 m

m

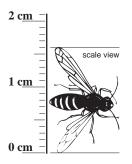

## Skill 9.3 Reading a decimal number on a scale (2).

e) Use the scale to find the length of the dog in metres.

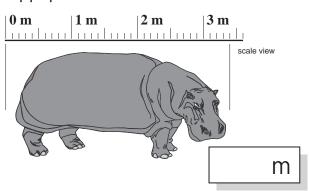

f) Use the scale to find the wing span of the bee in centimetres.

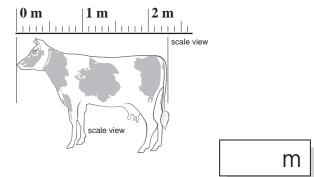

cm

g) Use the scale to find the length of the hippopotamus in metres.

h) Use the scale to find the length of the cow in metres.

i) Show with an arrow the number 3.8 on the scale.

j) Show with an arrow the number 7.3 on the scale.

	6	7	8
1,,,,,	Liitiliii	liiii liiii	hiiih

**k)** Show with an arrow the number 0.6 on the scale.

I) Show with an arrow the number 4.2 on the scale.

**m)** Show with an arrow the number 6.5 on the scale.

n) Show with an arrow the number 1.9 on the scale.

#### Less than 100 cents

Skill 9.4

- Write a zero first if the cents are less than 100.
- Write the decimal point.
- Write the cents after the decimal point.

  Hint: Use a 0 as a place holder after the decimal point for any amount less than 10 cents.

Example: 6¢ = \$0.06

#### More than 100 cents

- Separate the hundreds of cents to make whole dollars.
- Write the whole dollars followed by the decimal point.
- Write the remaining cents after the decimal point.

**Conversion Fact - MONEY** 100 cents = 1 dollar

# **Q.** Write these cents in dollars:

Converting cent amounts into dollar amounts.

$$=600 c + 38 c$$

$$= $6 + 38¢$$

$$31¢ =$$

$$100¢ =$$

k) Write these cents in dollars:

n) Write these cents in dollars:

$$4c =$$

#### Skill 9.5 Comparing place value in decimal numbers.

- Line up the decimal numbers at their decimal points.
- Compare the size of digits in the same places, starting from the left.

Place value	thousands	hundreds	tens	units	tenths	hundredths	thousandths
	1000	100	10	1	0.1	0.01	0.001

Hint: Using zeros as place holders does not change the value of a number when the zeros are put:

**EITHER** 

Before the first digit in any number

Example: 5

The digit 5 is in the units place:

A. A and D

5 = 05 = 005

OR

After the last digit of a decimal number, after the decimal point

Example: 0.5

The digit 5 is in the tenths place:

3

0.5 = 0.50 = 0.500

**Q.** Which of the following are true?

- A) 6.0 = 6.00
- B) 400 = 40
- C) 0.7 = 0.070
- D) 0.8 = 0.800

Line up the numbers at their decimal points.

Compare from the left.

A) 6.0 =

6.00 True

B) 400 =

40 False

C) 0.7 =

0.070 False

D) 0.8 =

0.800 True

Only A and D are true.

a) Which of the following are true?

- A) 6 = 60.0
- B) 50.0 = 50
- C) 0.3 = 0.3
- D) 00.2 = 2.00

**b)** Which of the following are true?

- A) 70 = 7
- B) 9 = 0.9
- C) 0.5 = 0.50
- D) 8.0 = 8.00

**c)** Which of the following are true?

- A) 10.0 = 1.0
- B) 50.0 = 50
- C) 0.07 = 0.007
- D) 4 = 4.0

B and C

and

and

**d)** Which of the following are true?

- A) 90 = 90.0
- B) 4 = 40.0
- C) 20.0 = 0.20
- D) 0.50 = 0.5

e) Which of the following are true?

- A) 0.03 = 0.30
- B) 0.4 = 0.40
- C) 7 = 0.70
- D) 8.0 = 8.0000

f) Which of the following are true?

- A) 5.0 = 5
- B) 20 = 20.0
- C) 0.4 = 0.004
- D) 0.30 = 3.0

and

and

and

#### Skill 9.6 Adding dollars and cents.

- Add the cents first.
- Convert cents to dollars where possible.
- Add the dollars next.
- Add the totals.

**Q.** \$3.40 + \$3.65 =

#### **Conversion Fact - MONEY** 100 cents = 1 dollar

**A.** \$3.40 + \$3.65 =

$$40¢ + 65¢ = 105¢$$

$$105¢ = $1.05$$

$$$3.00 + $3.00 = $6.00$$

**Cents:** 

40 + 65 = 105 cents 105 cents = 1 dollar and 5 cents

**Dollars:** 

1 + 6 = 7 dollars

**Totals:** 

\$1.05 + \$6.00 = \$7.05

**a)** \$2.30 + \$3.95 =

$$30¢ + 95¢ = 125¢$$

125¢ = \$1.25 \$2.00 + \$3.00 = \$5

\$ 6.25

**b)** \$2.40 + \$5.60 =

40¢ + 60¢ = 100¢

**c)** \$4.55 + \$2.05 =

¢ = \$

= \$

**d)** \$1.65 + \$3.45 =

¢ = \$

**e)** \$3.50 + \$1.95 =

¢ = \$

**f)** \$3.85 + \$4.50 =

# Skill 9.7 Calculating the change from whole dollars. • Write the word problem as a number sentence. EITHER • Consider the cents first. Authorised for the use of: MAI OR • Subtract the

**Conversion Fact - MONEY** 100 cents = 1 dollar

Subtract the decimal number from the whole number. (see skill 9.10, page 49)

Q.	How much change will you receive
	from \$10.00 if you spend \$5.15?

to the next whole dollar.

Build up the cents, in steps if necessary,

"How much must I add to \$5.15 to have \$6.00?"

"\$5.15 plus 5 cents makes \$5.20 And 80 cents more will make \$6.00 Altogether I need 85 cents more."

So \$5.15 and \$0.85 make \$6.00 Then \$4.00 more will make \$10.00

$$$3.45 + 55¢ = $4.00$$

b) How much change will you receive from \$5.00 if you spend \$2.30?

d) How much change will you receive from \$10.00 if you spend \$0.90?

c) How much change will you receive from \$10.00 if you spend \$2.05?

\$

f) How much change will you receive from \$5.00 if you spend \$3.85?

e) How much change will you receive from \$10.00 if you spend \$4.65?

.....

#### Skill 9.8 Adding decimal numbers with carry over using columns (1).

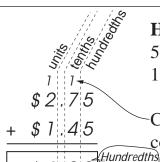

• Always keep your working columns in line, aligning the decimal points, the decimal places, units with units, tens with tens, etc.

• Add from right to left.

**Q.** \$2.75 + \$1.45

A.

**Hundredths:** 

$$5 + 5 = 10$$

10 hundredths = 1 tenth and 0 hundredths  $\Rightarrow$  0 hundredths

Carry over the 1 tenth to the tenths column.

**Tenths:** 

first!

7 + 4 + 1 (carry over) = 12

12 tenths = 1 unit and 2 tenths

 $\Rightarrow$  2 tenths

Carry over the 1 unit to the units column.

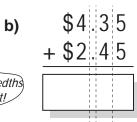

Put the decimal point in the answer box under the other decimal points.

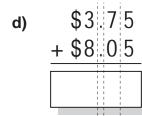

**Units:** 

$$2 + 1 + 1$$
 (carry over) = 4

 $\Rightarrow$  4 units

a) \$1.50 b) + \$3.50 \$5.00 Hundredths first!

e) \$4.60 + \$1.90

i) 0.64 +1.5

#### Skill 9.9 Subtracting decimal numbers with carry over using columns.

- Keep the units, decimal points, tenths and hundredths in their own column.
- Work from right to left.

## Q.

3.65 -1.9

<sup>2</sup> 3.65

1.9

#### **Hundredths:**

5 - 0 = 5

 $\Rightarrow$  5 hundredths

#### **Tenths:**

6 - 9 = ? tenths.

To make the answer positive break down first! the 3 units. 1.75

3 units = 2 units and 10 tenths.Re-group the 10 tenths with the 6 tenths to make 16 tenths.

Now...

16 - 9 = 7

 $\Rightarrow$  7 tenths

Put the decimal point in the answer box under the other decimal points.

#### **Units:**

2 - 1 = 1

 $\Rightarrow$  1 unit

#### Skill 9.10 Subtracting a decimal number less than 1 from a whole number.

- Write the whole number first, with a decimal point and one or two zeros after it.
   Hint: The number does not change. 5 = 5.00
- Write the decimal number underneath.
- Line up the decimal points.
- Subtract using columns. (see skill 9.9, page 48)

## $\mathbf{q}$ . 5 - 0.94 =

Α.

#### **Hundredths:**

0 - 4 = ? hundredths

To make the answer positive break down the 5 units:

5 units = 4 units + 9 tenths + 10

Hundredths hundredths

Now...

10 - 4 = 6

 $\Rightarrow$  6 hundredths

**Tenths:** 

9 - 9 = 0

 $\Rightarrow$  0 tenths

Put the decimal point in the answer box.

**Units:** 

$$4 - 0 = 4$$

 $\Rightarrow$  4 units

a) 
$$2 - 0.3 =$$

b) 
$$1 - 0.5 =$$

c) 
$$7 - 0.8 =$$

$$k) 2 - 0.83 =$$

i) 
$$7 - 0.72 =$$

7.00

#### **Skill 9.11** Solving problems involving GST.

Note: Add the price and the GST to get the price including GST.

- **Conversion Fact MONEY**
- Add the cents first.

100 cents = 1 dollar

- Convert cents to dollars where possible.
- Add the dollars next.
- Add the totals.
- Q. 10% GST must be added to a \$21.90 CD. What is the price of the CD after adding \$2.19 GST?
- **A.** \$21.90 + \$2.19 = 90¢ + 19¢ = 109¢ 109¢ = \$ 1.09\$21.00 + \$2.00 = \$23.00 **= \$24.09**

#### **Cents:**

90 + 19 = 109 cents

109 cents = 1 dollar and 9 cents

**Dollars:** 

21 + 2 = 23 dollars

Totals:

\$1.09 + \$23.00 = \$24.09

10% GST must be added to a \$13 book. What is the price of the book after adding \$1.30 GST?

c) The price of a tennis racquet is \$45

including GST. If the price before GST

is \$40.91, what is the GST?

**b)** 10% GST must be added to a \$15.50 ring. What is the price of the ring after adding \$1.55 GST?

d) The price of a lipstick is \$30 including GST. If the price before GST is \$27.27,

what is the GST?

The price of a USB stick is \$24 including GST. If the price before GST is \$21.82, what is the GST?

The price of a set of water colours is \$120 including GST. If the price before GST is \$109.09, what is the GST?

g) The price of a Lego set is \$50 including GST. If the price before GST is \$45.45, what is the GST?

h) The price of a show ticket is \$135 including GST. If the price before GST is \$122.73, what is the GST?

#### Skill 9.12 Multiplying decimal numbers by powers of 10.

- MM5 11 22 33 44 MM6 11 22 33 <mark>4</mark>4
- To multiply by a power of 10, move the decimal point to the right one place for each 0.
- Remove the decimal point at the end of the number if no other digits follow.
- Remove all the zeros at the end of the decimal number if needed. Example: 15.60% = 15.6

**Q.** 
$$7.48 \times 10 =$$

**A.** 
$$7.48 \times 10 = \frac{\text{one zero, one place}}{\text{one 2}}$$

a) 
$$5.3 \times 10 = 5.3 \times 10 = 10$$

**b)** 
$$6.2 \times 10 =$$

c) 
$$9.7 \times 10 =$$

d) 
$$1.8 \times 10 =$$

e) 
$$0.7 \times 10 =$$

f) 
$$0.1 \times 10 =$$

g) 
$$4.18 \times 10 =$$

h) 
$$5.06 \times 10 =$$

i) 
$$3.79 \times 10 =$$

j) 
$$1.03 \times 10 =$$

**k)** 
$$2.74 \times 10 =$$

1) 
$$9.56 \times 10 =$$

m) 
$$2.7 \times 100 = 100$$

o) 
$$8.3 \times 100 =$$

**p)** 
$$0.5 \times 100 =$$

q) 
$$4.7 \times 100 =$$

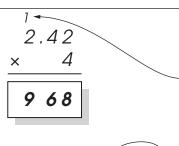

r) 
$$0.9 \times 100 =$$

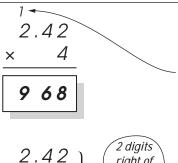

s) 
$$6.25 \times 100 =$$

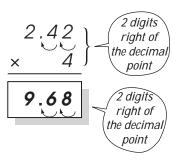

t) 
$$7.81 \times 100 =$$

#### **Skill 9.13** Multiplying decimal numbers by a single digit.

- Work from right to left.
- Count the total number of digits to the right of the decimal point in the question.
- Count over, from the right in the answer, the same number of digits and place the decimal point.
- Q.
- 2.42

 $4 \times 2 = 8$  $\Rightarrow 8$ 

 $4 \times 4 = 16$ 

- Write the 6 and carry the 1.  $4 \times 2 = 8$  Add the 1 carry.

8 + 1 = 9

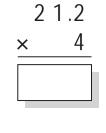

Count the total number of digits to the right of the decimal point in the question. There are 2.

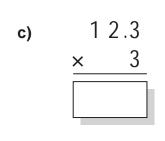

Count over 2 numbers from the right and place the decimal point in the answer.

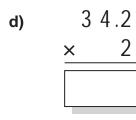

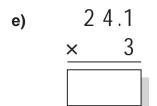

point

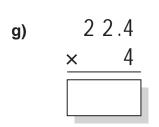

f)

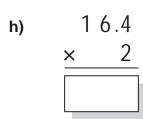

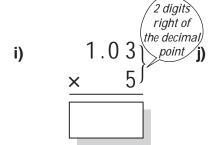

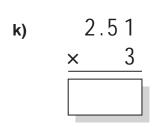

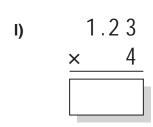

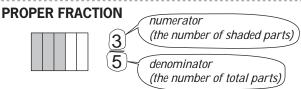

# 10. [Fractions]

#### Skill 10.1 Illustrating proper fractions.

- · Count the number of shaded parts.
- Count the total number of parts.
- Write the number of shaded parts over the total number of parts.

**Q.** What fraction of the circle is shaded?

A.  $\frac{3}{4}$ 

The circle is divided into 4 equal parts so the denominator of the fraction is 4. Only 3 parts of the circle are shaded so the numerator is 3.

The fraction of the circle that is shaded is three fourths or  $\frac{3}{4}$ .

a) What fraction of the bar is shaded?

<u>2</u> 5 **b)** What fraction of the bar is shaded?

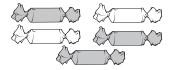

c) What fraction of the bar is shaded?

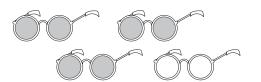

**d)** What fraction of this group of lollies is shaded?

**e)** What fraction of this group of sunglasses is shaded?

g) Shade in  $\frac{4}{9}$  of this square.

h) Shade in  $\frac{3}{8}$  of this parallelogram.

i) Shade in  $\frac{5}{8}$  of this square.

j) Shade in  $\frac{1}{6}$  of this circle.

## Skill 10.2 Reading a fraction on a number line.

• Count the number of spaces between two consecutive whole numbers. The number of spaces tells you the value of the denominator.

Example: If there are 6 spaces between the whole numbers, then each space equals  $\frac{1}{6}$ 

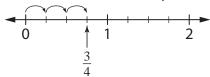

**Q.** Name the fraction shown by the arrow on the number line.

A.  $\frac{3}{4}$ 

There are four spaces between 0 and 1. Each space equals  $\frac{1}{4}$ .

The arrow points to  $\frac{3}{4}$ .

a) Name the fraction shown by the arrow on the number line.

**b)** Name the fraction shown by the arrow on the number line.

c) Name the fraction shown by the arrow on the number line.

**d)** Name the fraction shown by the arrow on the number line.

e) Name the fraction shown by the arrow on the number line.

f) Name the fraction shown by the arrow on the number line.

**g)** Name the fraction shown by the arrow on the number line.

h) Name the fraction shown by the arrow on the number line.

i) Name the fraction shown by the arrow on the number line.

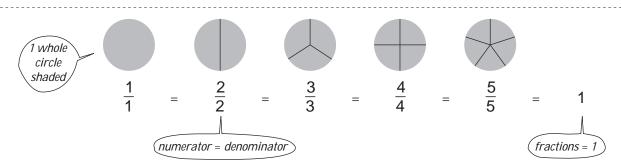

Name the fraction shown by the arrow on the number line.

## Skill 10.3 Writing 1 as a fraction.

Hint: A fraction equals 1 if the numerator is the same as the denominator.

- **Q.** Which of the following equal 1?
- A)  $\frac{3}{3}$  B)  $\frac{4}{3}$  C)  $\frac{2}{3}$  D)  $\frac{4}{4}$
- A. A and D

The only fractions in which the numerator is the same as the denominator are  $\frac{3}{3}$  and  $\frac{4}{4}$ 

= 1 (three thirds make a whole)

 $\frac{4}{4}$  = 1 (four fourths or quarters make a whole)

- Which of the following equal 1?
- C)  $\frac{8}{8}$

A and C

- **b)** Which of the following equal 1?
- A)  $\frac{5}{2}$  B)  $\frac{2}{2}$  C)  $\frac{1}{2}$

and

- c) Which of the following equal 1?
- B)  $\frac{4}{4}$
- C)  $\frac{5}{8}$

and

- d) Which of the following equal 1?
- B)  $\frac{1}{9}$  C)  $\frac{7}{7}$

and

e) Write a fraction equal to 1 that has a denominator of 8.

f) Write a fraction equal to 1 that has a denominator of 7.

Write a fraction equal to 1 that has a denominator of 5.

h) Write a fraction equal to 1 that has a denominator of 9.

Write a fraction equal to 1 that i) has a denominator of 12.

Write a fraction equal to 1 that has a denominator of 4.

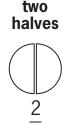

Write a fraction equal to 1 that has a denominator of 15.

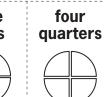

Write a fraction equal to 1 that has a denominator of 3.

## Skill 10.4 Finding the remaining fraction from a whole.

#### **ONE WHOLE** is made out of:

three thirds  $\frac{3}{3}$ 

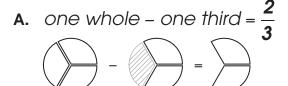

- Subtract the fraction from the whole amount.
- **Q.** If one third of the birthday cake was eaten, what fraction of the cake remains?

Three thirds make the cake. If one third was eaten, there are two thirds left.

a) Lou has painted one half of the wall. What fraction of the wall is left to paint?

one whole – one half =  $\frac{1}{2}$ 

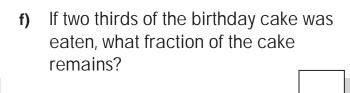

b) Luke has spent one sixth of his pocket money. What fraction of the money is left?

c) Three quarters of the lesson is over. What fraction of the lesson remains?

**d)** If three fifths of the show is over, what fraction of the performance is left?

boys, what fraction of the students are girls?

g) Dad finished unpacking three eighths of the box. What fraction of the box is left to unpack?

h) Laura learnt seven tenths of the song on the piano. What fraction of the song is left to learn?

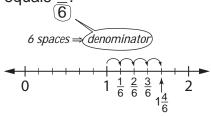

#### Recognising mixed numbers.

## Reading mixed numbers on a number line Count the number of spaces between

two consecutive whole numbers.

The number of spaces tells you the value of the denominator.

Example: If there are 6 spaces between the whole numbers, then each space equals  $\frac{1}{2}$ .

#### Recognising mixed numbers

To name the whole number:

Count the fully shaded shapes.

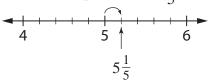

To name the fraction:

- Count the shaded parts of the last shape.
- Count the total parts of the last shape.
- Write the shaded parts over the total parts.
- **Q.** Name the mixed number shown by the arrow on the number line.

A.  $5\frac{1}{5}$ 

There are five spaces between 5 and 6. Each space equals  $\frac{1}{5}$ . The arrow points to  $5\frac{1}{5}$ .

Name the mixed number represented by these shaded squares.

b) Name the mixed number represented by these shaded triangles.

Name the mixed number represented by these shaded rectangles.

d) Name the mixed number represented by these shaded hexagons.

Name the mixed number shown by the arrow on the number line.

Name the mixed number shown f) by the arrow on the number line.

g) Name the mixed number shown by the arrow on the number line.

h) Name the mixed number shown by the arrow on the number line.

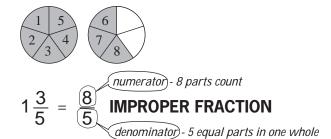

#### Skill 10.6 Converting mixed numbers to improper fractions.

- Consider the mixed number as two bits: a whole number
  - a proper fraction
- Shade whole shapes to match the whole number.
- Partially shade the last shape to match the fraction.

**Q.** Shade the circles to show that  $2\frac{1}{3} = \frac{7}{3}$ 

A.  $2\frac{1}{3} = 1 + 1 + \frac{1}{3}$  $\frac{7}{3} = \frac{3}{3} + \frac{3}{3} + \frac{1}{3}$ 

> Shade two whole circles and a third of the remaining circle. In total 7 thirds have been shaded.

This shows that 
$$2\frac{1}{3} = \frac{7}{3}$$

a) Shade the pentagons to show that  $3 = \frac{15}{5}$ 

**b)** Shade the circles to show that  $2\frac{2}{3} = \frac{8}{3}$ 

c) Shade the rectangles to show that  $4 = \frac{24}{6}$ 

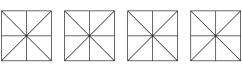

d) Shade the circles to show that  $3\frac{1}{6} = \frac{19}{6}$ 

e) Shade the rectangles to show that  $1\frac{3}{5} = \frac{8}{5}$ 

f) Shade the squares to show that  $3\frac{5}{8} = \frac{29}{8}$ 

g) Shade the triangles to show that  $4\frac{2}{3} = \frac{14}{3}$ 

h) Shade the rectangles to show that  $2\frac{5}{7} = \frac{19}{7}$ 

# Skill 10.7 Modelling addition and subtraction of fractions with the same denominators, by using parts of a whole.

# To add two fractions by using parts of a whole

- Colour the fraction bar to represent the second fraction.
- Count the number of shaded parts.
- Write this number as the top number of the result.
- Count the total number of parts.
- Write this number as the bottom number of the result.

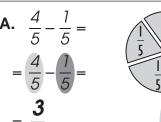

# To subtract two fractions by using parts of a whole

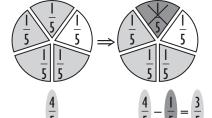

- Count the total number of light shaded parts.
- Write this number as the top number of the result.
- Count the total number of parts.
- Write this number as the bottom number of the result.

## **Q.** Complete the subtraction.

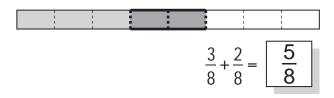

$$\frac{4}{5} - \frac{1}{5} =$$

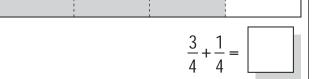

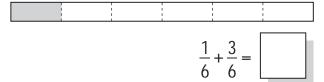

a) Shade to complete the sum.

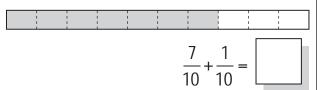

**b)** Shade to complete the sum.

c) Shade to complete the sum.

d) Shade to complete the sum.

e) Complete the subtraction.

$$\frac{5}{8} - \frac{2}{8} =$$

f) Complete the subtraction.

$$\frac{6}{7} - \frac{1}{7} =$$

g) Complete the subtraction.

$$\frac{7}{9} - \frac{2}{9} =$$

h) Complete the subtraction.

$$\frac{6}{6} - \frac{5}{6} =$$

#### Skill 10.8 Comparing two fractions with the same denominators.

#### **Using fraction bars**

- Compare the size of the two shaded areas.
- Use < if the area showing the first fraction is smaller than the area showing the second fraction.
- Use = if the areas are equal.
- Use > if the area showing the first fraction is larger than the area showing the second fraction.

#### Using number lines

- Compare the position of the fractions on the number line.
- Use < if the first fraction is to the left of the second fraction on the number line.
- Use = if the two fractions are at the same point on the number line.
- Use > if the first fraction is to the right of the second fraction on the number line.

Hint: The fraction with the larger numerator is larger.

**Q.** Use < = or > to make this true.

<u>1</u> 5	<u>  1</u>	<u>  1</u>	<u>I</u> 5	<u> </u> 5
<u> </u>	<u> </u>	<u> </u>	<u>I</u> 5	<u> </u> 5

 $\frac{4}{5}$ 

**A.**  $\frac{4}{5} > \frac{3}{5}$ 

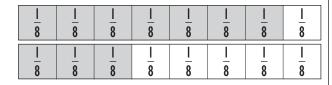

4 is greater than 3.

a) Use <, = or > to make this true.

1 9	<u> </u> 9	19	<u> </u> 9	<u> </u> 9	19	19	19	<u> </u> 9
<u> </u>	<u> </u>   <u> </u> 9	19	19	<u> </u> 9	<u> </u> 9	<u> </u> 9	<u> </u> 9	<u>l</u>

 $\frac{2}{9}$  <

**b)** Use <, = or > to make this true.

 $\frac{7}{8}$ 

c) Show with arrows the fractions  $\frac{4}{6}$  and  $\frac{1}{6}$  on the number line. Which fraction is greater?

c) Show with arrows the fractions  $\frac{7}{10}$  and  $\frac{5}{10}$  on the number line. Which fraction is greater?

e) Show with arrows the fractions  $\frac{5}{7}$  and  $\frac{1}{7}$  on the number line. Which fraction is greater?

f) Show with arrows the fractions  $\frac{3}{6}$  and  $\frac{5}{6}$  on the number line. Which fraction is greater?

### Skill 10.9 Comparing two fractions with the same numerators.

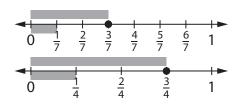

- Compare the position of the fractions on the number line.
- Use < if the first fraction is to the left of the second fraction on the number line.
- < is less than
- is equal tois greater than
- Use = if the two fractions are at the same point on the number line.
- Use > if the first fraction is to the right of the second fraction on the number line.

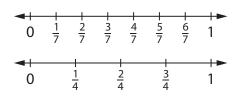

Hint: The fraction with the smaller denominator is larger.

One seventh is smaller than one fourth. Therefore three sevenths is less than three fourths.

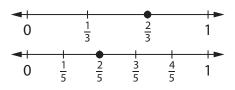

**Q.** Use <, = or > to make this true.

 $\frac{3}{7}$   $\frac{3}{4}$ 

**a)** Use <, = or > to make this true.

 $\frac{2}{3}$  >  $\frac{2}{5}$ 

**b)** Use < = or > to make this true.

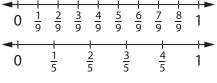

5 6 <u>5</u> 11

**c)** Use <, = or > to make this true.

 $\frac{3}{8}$ 

**d)** Use <, = or > to make this true.

 $\frac{2}{9}$   $\frac{2}{5}$ 

e) Use <, = or > to make this true.

 $\frac{4}{8}$ 

f) Use < = or > to make this true.

 $\frac{6}{7}$   $\frac{6}{10}$ 

### Skill 10.10 Completing equivalent fractions (1).

2 equal parts 1 part shaded

4 equal parts 2 parts shaded

6 equal parts 3 parts shaded

8 equal parts 4 parts shaded

 $\frac{1}{2}$  of the circle is shaded  $\frac{2}{4}$  of the circle is shaded  $\frac{3}{6}$  of the circle is shaded  $\frac{4}{8}$  of the circle is shaded

The fractions  $\frac{1}{2}$ ,  $\frac{2}{4}$ ,  $\frac{3}{6}$  and  $\frac{4}{8}$  are all equivalent because they represent the same amount:  $\frac{1}{2} = \frac{2}{4} = \frac{3}{6} = \frac{4}{8}$ 

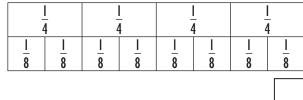

### To find an equivalent fraction by drawing a diagram

- Draw two fraction bars one under the other.
- Divide each box into equal parts, as shown by the denominators.
- Shade both fraction bars to show the given
- Read the second fraction from the bottom fraction bar.

### To find an equivalent fraction from a given diagram

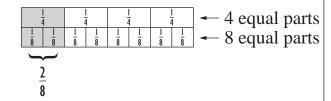

- Read the shaded fractions from both fraction bars.
- Complete the missing number in one of the fractions.

**Q.** Shade the bars to complete the equivalent fractions.

$$\frac{1}{4} = \frac{1}{8}$$

**A.**  $\frac{1}{4} = \frac{2}{8}$ 

Shade the bars to complete the equivalent fractions.

<u>1</u>						1/2					
$\frac{1}{12}$	$\frac{1}{12}$	$\frac{1}{12}$	$\frac{1}{12}$	$\frac{1}{12}$	<u> </u>   12	<u> </u>	<u> </u>   12	$\frac{1}{12}$	<u> </u>   12	1/12	$\frac{1}{12}$
										Γ	

$$\frac{1}{2} = \frac{1}{12}$$

**b)** Shade the bars to complete the equivalent fractions.

	Ī			<u> </u>			Ī	
	3			3		3		
1	1	1	1	1	1	1	1	<u> </u>
9	9	9	9	9	9	9	9	9

$$\frac{2}{3} = \frac{\boxed{}}{9}$$

c) Shade the bars to complete the equivalent fractions.

	3				-	<u> </u>  -		1 3			
	-	-	_	1		1	-		_		<u> </u>
12	12	12	12	12	12	12	12	12	12	12	12

$$\frac{1}{3} = \frac{1}{12}$$

d) Shade the bars to complete the equivalent fractions.

	1/2			1/2	
<u> </u> 6					

$$\frac{1}{2} = \frac{1}{6}$$

### Skill 10.10 Completing equivalent fractions (2).

e) Shade the bars to complete the equivalent fractions.

<u> </u>	<u> </u>	$\frac{1}{10}$	<u> </u>	<u> </u>	<u> </u>	10	10	$\frac{1}{10}$	<u> </u>
<u> </u>   <u> </u>			<del>-</del>		<u> </u>	-	5	-	<u>-</u>

f) Shade the bars to complete the equivalent fractions.

<u>  1</u>	<u> </u> 9							
	<u> </u>			<u> </u>			1	
	3		3			3		

$$\frac{3}{9} = \frac{3}{3}$$

g) Shade the bars to complete the equivalent fractions.

| $\frac{1}{15}$ |
|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| $\frac{1}{3}$  |                |                |                |                | <u>1</u>       |                |                |                |                | <u>1</u>       |                |                |                |                |

$$\frac{5}{15} = \frac{3}{3}$$

h) Shade the bars to complete the equivalent fractions.

<u>  1</u>	<u>  1</u>	<u>  1</u>	<u>  8</u>	<u>  8</u>	<u>  1</u>	<u>  1</u>	<u>  1</u>
	<u>1</u>		1		<u>.</u> 1		<u>1</u>

$$\frac{6}{8} = \frac{1}{4}$$

i) Complete to form equivalent fractions:

$$\frac{4}{5} = \boxed{\frac{16}{}}$$

j) Complete to form equivalent fractions:

$$\frac{2}{3} = 6$$

**k)** Complete to form equivalent fractions:

$$\frac{1}{3} = \frac{1}{9}$$

Complete to form equivalent fractions:

$$\frac{2}{6} = \frac{1}{2}$$

**m)** Complete to form equivalent fractions:

$$\frac{1}{2} = \frac{1}{8}$$

n) Complete to form equivalent fractions:

$$\frac{4}{10} = \frac{}{5}$$

•) Complete to form equivalent fractions:

$$\frac{2}{8} = \frac{1}{2}$$

**p)** Complete to form equivalent fractions:

$$\frac{4}{12} = \frac{\phantom{0}}{3}$$

**q)** Complete to form equivalent fractions:

r) Complete to form equivalent fractions:

$$\frac{2}{7} = \frac{8}{2}$$

**s)** Complete to form equivalent fractions:

$$\frac{2}{3} = \frac{2}{18}$$

complete to form equivalent fractions:

$$\frac{3}{10} = \frac{9}{2}$$

### Skill 10.11 Comparing fractions (1).

### Using fraction bars

- · Shade each fraction bar.
- Compare the shaded areas to decide which is the largest.

Hint: The fraction with the largest shaded area is greater.

### Using number lines

- Mark the positions of the fractions on the number line.
- Write the fraction whose position is to the right of the other fraction on the number line.

Q.	Shade the fraction bars to show $\frac{2}{3}$
	and $\frac{5}{9}$ . Which fraction is greater?

A. 4

Shade two thirds of the first bar. Shade five ninths of the second bar. The fractions are close in value, however  $\frac{2}{3}$  is greater than  $\frac{5}{9}$ .

$\frac{2}{3}$		larger shaded area
$\frac{5}{9}$		

a) Shade the fraction bars to show  $\frac{2}{3}$  and  $\frac{3}{4}$ . Which fraction is greater?

$\frac{2}{3}$		
<u>3</u>		

<u>3</u>

b) Shade the fraction bars to show  $\frac{1}{4}$  and  $\frac{2}{5}$ . Which fraction is greater?

c) Shade the fraction bars to show  $\frac{3}{5}$  and  $\frac{2}{3}$ . Which fraction is smaller?

d) Shade the fraction bars to show  $\frac{3}{4}$  and  $\frac{7}{8}$ . Which fraction is greater?

e) Shade the fraction bars to show  $\frac{4}{7}$  and  $\frac{5}{6}$ . Which fraction is greater?

f) Shade the fraction bars to show  $\frac{5}{8}$  and  $\frac{4}{7}$ . Which fraction is smaller?

g) Shade the fraction bars to show  $\frac{3}{5}$  and  $\frac{5}{9}$ . Which fraction is greater?

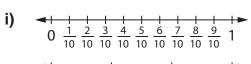

h) Shade the fraction bars to show  $\frac{3}{4}$  and  $\frac{5}{6}$ . Which fraction is smaller?

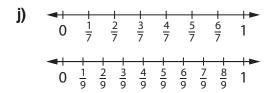

### Skill 10.11 Comparing fractions (2).

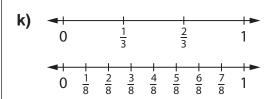

Use <, = or > to make this statement true.

$$\frac{3}{10}$$
  $\frac{1}{3}$ 

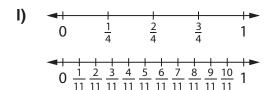

Use <, = or > to make this statement true.

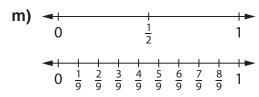

Use <, = or > to make this statement true.

$$\frac{2}{3}$$
  $\frac{5}{8}$ 

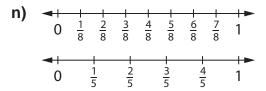

Use <, = or > to make this statement true.

$$\frac{3}{4}$$
  $\frac{7}{11}$ 

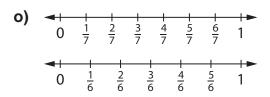

Use <, = or > to make this statement true.

$$\frac{1}{2}$$
  $\frac{5}{9}$ 

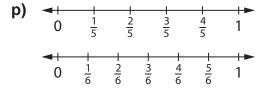

Use <, = or > to make this statement true.

$$\frac{4}{8}$$
  $\frac{3}{5}$ 

Use <, = or > to make this statement true.

Use <, = or > to make this statement true.

$$\frac{4}{5}$$
  $\frac{5}{6}$ 

### Skill 10.12 Adding fractions with the same denominators.

- Add the numerators (top numbers of the fractions). Note: Do not change the denominators.
- **Q.**  $\frac{1}{9} + \frac{3}{9} =$

Add the fractions:

One ninth plus three ninths is four ninths.

Add only the top numbers.

$$\frac{1}{9}$$
 +  $\frac{3}{9}$  =  $\frac{4}{9}$ 

- **a)**  $\frac{1}{3} + \frac{1}{3} =$
- $\frac{2}{3}$  **b)**  $\frac{2}{7} + \frac{3}{7} =$
- - **c)**  $\frac{2}{5} + \frac{2}{5} =$

- **e)**  $\frac{1}{6} + \frac{4}{6} =$
- - **f)**  $\frac{2}{4} + \frac{1}{4} =$

**g)**  $\frac{1}{5} + \frac{3}{5} =$ 

**d)**  $\frac{4}{9} + \frac{3}{9} =$ 

- **h)**  $\frac{1}{8} + \frac{2}{8} =$
- i)  $\frac{2}{9} + \frac{2}{9} =$

- **j)**  $\frac{3}{8} + \frac{4}{8} =$
- **k)**  $\frac{3}{10} + \frac{4}{10} =$
- 1)  $\frac{5}{12} + \frac{6}{12} =$

- **m)**  $\frac{1}{7} + \frac{5}{7} =$
- **n)**  $\frac{2}{9} + \frac{5}{9} =$
- **o)**  $\frac{1}{5} + \frac{1}{5} =$

**p)**  $\frac{6}{13} + \frac{6}{13} =$ 

**q)**  $\frac{7}{10} + \frac{2}{10} =$ 

r)  $\frac{8}{11} + \frac{2}{11} =$ 

## Skill 10.13 Subtracting fractions with the same denominators.

Note: Do not change the denominators.

- Subtract the numerators (top numbers of the fractions).
- **Q.**  $\frac{4}{7} \frac{2}{7} =$

A.  $\frac{2}{7}$ 

Subtract the fractions:

Four sevenths minus two sevenths is two sevenths.

Subtract only the top numbers.

four sevenths - two sevenths = two sevenths

$$\frac{4}{7} \quad - \quad \frac{2}{7} \quad = \quad \frac{2}{7}$$

- a)  $\frac{2}{3} \frac{1}{3} =$
- <u>1</u>3
- **b)**  $\frac{4}{5} \frac{1}{5} =$
- - **c)**  $\frac{6}{9} \frac{2}{9} =$

- **d)**  $\frac{6}{7} \frac{3}{7} =$
- **e)**  $\frac{5}{8} \frac{2}{8} =$
- f)  $\frac{3}{5} \frac{2}{5} =$

- **g)**  $\frac{9}{10} \frac{6}{10} =$
- **h)**  $\frac{8}{12} \frac{3}{12} =$
- i)  $\frac{7}{11} \frac{2}{11} =$

- **j)**  $\frac{11}{17} \frac{1}{17} =$
- **k)**  $\frac{8}{15} \frac{1}{15} =$
- 1)  $\frac{9}{13} \frac{5}{13} =$

**m)**  $\frac{4}{4} - \frac{1}{4} =$ 

**n)**  $\frac{8}{9} - \frac{2}{9} =$ 

**o)**  $\frac{5}{6} - \frac{2}{6} =$ 

### Skill 10.14 Simplifying fractions.

 Divide both the numerator and the denominator by the same number.

Hint: If the numbers are both even then you can always start with dividing by 2.

Example:

$$\begin{array}{ccc}
6 & & & & \\
\hline
8 & & & \\
\hline
denominator (even) & & \\
\hline
8 & & \\
& & \\
& & \\
\end{array} = \frac{3}{4}$$

### SIMPLIFYING FRACTIONS RULE

If both numbers, top (numerator) and bottom (denominator), can be divided by the same number then the fraction can be simplified.

• Continue dividing by any of the prime factors (2, 3, 5 ...) until the fraction can no longer be simplified.

**Q.** Simplify: 
$$\frac{6}{10}$$

**A.** 
$$\frac{6}{10} \div 2 = \frac{3}{5}$$

Both 6 and 10 are even numbers. They can be divided by 2. The fraction can be simplified.

a) Simplify: 
$$\frac{12}{18}$$

**b)** Simplify: 
$$\frac{4}{6}$$

c) Simplify: 
$$\frac{9}{12}$$

$$\frac{12^{\div 2}}{18 \div 2} = \frac{6^{\div 3}}{9 \div 3} = \boxed{\frac{2}{3}}$$

d) Simplify: 
$$\frac{5}{10}$$

e) Simplify: 
$$\frac{3}{9}$$

f) Simplify: 
$$\frac{8}{14}$$

j) Simplify:  $\frac{15}{25}$ 

I) Simplify:  $\frac{20}{70}$ 

- m) Which of the following fractions cannot be simplified?
  - A)  $\frac{2}{15}$  B)  $\frac{3}{15}$  C)  $\frac{4}{15}$  D)  $\frac{5}{15}$

and

n) Which of the following fractions cannot be simplified?

and

o) Which of the following fractions cannot be simplified?

A) 
$$\frac{6}{18}$$
 B)  $\frac{7}{18}$  C)  $\frac{9}{18}$  D)  $\frac{11}{18}$ 

and

Skill 10.15	Finding	a fraction	of a	whole	number.

- First find one fraction of the number by dividing by the denominator.
- Then multiply the number of fractions you need by the result.

Example: Three fifths of 10?

First find one fifth of 10 by dividing 10 by 5.  $10 \div 5 = 2$  Then find three fifths of 10 by mulyiplying 2 by 3.  $2 \times 3 = 6$ 

So three fifths of 10 is 6.

- Q. Eric kicked two thirds of his team's12 goals. How many goals did he kick?
- A. 8

Find one third of 12.

Divide 12 by 3.

 $12 \div 3 = 4$ 

Find two thirds of 12.

children had the flu?

**b)** Two fifths of the 50 children at the

nursery had the flu. How many

Multiplying 2 by 4.

 $2 \times 4 = 8$ 

a) Three fourths of the 28 students in the class are boys. How many boys are in the class?

one fourth of  $28 = 28 \div 4 = 7$ 

three fourths of  $28 = 3 \times 7 =$ 

one fifth of 50 =

two fifths of 50 =

c) lan scored five eighths of the 40 points on the test. How many points did he score?

one eighth of 40 =

d) Five sixths of the 30 horses in the race jumped over the first hurdle. How many horses jumped the first hurdle?

e) Of the 24 students in a class, one third are chosen for the school play. How many students are chosen for the play?

olay?

f) Of the 100 cakes at a party, seven tenths were eaten in the first hour. How many cakes were eaten in the first hour?

- g) Of the 28 students in the class, two sevenths did not go to camp. How many students did not go to camp?
- h) Gina has finished reading five ninths of the 360 pages of her book. How many pages did Gina finish reading?

### Skill 10.16 Adding mixed numbers with the same denominators.

- Add the whole numbers first.
- Then add the numerators (top numbers of the fractions). Note: Do not add the denominators (bottom numbers of the fractions).
- Write the result as a mixed number.

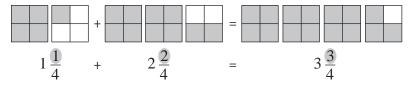

**Q.** 
$$1\frac{1}{4} + 2\frac{2}{4} =$$

Add the whole numbers first:

$$1 + 2 = 3$$

Add the fractions:

One fourth plus two fourths is three fourths.

**a)** 
$$1\frac{5}{10} + 1\frac{3}{10} =$$

$$2\frac{8}{10}$$

$$2\frac{8}{10}$$
 **b)**  $2\frac{3}{7} + 3\frac{3}{7} =$ 

**c)** 
$$4\frac{2}{8} + 1\frac{5}{8} =$$

**d)** 
$$6\frac{3}{10} + 2\frac{4}{10} =$$

**e)** 
$$3\frac{2}{5} + 1\frac{1}{5} =$$

**f)** 
$$4\frac{1}{6} + 3\frac{4}{6} =$$

**g)** 
$$2\frac{2}{9} + 4\frac{3}{9} =$$

**h)** 
$$1\frac{5}{7} + 3\frac{1}{7} =$$

i) 
$$2\frac{2}{11} + 3\frac{5}{11} =$$

**j)** 
$$5\frac{2}{4} + 3\frac{1}{4} =$$

**k)** 
$$2\frac{2}{9} + 4\frac{3}{9} =$$

1) 
$$5\frac{3}{7} + 3\frac{2}{7} =$$

**m)** 
$$1\frac{2}{8} + 3\frac{5}{8} =$$

**n)** 
$$5\frac{8}{11} + 2\frac{2}{11} =$$

**o)** 
$$3\frac{2}{6} + 4\frac{1}{6} =$$

### Skill 10.17 Subtracting mixed numbers.

- Subtract the whole numbers first.
  - Hint: You may need to convert 1 whole number to an equivalent fraction.

Example:  $1 = \frac{5}{5}$ 

one whole equals five fifths

- Then subtract the numerators (top numbers of the fractions). Note: Do not subtract the denominators (bottom numbers of the fractions).
- **Q.**  $3\frac{3}{4} 1\frac{2}{4} =$

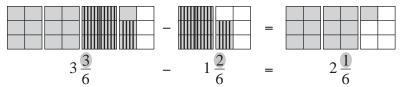

Subtract the whole numbers first:

$$3 - 1 = 2$$

Subtract the fractions:

Three sixths take away two sixths is one sixth.

**a)**  $3\frac{7}{10} - 1\frac{3}{10} =$ 

$$2\frac{4}{10}$$

$$2\frac{4}{10}$$
 **b)**  $5\frac{6}{7} - 2\frac{1}{7} =$ 

**c)** 
$$4\frac{5}{8} - 1\frac{4}{8} =$$

**d)**  $6\frac{9}{10} - 3\frac{2}{10} =$ 

**e)** 
$$7\frac{3}{5} - 5\frac{1}{5} =$$

f) 
$$3\frac{5}{6} - 2\frac{3}{6} =$$

**g)**  $8\frac{7}{9} - 6\frac{2}{9} =$ 

**h)** 
$$6\frac{3}{7} - 2\frac{2}{7} =$$

i) 
$$5\frac{10}{11} - 3\frac{6}{11} =$$

**j)**  $5\frac{3}{4} - 4\frac{2}{4} =$ 

**k)**  $4\frac{8}{9} - 2\frac{6}{9} =$ 

1)  $7\frac{5}{7} - 3\frac{2}{7} =$ 

**m)**  $3\frac{7}{9} - 1\frac{2}{9} =$ 

**n)**  $5\frac{9}{11} - 2\frac{4}{11} =$ 

**o)**  $4\frac{4}{6} - 3\frac{7}{6} =$ 

page 72

# 11. [Decimals / Fractions]

### Skill 11.1 Finding equivalent decimal place values.

MM5 11 22 33 44 MM6 11 22 33 44

To change from **smaller** units to **larger** units

 Divide by the conversion factor (because you need less).

> Example: To change 40 hundredths to tenths ÷ by 10

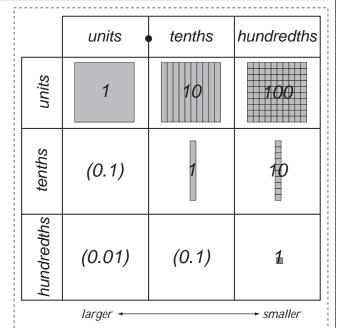

To change from larger units to smaller units

 Multiply by the conversion factor (because you need more).

Example: To change 4 units to tenths × by 10

Hint: Conversion Factors

1 unit = 10 tenths = 100 hundredths 1 tenth = 10 hundredths

**Q.** four = hundredths

**A.** 
$$4 \times 100 = 400$$

Units are larger than hundredths so you need to multiply.

$$4 \times 100 = 400$$

a) 8 tenths = 80 hundredths  $8 \times 10 = 80$ hundredths
larger to smaller so multiply by 10

b) one = tenths

c) one = hundredths

d) six = tenths

e) seven = tenths

f) three = hundredths

g) 2 tenths = hundredths

h) 4 tenths = hundredths

i) five = tenths

j) six = hundredths

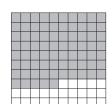

### Skill 11.2 Expressing tenths and hundredths as fractions.

- Write the number of tenths as the number out of 10.
- Write the number of hundredths as the number out of 100.
- Write the number out of 10 or 100 as the top of the fraction (numerator).
- Q. 75 hundredths =

**A. 75** out of  $100 = \frac{75}{100}$ 

75 hundredths is the same as 75 out of 100 or  $\frac{75}{100}$ 

a) 6 tenths =

		6
6	out of 10 =	10

**b)** 3 tenths =

out of 10 =	10

**c)** 9 tenths =

out of 10 =	10
	10

5 tenths =

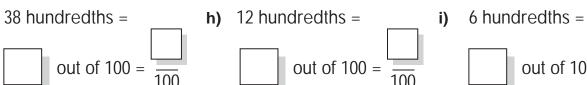

out of 10 =	10

**e)** 1 tenth =

	out of 10 =	<u> </u> 10
--	-------------	----------------

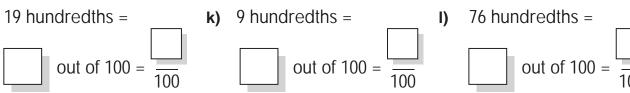

out of 10 =	10

out of 100 =	100
--------------	-----

out of 100 =	100
--------------	-----

m) 1 hundredth =

out of 100 =	100
--------------	-----

n) 47 hundredths =

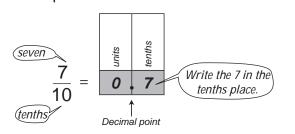

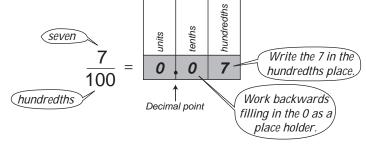

o) 29 hundredths =

#### **Skill 11.3** Writing a fraction as a decimal number.

When the denominator is a power of 10:

- Say the fraction out loud using tenths or hundredths.
- Write the last digit of the numerator in the place spoken of in the denominator.
- Fill in the numerator working backwards to the decimal point.
- Use zeros as place holders where necessary. **Examples:**

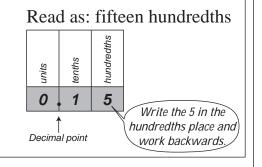

Hint: The number of zeros in the denominator shows the number of digits after the decimal point.

$$\frac{7}{10} = 0.7$$

$$\frac{7}{100} = 0.\underline{07}$$

**Q.** Write  $\frac{15}{100}$  as a decimal. **A. 0.15** 

- Which of these decimal numbers equals  $\frac{5}{10}$ ?
  - A) 1.5 B) 1.05 C) 0.5

five tenths

- **b)** Which of these decimal numbers equals  $\frac{2}{10}$ ?
- A) 2 B) 0.2 C) 2.0

- c) Which of these decimal numbers equals  $\frac{35}{100}$ ?

  - A) 3.05 B) 3.5 C) 0.35

- d) Write  $\frac{6}{10}$  as a decimal. e) Write  $\frac{1}{10}$  as a decimal. f) Write  $\frac{8}{100}$  as a decimal.

Decimal	Fraction	
	7	
	10	

**k)** Complete the table.

Deci mal	Fraction
	13
	100

I) Complete the table.

Deci mal	Fraction
	403
	1000

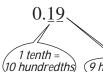

### **Skill 11.4** Writing a decimal number as a fraction.

- From left to right (ignoring zeros and the decimal point) write the digits as the numerator.
- Use the place value of the last digit of the decimal number to determine the size of the denominator. (see skill 11.3, page 75)
- **Q.** Write 0.19 as a fraction.

Write 19 at the top of the fraction. The nine is in the hundredths place. Write 100ths as the denominator.

Said as:  $\frac{19}{100}$  "nineteen hundredths"

(9 hundredths)

Write 0.5 as a fraction. a)

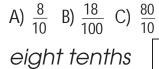

**b)** Write 0.9 as a fraction.

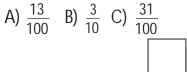

c) Write 0.7 as a fraction.

d) Which of these fractions equals 0.8?

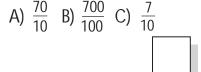

e) Which of these fractions equals 0.13?

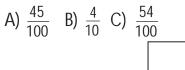

Which of these fractions equals 0.23?

A) 
$$\frac{3}{10}$$
 B)  $\frac{2}{100}$  C)  $\frac{23}{100}$ 

g) Which of these fractions equals 0.7?

h) Which of these fractions equals 0.45?

Which of these i) fractions equals 0.05?

A) $\frac{5}{10}$	B) $\frac{5}{100}$ C	$\frac{50}{100}$

Write 0.3 as a fraction. j)

**k)** Write 0.07 as a fraction.

Write 0.41 as a fraction. I)

n) Write 0.006 as a fraction. o) Write 0.057 as a fraction.

**p)** Complete the table.

Decimal	Fraction
0.43	

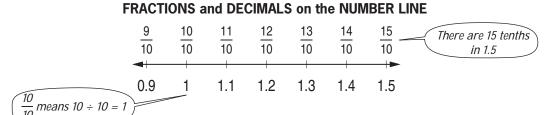

**q)** Complete the table.

Decimal	Fraction
0.06	

r) Complete the table.

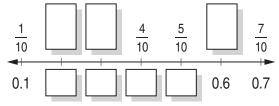

Decimal	Fraction
0.052	

### **Skill 11.5** Converting between fractions and decimals using a number line.

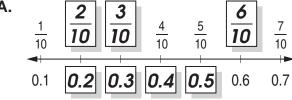

- Start from the left to complete the number line.
- Use the place value of the last digit of the decimal number to determine the size of the denominator of the fraction above. (see skill 11.3, page 75)

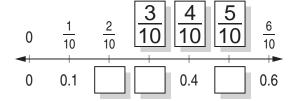

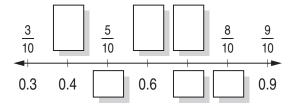

A.

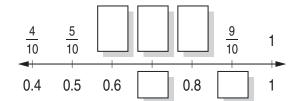

Complete the number line.

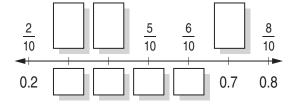

**b)** Complete the number line.

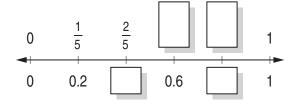

Complete the number line.

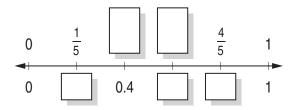

d) Complete the number line.

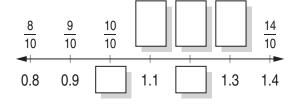

Complete the number line.

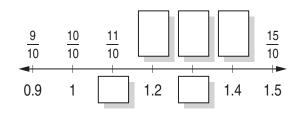

Complete the number line.

Complete the number line.

h) Complete the number line.

### **Skill 11.6** Writing a mixed number as a decimal number.

When the denominator is a power of 10:

- Write the whole number first.
- Write the decimal point.
- Write the fraction as a decimal number. (see skill 11.3, page 75)

Example: Write the 8 in the hundredths place. (hundredths Use zeros as Decimal point place holders Work backwards filling in the 4.

> Hint: The number of zeros in the denominator shows the number of digits after the decimal point.  $\frac{16}{1000} = 0.016$

When the denominator is not a power of 10:

Divide the numerator by the denominator.

**Q.** Write the mixed number  $8\frac{24}{100}$  as a decimal.

Read as: Eight and twenty-four hundredths

Write the whole number, 8 units.

Write the decimal point.

Write the numerator 24, with the last digit 4 in the hundredths place.

[No zero place holders are necessary.]

a) Write the mixed number  $5\frac{7}{10}$  as a decimal.

5 and 7 tenths =

**b)** Write the mixed number  $2\frac{46}{100}$  as a decimal.

c) Write the mixed number  $3\frac{9}{10}$  as a decimal.

- d) Write the mixed number e) Write the mixed number f)  $3\frac{2}{100}$  as a decimal.
- $6\frac{3}{10}$  as a decimal.
- Write the mixed number  $3\frac{1}{2}$  as a decimal.
- g) Write the mixed number h) Write the mixed number i)  $2\frac{1}{5}$  as a decimal.
  - $4\frac{1}{2}$  as a decimal.
- Write the mixed number  $3\frac{3}{5}$  as a decimal.

### **Skill 11.7** Converting fractions in word form to decimals.

Use 1 x 10 grids to visualise whole numbers and tenths.

a half = 5 tenths = 0.5

Use 10 x 10 grids to visualise whole numbers and hundredths.

a quarter = 25 hundredths = 0.25

Q. Write as a decimal: three quarters.

= 0.75

a) Write as a decimal: one and a half

one & 5 tenths =

**b)** Write as a decimal: three and a half

c) Write as a decimal: eight and a half

d) Write as a decimal: one quarter

e) Write as a decimal: four and a quarter

f) Write as a decimal: seven and a quarter

g) Write as a decimal: five and three quarters h) Write as a decimal: one and three quarters i) Write as a decimal: six and three quarters

#### **Skill 11.8** Writing an improper fraction as a decimal.

When the denominator is a power of 10:

- Divide the numerator by 10, 100 or 1000 by moving the decimal point the same number of places to the left as there are zeros. Examples:
- ÷ by 10 (1 zero ⇒ 1 place left) ÷ by 100 (2 zeros ⇒ 2 places left)  $0.16.0 \Rightarrow 0.16$

Hints: Fractions are just divisions.

There is a decimal point and zeros which are not written, at the end of any whole number.

The number does not change: 16 = 16.0

Example: 
$$\frac{16}{10} = 16 \div 10$$
  
=  $16.0 \div 10$   
=  $16.0 \div 10$   
=  $16$ 

When the denominator is **not** a power of 10:

Multiply both the numerator and denominator by the same number to make the denominator a power of 10. Example:

$$\frac{74}{50} = \frac{74}{50} \times \frac{2}{100} = \frac{148}{100}$$
 power of 10

Then divide by moving the decimal point.

Example: 
$$\frac{148}{100} = 148 \div 100$$
  
=  $148.0 \div 100$   
= 1.48

- **Q.** Write the improper fraction  $\frac{12}{5}$  as a decimal.
- **A.**  $\frac{12}{5}^{2} = \frac{24}{10}$  $= 24.0 \div 10$  $= 2\widehat{4.0} \div 10$

Multiply the denominator and the numerator by 2 to make the denominator a power of 10.

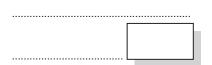

a) Write the improper fraction  $\frac{27}{10}$  as a decimal.

**b)** Write the improper fraction  $\frac{15}{10}$  as a decimal.

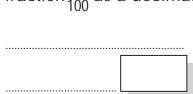

**c)** Write the improper fraction  $\frac{38}{10}$  as a decimal.

**d)** Write the improper fraction  $\frac{136}{100}$  as a decimal.

e) Write the improper fraction  $\frac{245}{100}$  as a decimal.

f) Write the improper fraction  $\frac{8}{5}$  as a decimal.

- Write the improper h) fraction  $\frac{11}{2}$  as a decimal. Write the improper
- Write the improper fraction  $\frac{9}{2}$  as a decimal. Write the improper fraction  $\frac{9}{5}$  as a decimal. **h)** Write the improper
  - fraction  $\frac{9}{5}$  as a decimal.

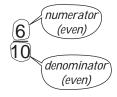

### Skill 11.9 Writing a decimal number as a fraction in simplest form.

MM5 11 22 33 44 MM6 11 22 33 44

- Write the decimal as a fraction with a power of 10 as the denominator.
- Decide if the fraction can be simplified.

If both numbers, top (numerator) and bottom (denominator), can be divided by the same number then the fraction can be simplified.

Hint: If the numbers are both even then you can start with dividing by 2.

• Divide both the numerator and the denominator by the same number.

$$\frac{6}{10}_{\div 2}^{\div 2} = \frac{3}{5}$$

- **Q.** Write 0.02 as a fraction in simplest form.
- **A.**  $0.02 = \frac{2}{100}$   $\frac{2}{100} = \frac{1}{100}$

--- Write 0.02 as a fraction over 100.

Divide the numerator and the denominator by 2.

**a)** Write 0.4 as a fraction in simplest form.

= 
$$\frac{4}{10}$$
 ÷ 2

<u>2</u> 5 b) Write 0.75 as a fraction in simplest form.

c) Write 0.8 as a fraction in simplest form.

**d)** Write 0.2 as a fraction in simplest form.

e) Write 0.15 as a fraction in simplest form.

f) Write 0.36 as a fraction in simplest form.

g) Write 0.5 as a fraction in simplest form.

h) Write 0.45 as a fraction in simplest form.

i) Write 0.06 as a fraction in simplest form.

j) Write 0.62 as a fraction in simplest form.

Write 0.88 as a fraction in simplest form.

Write 0.12 as a fraction in simplest form.

=

# Skill 11.10 Converting between fractions, decimals and percentages by using diagrams (1).

### **Fraction as Percentage**

• Find the equivalent fraction which has a denominator of 100.

Hint: Percent means "fraction of one hundred".

Example: One quarter = 25 out of 100

$$= \frac{25}{100}$$
$$= 25\%$$

### Decimal as percentage

- Move the decimal point 2 places to the right.
- Use zeros as place holders to write the decimal.
- Add the percentage sign.

Example: 0.5 = 0.5000 = 50%

### Percentage as Fraction

Hint: Percent means "fraction of one hundred".

Examples: 50% = 50 out of 100

Examples: 75% = 75 out of 100

### Percentage as decimal

- · Remove the percent sign.
- Place the decimal point after the number.
- Move the decimal point 2 places to the left.
- Use zeros as place holders to write the decimal.

Example: 9% = 9.00 = 0.09

- Q. Write 50% in decimal form.
- **A.** 50%
  - = 050.0
  - = 050.0
  - = **0.5**

Remove the % sign.

Place the decimal point and add zeros either side of the number.

Move the decimal point 2 places to the left.

a) One half is what percentage?

50 %

**b)** Three quarters is what percentage?

%

c) Six tenths is what percentage?

%

d) Nine tenths is what percentage?

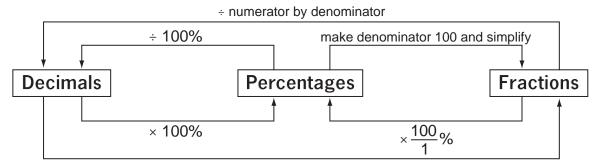

%

# 12. [Place Value]

### **Skill 12.1** Understanding the place value of a digit in a number (1).

 Compare the position of the digit to the position of the decimal point.
 Hint: There is a decimal point which is not written, at the end of any whole number.

Place value	thousands	hundreds	tens	units	tenths	hundredths	thousandths
	1	0	2	5 .	, 7	6	3

**Q.** In the number 5893 which of the digits 5, 8, 9 or 3 lies in the hundreds column?

### A. 8

The digit three places to the left of the decimal point is in the hundreds place. So 8 is in the hundreds column.

a) Name the place of the underlined digit in the number 798. [Hint: Is it units, tens or hundreds?]

b) Name the place of the underlined digit in the number 284. [Hint: Is it units, tens or hundreds?]

c) Name the place of the underlined digit in the number 497. [Hint: Is it units, tens or hundreds?]

d) Name the place of the underlined digit in the number 925. [Hint: Is it units, tens or hundreds?]

e) In the number 210 which of the digits 2, 1 or 0 lies in the tens column? f) In the number 3472 which of the digits 3, 4, 7 or 2 lies in the hundreds column?

g) In the number 2006 which of the digits 2, 0 or 6 lies in the thousands column?

h) In the number 2301 which of the digits 2, 3, 0 or 1 lies in the units column?

i) In the number 3447 which of the digits 3, 4 or 7 lies in the thousands column? j) In the number 564.2 which of the digits 5, 6, 4 or 2 lies in the units column?

k) In the number 7210 which of the digits 7, 2, 1 or 0 lies in the hundreds column?

I) In the number 15.26 which of the digits 1, 5, 2 or 6 lies in the hundredths column?

Finding the value of a digit in a number.

**Skill 12.2** 

# Skill 12.3 Comparing whole numbers.

- Compare the size of the digits in the same place, one at a time.
- Work from left to right across each number.
- **Q.** Which number is greater? 1346 or 1364?

### A. 1364

### **Thousands:**

Both numbers have the digit 1 in the thousands place.

### **Hundreds:**

Both numbers have the digit 3 in the hundreds place.

### Tens:

In the tens place 6 is greater than 4. So 1364 is greater than 1346.

**a)** 535 > 553 True or false?

false

**b)** 364 < 463 True or false?

**c)** 677 < 766 True or false?

**d)** 221 > 212 True or false?

- **e)** 4014 > 4104 True or false?
- 5646 < 6546 f) True or false?

**g)** 59054 < 59504 True or false?

**h)** 32 323 > 32 332 True or false?

Which number is smaller? i) 232 or 223

Which number is smaller? i) 125 or 152

**k)** Which number is greater? 788 or 778

Which number is smaller? I) 7557 or 7575

m) Which number is greater? 2113 or 2131

n) Which number is smaller? 7437 or 7374

**o)** Which number is smaller? 13 094 or 13 904

p) Which number is greater? 40 454 or 40 554

# **Skill 12.4** Ordering whole numbers. Compare the size of the digits in the same place, one at a time. Work from left to right across each number. **Q.** Place in order from largest to smallest: A. 309, 308, 302, 300, 298 300, 298, 308, 302, 309 **Hundreds:** 300 is larger than 200. Tens: All four numbers starting with 3 have zero in the tens place. Units: The four numbers starting with 3 have the digits 0, 8, 2 and 9 in the units place. Ordering from largest to smallest gives 9, 8, 2, and 0. So far in order we have 309, 308, 302, 300. Then place 298. Place in order from largest to smallest: **b)** Place in order from smallest to largest: 25, 75, 22, 72, 57 78, 87, 83, 37, 77, 38 75, 72, 57, 25, 22 Place in order from largest to smallest: d) Place in order from smallest to largest: 12, 42, 24, 14, 22, 44 46, 54, 34, 55, 45, 35 Place in order from largest to smallest: Place in order from smallest to largest: f) 768, 786, 776, 787, 777 456, 546, 465, 564, 556 **g)** Place in order from largest to smallest: **h)** Place in order from smallest to largest: 3001, 3020, 3030, 2300 1011, 1101, 1001, 1111

i)

Place in order from largest to smallest:

9015, 9501, 9105, 9510

j)

Place in order from smallest to largest:

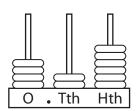

4606, 4066, 6046, 4640

# Skill 12.5 Writing decimal numbers illustrated by an abacus showing place values.

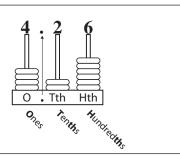

- · Count the discs in each column.
- Put the decimal place in position.
- Write the digits in the appropriate places to form a number.

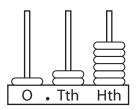

**Q.** Write the decimal number.

A. 4.26

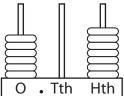

a) Write the decimal number.

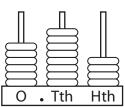

1.26

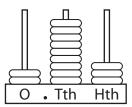

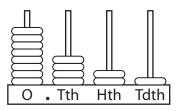

c) Write the decimal number.

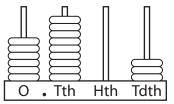

d) Write the decimal number.

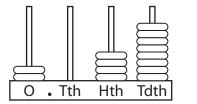

e) Write the decimal number.

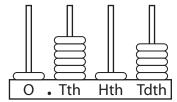

f) Write the decimal number.

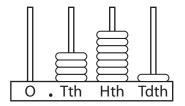

a) Write the decimal number.

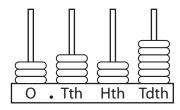

h) Write the decimal number.

i) Write the decimal number.

j) Write the decimal number.

### Authorised for the use of: MAITLAND HIGH SCHOOL 2016 **Skill 12.6** Comparing decimal numbers. Line up the decimal numbers at their decimal points. Compare digits in their same place values, starting from the left. A. 4.30 **Q.** Which number is greater? 4.30 or 4.03 **Units:** They are both 4. **Tenths:** 3 is greater than 0. OR 3 > 0Therefore 4.30 is greater than 4.03 **Q.** 3.6 < 3.07A. false True or false? Remember '<' means 'less than'. **Units:** They are both 3. **Tenths:** 6 is greater than 0. OR 6 > 0Therefore 3.6 is not less than 3.07 and the statement is false. a) Which number is greater? **b)** Which number is smaller? 6.38 6.38 or 6.3 15.4 or 15.42 c) Which number is greater? d) Which number is smaller? 2.2 or 2.22 13.88 or 13.78 e) Which number is greater? Which number is smaller? 12.23 or 12.32 1.7 or 1.07 g) Which number is smaller? h) Which number is greater? 13.094 or 13.9 0.859 or 0.895 4.2 > 4.221.5 < 1.05 i) j) True or false? True or false? **k)** 389.9 < 400 24.3 > 24.33 I) True or false? True or false?

Skill 12.11 Rounding decimal numbers to a given place.

#### Skill 12.12 Estimating outcomes by rounding decimals to whole numbers.

If the digit to the right of the decimal point is

0, 1, 2, 3 or 4 - round down

- keep the digit in the units place unchanged.

5, 6, 7, 8 or 9 - round up

- add 1 to the digit in the units place.

• Leave off all digits after the decimal point.

#### **ROUNDING RULE**

< 5 Round down

≥ 5 Round up

≈ approximately equals

Q. Estimate the total cost by rounding to the nearest dollar: \$15.25 + \$3.10 + \$4.80 + \$6.95

to

**A.** \$15.25 + \$3.10 + \$4.80 + \$6.95 ≈ \$15 + \$3 + \$5 + \$7

= \$30

Round each dollar value, then add to estimate the total cost.

a) Estimate the sum of 5.4 and 8.7 by rounding to the nearest whole number before adding.

b) Estimate the difference between 9.3 and 6.8 by rounding to the nearest whole number before subtracting.

5.4 + 8.7

 $\approx 5 + 9$ 

= | 14

**≈** 

=

c) Estimate the difference between 22.8 and 12.9 by rounding to the nearest whole number before subtracting.

d) Estimate the sum of 7.6 and 6.2 by rounding to the nearest whole number before adding.

≈ =

≈ =

e) Estimate the perimeter of a rectangular yard with a length of 4.7 m and a width of 8.2 m by rounding to the nearest metre.

f) Estimate the difference between 6.7 and 2.03 by rounding to the nearest whole number before subtracting.

≈ = m

≈ =

g) Estimate the total cost by rounding to the nearest dollar: \$10.30 + \$5.15 + \$8.95 + \$6.25

h) Estimate the total cost by rounding to the nearest dollar:

\$24.95 + \$9.85 + \$3.15 + \$12.35

≈ = \$

≈ = \$

## 13. [Operations]

#### Using the commutative property for addition.

**COMMUTATIVE PROPERTY for +** 

$$2 + 5 = 7$$

$$5 + 2 = 7$$

You can add numbers in any order and not change the outcome.

$$2 + 5 = 5 + 2$$

**Q.** 6 + 3 = 3 + 6

True or false?

A. true

Solve both sides of the equation and compare the results.

$$6 + 3 = 9$$

$$3 + 6 = 9$$

The results are the same.

a) 10 - 4 = 4 - 10

True or false?

**b)** 
$$4 + 5 = 5 + 4$$

True or false?

c) 
$$7 + 9 = 9 + 7$$

True or false?

$$10 - 4 = 6$$
 but

**d)** 9 - 3 = 3 - 9

True or false?

**e)** 
$$2 + 9 = 9 + 2$$

True or false?

f) 
$$8-1=1-8$$

True or false?

- +2 = 2 + 8

- +5 = 5 + 2
- +7 = 7 + 5
- **I)** 3 + 9 =

- + 13 = 13 + 6 **n)** 17 + 10 =+ 17
- **o)** 11 + 19 =

- +22 = 22 + 14
- - + 17 = 17 + 12 **r)** 15 + 18 =

- = 31 + 1313 +
- + 16 = 16 + 28
- **u)** 27 +

#### Using the commutative property for multiplication.

#### COMMUTATIVE PROPERTY for ×

$$2 \times 5 = 10$$

You can multiply numbers in any order and not change the outcome.  $5 \times 2 = 10$ 

SO  $2 \times 5 = 5 \times 2$ 

$$\mathbf{Q.} \qquad \mathbf{\times} \ 5 = 5 \times 9$$

A. 9 Ask: "What number multiplied by 5 equals

5 multiplied by 9?"

Answer:  $9 \times 5 = 5 \times 9$ 

a) 
$$10 \div 2 = 2 \div 10$$
  
True or false?

**b)**  $4 \times 5 = 5 \times 4$ True or false? c)  $7 \times 9 = 9 \times 7$ True or false?

$$10 \div 2 = 5 \text{ but}$$

 $2 \div 10 \neq 5$ false

d) 
$$9 \div 3 = 3 \div 9$$
  
True or false?

**e)**  $6 \times 7 = 7 \times 6$ True or false? f)  $12 \div 4 = 4 \div 12$ True or false?

g) 
$$8 \times 2 = 2 \times 8$$

$$\times 5 = 5 \times 2$$
 i)  $4 \times 1 =$ 

**m)** 
$$11 \times 3 = \times 11$$

**n)** 
$$\times 6 = 6 \times 18$$

**q)** 
$$\times 24 = 24 \times 17$$

$$\times 24 = 24 \times 17$$
 **r)**  $13 \times 15 =$   $\times 13$ 

s) 
$$\times 5 = 5 \times 4$$

t) 
$$11 \times | = 10 \times 11$$

**u)** 
$$\times 16 = 16 \times 7$$

#### Skill 13.3 Recognising the identity element for addition.

#### **IDENTITY ELEMENT for + is ZERO**

The sum of zero and any number is that number.

- **Q.** + 0 = 2
- **A. 2** Ask:

"What number added to zero makes 2?"

Answer: 2 + 0 = 2

a) 10 + 0 = 10True or false?

\_

**b)** 6 + 0 = 0

True or false?

**c)** 0 + 7 = 7

True or false?

d)	0 + 8	8 = 8
d)	0 + 8	8 = 8

True or false?

true

**e)** 3 - 0 = 0

True or false?

f) 9 - 0 = 9

True or false?

g)	8	+ 0 = 8
	_	

**h)** 
$$+ 0 = 5$$

i) 3 + 0 =

**k)** 
$$2 -$$
 = 0

- m) Which expression equals 7?
  - A) 0 + 7
  - B)  $0 \times 7$
  - C) 0 7
- n) Which expression equals 8?
  - A) 0 × 8
  - B) 0 8
  - C) 0 + 8
- o) Which expression equals 5?
  - A) 1 + 5
  - B)  $1 \times 5$
  - C) 1 5

- **p)** Which expression equals 3?
  - A) 3 + 0
  - B) 0 3
  - C)  $3 \times 0$
- **q)** Which expression equals 4?
  - A) 1 + 4
  - B) 1 4
  - C)  $1 \times 4$

- r) Which expression equals 6?
  - A)  $6 \times 0$
  - B) 0 6
  - C) 6 + 0

# Skill 13.4 Recognising the identity element for multiplication.

#### **IDENTITY ELEMENT for × is ONE**

The product of one and any number is that number.

- **Q.**  $\times 1 = 8$
- A. 8
- Ask: "What n

"What number multiplied

by 1 makes 8?"

Answer:  $8 \times 1 = 8$ 

- **Q.** Which expression equals 13?
  - A) 1 + 13
  - B)  $1 \times 13$
  - C) 1 ÷ 13

A. *B* 

Solve all expressions and then compare the results.

- A)  $1 + 13 \neq 13$
- B)  $1 \times 13 = 13$
- C)  $1 \div 13 \neq 13$

a)  $6 \times 1 = 6$ True or false?

**d)**  $9 \times 1 = 9$ 

True or false?

**b)**  $1 \times 4 = 4$  True or false?

c)  $1 \times 1 = 2$ True or false?

true

True or false?

x 1 = 2

$$\mathbf{k)} \quad 4 \div \boxed{\phantom{a}} = 4$$

- m) Which expression equals 4?
  - A) 1 × 4
  - B) 1 + 4
  - C)  $1 \div 4$

- n) Which expression equals 5?
  - A) 1 + 5
  - B) 1 ÷ 5
  - C)  $1 \times 5$
- o) Which expression equals 12?
  - A) 1 + 12
  - B)  $1 \div 12$
  - C)  $1 \times 12$

- p) Which expression equals 6?
  - A) 1 ÷ 6
  - B) 1 6
  - C)  $1 \times 6$
- **q)** Which expression equals 10?
  - A) 1 ÷ 10
  - B)  $10 \times 1$
  - C) 10 + 1

- r) Which expression equals 17?
  - A) 17 × 17
  - B) 17 ÷ 1
  - C) 1 + 17

#### Skill 13.5 Using 'order of operations' involving + and/or - and x and/or +

#### Only + and/or -

 Add (+) and/or subtract (-) from left to right.

#### Only × and/or ÷

 Multiply ( x ) and/or divide ( ÷ ) from left to right.

**Q.** 
$$8 - 2 - 5 + 6 =$$

**A.** 
$$8-2-5+6=$$
  
=  $6-5+6$   
=  $1+6$   
= **7**

Start with 8 and subtract 2.

The result is 6.

Then subtract 5 from 6.

The result is 1.

Finally add 6 to the 1.

**b)** 
$$6 + 5 - 3 =$$

**c)** 
$$14 - 7 - 6 =$$

**d)** 
$$7 - 5 + 9 =$$

**e)** 
$$19 - 8 + 1 =$$

f) 
$$16 - 2 + 5 =$$

**g)** 
$$4 + 6 + 3 =$$

**h)** 
$$13 - 7 - 4 =$$

i) 
$$5 + 8 - 9 =$$

$$\mathbf{j}$$
)  $6 + 5 + 1 - 2 =$ 

$$= 11 + 1 - 2$$

**k)** 
$$8 - 4 + 3 + 2 =$$

1) 
$$9 + 7 - 5 - 1 =$$

**m)** 
$$7 + 3 + 5 - 6 =$$

**n)** 
$$5 - 2 + 7 - 5 =$$

**p)** 
$$2 \times 5 \times 3 =$$

$$= 10 \times 3 \qquad = \qquad 30$$

**q)** 
$$5 \times 3 \div 3 =$$

r) 
$$16 \div 4 \div 2 =$$

s) 
$$5 \times 4 \div 4 =$$

t) 
$$18 \div 6 \div 3 =$$

**u)** 
$$7 \times 2 \div 7 =$$

v) 
$$4 \times 2 \times 2 =$$

**w)** 
$$2 \times 9 \div 6 =$$

**x)** 
$$20 \div 5 \div 2 =$$

#### Skill 13.6 Identifying inverse operations + / - and $\times / +$

#### INVERSE OPERATIONS + and -

$$+5-5=0$$

Subtraction of a number undoes addition of that same number.

Example: 17 + 5 - 5 = 17 + 0 = 17

because adding 5 and then subtracting 5 gives 0.

#### INVERSE OPERATIONS × and ÷

$$\times$$
 8 ÷ 8 = 1

Division by a number undoes multiplication by that same number.

Example:  $6 \times 8 \div 8 = 6 \times 1 = 6$ 

because multiplying by 8 and then

dividing by 8 gives 1.

• Keep the number unchanged when it is followed by two inverse operations applied to the same number.

**Q.** 
$$24 + 9 - 9 =$$

**A.** 
$$24 + 9 - 9 =$$
  
=  $24 + 0$   
= **24**

Subtracting 9 undoes adding 9 OR

+ 9 and – 9 cancel each other. 24 remains unchanged.

cancel each other 
$$43 + 12 - 12 =$$

**b)** 
$$31 - 6 + 6 =$$

c) 
$$17 + 3 - 3 =$$

**d)** 
$$15 + 8 - 8 =$$

f) 
$$24 - 7 + 7 =$$

**g)** 
$$20 + 13 - 13 =$$

**h)** 
$$18 - 9 + 9 =$$

i) 
$$21 - 10 + 10 =$$

(cancel each other) 
$$20 \div 4 \times 4 = 0$$

**k)** 
$$14 \times 2 \div 2 =$$

1) 
$$25 \div 5 \times 5 =$$

**m)** 
$$16 \times 4 \div 4 =$$

**n)** 
$$45 \times 2 \div 2 =$$

**o)** 
$$32 \div 8 \times 8 =$$

**p)** 
$$9 \times 7 \div 7 =$$

**q)** 
$$18 \times 3 \div 3 =$$

**r)** 
$$24 \div 6 \times 6 =$$

## Skill 13.7 Using 'order of operations' involving single x or + and + or -

- Use the order of operations rules: First multiply ( × ) or divide ( ÷ ). Finally add ( + ) or subtract ( ).
- **Q.**  $6 + 12 \div 3 =$

**A.**  $6 + 12 \div 3 =$  first divide = 6 + 4 then work from left to right = 10

First do 12 divided by 3. The result is 4.

Then add 6 and 4.

- a)  $21 \div 3 2 =$  = 7 2 = 5
- **b)** 4 + 3 × 3 = = =
- c) 6 × 2 + 8 = = =

- d) 15 ÷ 5 2 =
  = = =
- **e)** 2 × 5 − 4 = = =
- f) 6 + 3 × 5 =
  = = =

- g) 6 + 9 ÷ 3 =
  = = =
- **h)** 18 ÷ 2 + 4 = = = =
- i) 3 × 4 + 7 =
  = = =

- j) 13 3 × 3 = = = =
- **k)** 4 × 4 7 = = = =

- m) 21 ÷ 7 1 =
  = = =
- **n)** 8 + 12 ÷ 4 = = =
- o) 15 5 × 2 =
  = = =

- **p)** 18 12 ÷ 2 = = = =
- **q)** 16 ÷ 4 + 4 = = = = =

- s) 8 + 28 ÷ 4 = = =
- **t)** 9 × 6 − 3 = = =
- u) 24 12 ÷ 4 =
  = = =

#### **Skill 13.8** Using 'order of operations' involving brackets ()

Use the order of operations rules:

First evaluate inside the brackets.

Then multiply ( $\times$ ) and/or divide ( $\div$ ) from left to right. Finally add ( + ) and/or subtract ( - ) from left to right.

**Q.**  $9 + 12 \div (9 - 5) =$ 

A.  $9 + 12 \div (9 - 5) =$  $= 9 + 12 \div 4$  first brackets - 0 + 3 then divide = 9 + 3

then work from left to right

Simplify inside the brackets and subtract 5 from 9.

The result is 4.

Then divide 12 by 4.

The result is 3.

Finally add 9 and 3.

a)  $7 \times (4 - 2) =$ 

 $=7\times2$ 14 **b)** 9 - (4 + 3) =

c) 7 - (5 - 2) =

**d)** 10 - (9 - 2) =

**e)**  $(4 + 4) \times 3 =$ 

f)  $15 \div (5-2) =$ 

g)  $7 \times (6 - 2) =$ 

**h)**  $(18 + 6) \div 3 =$ 

i)  $28 \div (1+6) =$ 

j)  $5 \times (11 - 8) =$ 

**k)**  $(13 - 7) \div 2 =$ 

1)  $42 \div (5 + 2) =$ 

**m)**  $(12 - 7) \times 4 =$ 

**n)**  $(5 + 8) \times 2 =$ 

o)  $(12 - 9) \times 5 =$ 

**p)**  $8 + (5 + 1) \div 2 =$ 

 $= 8 + 6 \div 2$ 

= 8 + 3 = 11 **a)** 14 - 6 - (5 + 3) =

r)  $15 \div 3 - (2 + 2) =$ 

s)  $9 + (7 - 4) \times 3 =$ 

t)  $18 \div (9 - 3) + 2 =$ 

**u)**  $9 + 3 \times (8 - 4) =$ 

# 14. [Exploring Numbers]

Sk	ill 14.1 Expressing word nu	mbers in n	umera	als. MM5 11 22 33 44 MM6 11 22 33 44					
Rul	Rule 1: Leave a space, or put a comma, between the thousands and the hundreds.  2: Write a zero in any place that is left empty between other digits.								
Q.	Express in numerals: Eighteen thousand, seven hundred and two.	A. 1870	02	Tens of thousands   Hundreds   Tens   Units   1   8   7   0   2					
	nanarea ana two.			The digits 1 and 8, 7 and 2 will be in the number.  Numbers read from left to right so start with 18 thousand. The last digit of this number goes in the thousands position.  The seven goes in the hundreds position. There is no ten, so put a 0.  Write 2 as the unit.					
a)	Express in numerals: Six thousand, three hundred fifty-four.	and 6354	b)	Express in numerals: Two hundred and eighteen.					
c)	Express in numerals: Nine hundred and twenty-sev	ren.	d)	Express in numerals: Eight thousand, four hundred and six.					
e)	Express in numerals: Three thousand and thirteen.		f)	Express in numerals: Seven thousand and eight.					
g)	Express in numerals: Eighty thousand.		h)	Express in numerals: Seventy thousand, nine hundred.					
i)	Express in numerals: Sixteen thousand, two hundre three.	ed and	j)	Express in numerals: Ninety-six thousand.					
k)	Express in numerals: Four hundred thousand.		I)	Express in numerals: Five hundred thousand and one.					

#### Skill 14.2 Writing 2-digit numbers in words. General Rules for writing a number in words Rule 1: Consider one digit at a time starting from the left. 2: First write the word for the digit (unless it is a 0). Next write the place of the digit. Exceptions for 2-digit numbers Multiples of 10 have their own words: 10 ten 20 twenty 30 thirty 50 fifty 40 forty 60 sixty 70 seventy 80 eighty 90 ninety For the numbers 11 to 19 use: 11 eleven 12 twelve 13 thirteen 14 fourteen 15 fifteen 16 sixteen 17 seventeen 18 eighteen 19 nineteen For all numbers 21 to 99 use a hyphen (-) to separate the word for the tens from the word for the units. **Q.** Write the number 27 in words. A. twenty-seven **Places** Tens of Thousands | Hundreds | Tens | Units thousands 2 7 Starting from the left the 2 is in the tens position. As a multiple of 10 it has its own word and is written as 'twenty'. The next digit 7 is written as 'seven'. 27 is between 21 and 99, so it has a hyphen '-' when written in words. Write the number 35 in words. Write the number 82 in words. a) thirty-five Write the number 69 in words. Write the number 16 in words. Write the number 23 in words. Write the number 74 in words. f) Write the number 11 in words. h) Write the number 48 in words. g)

## Rule 1: Consider one digit at a time starting from the left. 2: First write the word for the digit (unless it is a 0). Next write the place of the digit. 3: Always write 'hundred' not 'hundreds'. 4: Place the word 'and' after the word 'hundred' if other values follow. AND Consider the rules for 2-digit numbers on page 108. Q. Write the number 943 in words. A. nine hundred and forty-three **Places** Tens of Thousands | Hundreds | Tens | Units | thousands 9 3 Start from the left. The 9 is in the hundreds position so write 'nine hundred'. Include 'and' as other values follow. The next digit is 4. It is in the tens position so it is written as 'forty'. The 3 is a unit and written as 'three'. 43 is between 21 and 99, so it has a hyphen '-' when written in words. Write the number 610 in words. **b)** Write the number 800 in words. six hundred and ten Write the number 400 in words. d) Write the number 160 in words. Write the number 290 in words. Write the number 738 in words. f) Write the number 657 in words. h) Write the number 901 in words. g) Write the number 306 in words. Write the number 582 in words. i) j)

**Skill 14.3** 

Writing 3-digit numbers in words.

#### Skill 14.4 Writing 4-digit numbers in words.

Rule 1: Consider one digit at a time starting from the left.

- 2: First write the word for the digit (unless it is a 0). Next write the place of the digit.
- 3: Always write 'thousand' not 'thousands' and 'hundred' not 'hundreds'.
- 4: Place the word 'and' after the word 'thousand' if there are no hundreds.
- 5: Place the word 'and' after the word 'hundred' if other values follow.

AND Consider the rules for 2-digit numbers on page 108.

Q.	Write	the	number	2610	in	words.
----	-------	-----	--------	------	----	--------

# A. two thousand, six hundred and

	Plac	CAS		
Tens of thousands	Thousands		Tens	Units
	2	6	7	0

Start from the left. The 2 is in the thousands position so write 'two thousand'.

The 6 is in the hundreds position so write 'six hundred'. Include 'and' as other values follow.

The next two digits are 1 and 0 in the tens and units places. They are written as 'ten'.

a)	Write the	number	3018	in	words.

### Skill 14.6 Finding the multiples of a number.

• Count by the number, i.e. add the number to itself continuously.

OR

- Multiply the number by 1, then 2, 3, 4, 5, etc. to get the multiples in order.
- **Q.** Complete the next two multiples of 7.

7, 14, 21, \_\_\_\_, \_\_\_

**A.** 7, 14, 21, **28**, **35** 

Add 7 to the previous number.

$$21 + 7 = 28$$

28 + 7 = 35

a) Complete the next two multiples of 2.

2, 4, 6, 8, 10, **12** , **14** 

**b)** Complete the next two multiples of 3.

3, 6, 9, 12, \_ ,

c) Complete the next two multiples of 11.

11, 22, 33,

d) Complete the next two multiples of 8.

8, 16, 24,

e) Complete the next two multiples of 4.

12, 16, 20,

f) Complete the next two multiples of 7.

21, 28, 35, \_ , \_

g) Complete the next two multiples of 5.

65, 70, 75,

**h)** Complete the next two multiples of 3.

18, 21, 24,

i) Complete the next two multiples of 10.

80, 90, 100,

j) Complete the next two multiples of 9.

27, 36, 45,

**k)** Complete the next two multiples of 6.

36, 42, 48, \_ , \_

I) Complete the next two multiples of 12.

36, 48, 60,

### Skill 14.7 Finding the factors of a number.

• To decide if a number is a factor of another number the first number must divide evenly into the second number, with no remainder.

Hint: A number always has at least 2 factors, 1 and the number itself.

• Use trial and error. Be systematic.

Divide 2 into the number. If 2 divides evenly then 2 and the result are factors of the number. Divide 3 into the number. If 3 divides evenly then 3 and the result are factors of the number. Divide 4 into the number. If 4 divides evenly then 4 and the result are factors of the number.

- Continue until all possibilities are exhausted.
- Q. Which number is **not** a factor of 42?3. 4 or 6
- A. 4

Divide each number into 42.

 $42 \div 3 = 14$ 

 $42 \div 4 = 10$  remainder 2

 $42 \div 6 = 7$ 

4 does not divide evenly into 42 so 4 is not a factor of 42.

a) Which number is a factor of 15? 3. 4 or 7

15 ÷ 3 = 15 ÷ 4 =

15 ÷ 7 =

**b)** Which number is **not** a factor of 14? 2, 6 or 7

c) Which number is **not** a factor of 18? 3, 4 or 6

3, 4 Or 6

d) Which number is a factor of 25? 5, 6 or 7

e) Which list has only factors of 35?

A) 1, 3, 5, 35

B) 1, 5, 7, 35

f) Which list has only factors of 22?

A) 1, 2, 4, 12,

B) 1, 2, 11, 22 .....

g) Which list has only factors of 30?

Which of the numbers 2, 3, 4, 5 and 10

A) 1, 3, 5, 15

B) 1, 10, 20, 30 .....

h) Which list has only factors of 28?

A) 1, 4, 7, 14, 28

B) 1, 2, 3, 8, 28 .....

j) Which of the numbers 3, 4, 5, 7 and 9 are factors of 2025?

are factors of 2016? are factors of 2025?

Sk	ill 14.8 Finding prime and composite nu	ımbe	ers. MM5 11 22 33 44 MM6 11 22 33 44
Q.	Which number is <b>not</b> a prime number? 2, 3, 4 or 5	A.	List the factors of each number.  2: 1, 2 3: 1, 3 4: 1, 2, 4 5: 1, 5 Only 4 has more factors than 1 and the number.
Q.	List the composite	A.	12, 14, 15, 16
	numbers between 11 and 17.		Consider each number one at a time. The only prime number is 13 so all others are composite.
a)	Which of the following is <b>not</b> a	b)	Which of the following is a composite
	composite number?		number?
	4, 5 or 6		2, 8 or 11

## **Skill 14.9** Writing 5-digit numbers in words. Rule 1: Consider one digit at a time starting from the left. 2: First write the word for the digit (unless it is a 0). Next write the place of the digit. 3: Always group the tens of thousands digit to the thousands digit using the 2-digit rules. 4: Always write 'thousand' not 'thousands' and 'hundred' not 'hundreds'. 5: Place the word 'and' after the word 'thousand' if there are no hundreds. 6: Place the word 'and' after the word 'hundred' if other values follow. AND Consider the rules for 2-digit numbers on page 108. **Q.** Write the number 15 078 in words. A. fifteen thousand and seventy-eight **Places** Tens of Thousands | Hundreds | Tens | Units thousands 1 8 Start from the left. The 1 is in the tens of thousands position and the 5 is in the thousands position so consider them together. Write 'fifteen thousand'. Include 'and' as there are no hundreds. The next digit is 7. It is in the tens position so it is written as 'seventy'. The 8 is a unit and written as 'eight'. 78 is between 21 and 99, so it has a hyphen '-' when written in words. Write the number 27006 in words. **b)** Write the number 13 000 in words. twenty-seven thousand and six Write the number 60 000 in words. d) Write the number 79 000 in words. Write the number 45 000 in words. Write the number 21 001 in words. f) e) Write the number 18004 in words. h) Write the number 10016 in words. g)

#### Skill 14.10 Writing 6-digit numbers in words.

M5 11 22 33 <mark>4</mark> M6 11 22 **3**3 4

Rule 1: Consider one digit at a time starting from the left.

- 2: First write the word for the digit (unless it is a 0). Next write the place of the digit.
- 3: Always group the hundreds of thousands digit and the tens of thousands digit to the thousands digit using the 2-digit and 3-digit rules.
- 4: Always write 'thousand' not 'thousands' and 'hundred' not 'hundreds'.
- 5: Place the word 'and' after the word 'thousand' if there are no hundreds.
- 6: Place the word 'and' after the word 'hundred' if other values follow.

AND Consider the rules for 2-digit numbers on page 108.

Q. Write the number 950 073 in wor	ords.
------------------------------------	-------

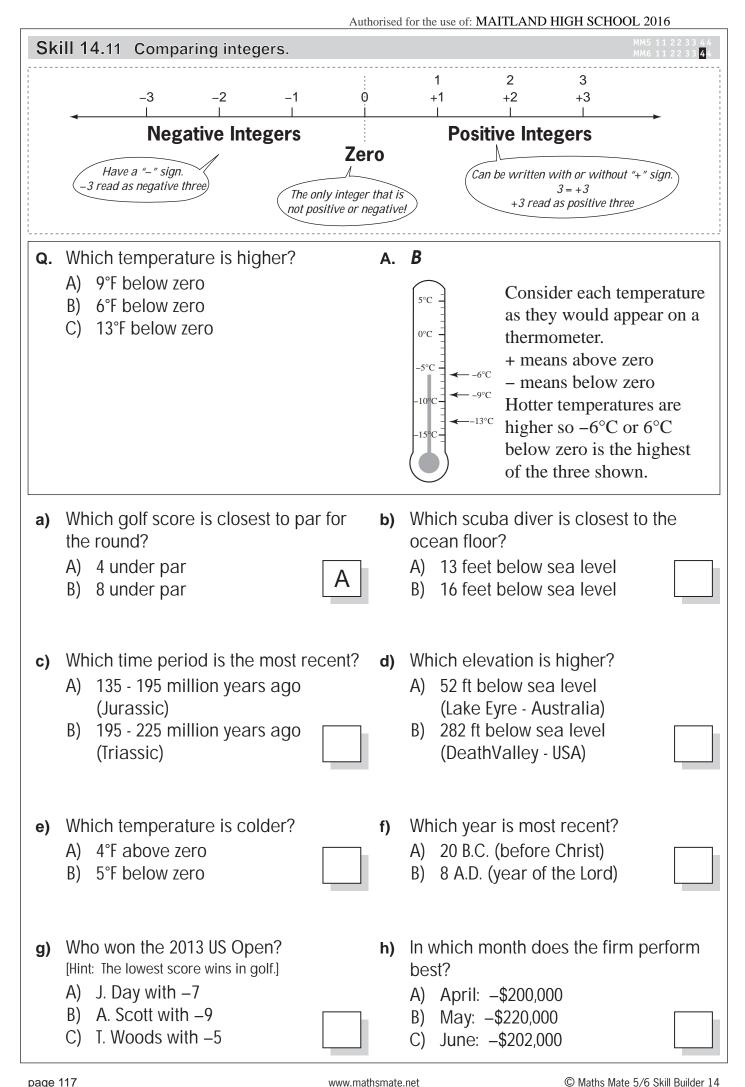

# A. nine hundred and fifty thousand and seventy-three

		Plac	CAS		
Hundreds of thousands		Thousands		Tens	Units
9	5	0	0	7	3

Start from the left. The 9 is in the hundreds of thousands position, the 5 is in the tens of thousands position and the 0 in the thousands position so consider them together. Write 'nine hundred and fifty thousand'.

Include 'and' as there are no hundreds. The next digit is 7. It is in the tens position so it is written as 'seventy'. The 3 is a unit and written as 'three'. 73 is between 21 and 99, so it has a hyphen '-' when written in words.

			hyphen - when written in words.
a)	Write the number 100 030 in words.	b)	Write the number 400 000 in words.
	one hundred thousand and thirty		
c)	Write the number 600 000 in words.	d)	Write the number 800 050 in words.
e)	Write the number 200 080 in words.	f)	Write the number 530 014 in words.
g)	Write the number 730 004 in words.	h)	Write the number 200 001 in words.

Sk	ill 14.12 Recognising positive and negati	ive i	ntegers. MM5 11 22 33 44 MM6 11 22 33 44	
•	Consider the words used with the numbers.  Positive integers would be associated with words like: above, after, deposit, over, gain, A.D. Negative integers would be associated with words like: below, before, withdraw, under, loss, B.C.  Hint: Consider zero to be ground level. Above ground is positive. Below ground is negative.			
Q.	Write as a positive or negative number: three hundred metres below sea level	A.	-300 Write the number in digits. Considering the preposition 'below' use a negative sign.	
a)	Write as a positive or negative number: a deposit of twenty dollars +20	b)	Write as a positive or negative number: on the seventh floor	
c)	Write as a positive or negative number: sixteen degrees below zero	d)	Write as a positive or negative number: ten seconds after take-off	
e)	Write as a positive or negative number: forty-two years B.C. (before Christ)	f)	Write as a positive or negative number: eight hundred metres above sea level	
g)	Write as a positive or negative number: a score of eleven over par in golf	h)	Write as a positive or negative number: a gridiron player gaining four yards	
i)	Write as a positive or negative number: a withdrawal of six dollars	j)	Write as a positive or negative number: second floor underground	
k)	Write as a positive or negative number: a deposit of twenty-five dollars	I)	Write as a positive or negative number: a score of four under par in golf	

#### Skill 14.13 Reading integers on a number line.

MM5 11 22 33 44 MM6 11 22 33 4<mark>4</mark>

- Locate zero on the scale.
- Indentify negative integers (-) or less than (<) zero and positive integers (+) or greater than (>) zero.
- **Q.** What numbers are shown at points A and B?

- **A.** A = 0 B = -6
- **Q.** Mark the following points on the number line:

A at +4 and B at -5.

- a) What numbers are shown at points A and B?

$$A = -2$$
  $B = 3$ 

**b)** What numbers are shown at points A and B?

$$A = B =$$

c) Mark the following points on the number line:

A at 0 and B at -5.

**d)** Mark the following points on the number line:

A at -1 and B at 5.

e) What numbers are shown at points A and B?

$$A = B =$$

f) What numbers are shown at points A and B?

$$A = B =$$

**g)** Mark the following points on the number line:

A at +2 and B at -4.

**h)** Mark the following points on the number line:

A at -3 and B at +3.

## 15. [Number Patterns / Equations]

# Skill 15.1 Completing number patterns by adding the same number.

- Find the number used to get from term to term.
- Find the operation used to get from term to term.

  Hint: Every number pattern is created by a rule involving numbers and operations.

**Q.** 1, 7, 13, 19, 25,

**A.** 1, 7, 13, 19, 25, <u>31</u>, <u>37</u>

Ask: "Are the numbers increasing or

decreasing?"

"How can you get from 1 to 7?"

Answer: To get from 1 to 7, add 6.

To get from 7 to 13, add 6.

To get from 13 to 19, add 6, etc.

So the rule of the pattern is:

"Add 6 to the previous number."

Apply this rule to the last given number.

25 + 6 = 31

31 + 6 = 37

a) 5, 9, 13, 17, 21, 25, 29 b)

+4 +4 +4 +4

9, 14, 19, 24, 29,

\_ \_ \_

c) 8, 11, 14, 17, 20, \_\_\_, \_\_ d)

6, 16, 26, 36, 46,

\_ ' \_

e) 3, 10, 17, 24, 31, \_\_\_, \_\_\_ f)

5, 14, 23, 32, 41,

g) 5, 11, 17, 23, 29, \_\_\_, \_\_ h)

10, 17, 24, 31, 38,

i) 44, 46, 48, 50, 52, \_\_\_, \_\_\_ j)

7, 15, 23, 31, 39,

#### **Skill 15.2** Solving equations involving addition (+)

- Rewrite the addition as an equivalent subtraction.
  - Hint: 3 + 8 = 11can also be written as 11 - 8 = 3 OR 11 - 3 = 8

OR

- Guess the value of the missing number that will make the equation true. (Both sides of the number sentence must be equal).
- Fill in this value in the equation and check the sum. Hint: If the total on the left hand side of the equation is not enough then add a larger number. If the total on the left hand side of the equation is too great then add a smaller number.
- Keep guessing and checking until the number sentence is true.

- A. ? + 7 = 1616 - 7 = ?9 = ?
- so ? = 9
- $OR \quad ? + 7 = 16$ 10 + 7 = 179 + 7 = 16

The addition can be written as an equivalent subtraction. The unknown number is 9.

Guess 10. Adding 10 gives a sum of 17 - too big so guess a smaller number.

> Guess 9. Check again.

- = 18**b)** 12 +
  - = 135+

- d)
- + 16 = 25

- = 25
- 26 += 43

- + 15 = 28j)
- + 13 = 23
- + 16 = 30

#### **Skill 15.3** Completing number patterns by subtracting the same number.

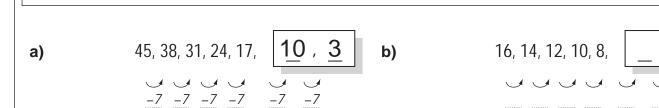

- Find the number used to get from term to term.
- Find the operation used to get from term to term. Hint: Every number pattern is created by a rule involving numbers and operations.

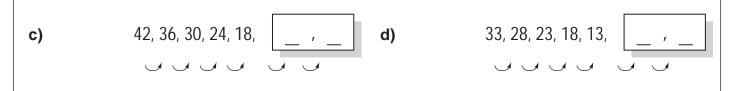

Q.	59, 50, 41, 32, 23,	,	<b>A.</b> 59, 50, 41, 32, 23, <u>14</u> , <u>5</u>
			-9 -9 -9 -9 -9 -9

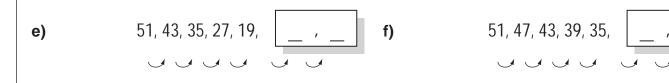

Ask: "Are the numbers increasing or decreasing?" "How can you get from 59 to 50?" Answer: To get from 59 to 50, subtract 9. To get from 50 to 41, subtract 9. To get from 41 to 32, subtract 9, etc. So the rule of the pattern is: "Subtract 9 from the previous number." Apply this rule to the last given number. 23 - 9 = 14

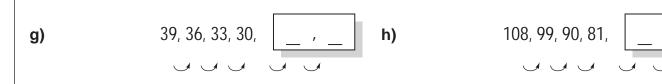

14 - 9 = 5

-7

### Skill 15.4 Solving equations involving subtraction (–)

Rewrite the subtraction as an equivalent addition or subtraction.

Hints: 
$$12 - 7 = 5$$
 can also be written as  $5 + 7 = 12$  OR  $12 - 5 = 7$ 

OR

- Guess the value of the missing number that will make the equation true. (Both sides of the number sentence must be equal).
- Fill in this value in the equation and check the subtraction. Hints: If the total on the left hand side of the equation is not enough then subtract a smaller number.

If the total on the left hand side of the equation is too great then subtract a larger number.

Keep guessing and checking until the number sentence is true.

$$OR 21 - ? = 14$$
  
 $21 - 5 = 16$   
 $21 - 7 = 14$ 

The subtraction can be written as another equivalent subtraction.

The unknown number is 7.

Guess 5. Subtracting 5 gives a result of 16 - too big, so guess a larger number.

> Guess 7. Check again.

**j)** 
$$-8 = 24$$

**k)** 
$$-15 = 21$$

$$-\delta = 24$$

**k)** 
$$-15 = 21$$

## Skill 15.5 Completing number patterns by multiplying by the same number.

- Find the number used to get from term to term.
- Find the operation used to get from term to term.

  Hint: Every number pattern is created by a rule involving numbers and operations.

Ask: "Are the numbers increasing or decreasing?"

"How can you get from 1 to 5?"

Answer: To get from 1 to 5, multiply by 5.

To get from 5 to 25, multiply by 5.

To get from 25 to 125, multiply by 5.

So the rule of the pattern is:

"Multiply the previous number by 5." Apply this rule to the last given number.

 $125 \times 5 = 625$  $625 \times 5 = 3125$ 

a) 2, 8, 32, 128, 512,2048 b)

×4

×4 ×4 ×4

1, 2, 4, 8, \_\_\_\_\_, \_\_\_

c) 1, 3, 9, 27, \_\_\_\_, \_\_\_ d)

e) 15, 30, 60, 120, \_\_\_\_, \_\_\_ f)

2, 6, 18, 54, \_\_\_\_\_, \_\_\_

g) 1, 4, 16, 64, , h)

3, 30, 300, 3000, \_\_\_\_, \_\_\_

i) 2, 10, 50, \_\_\_\_, \_\_\_ j)

4, 20, 100, 500, \_\_\_\_\_, \_\_\_

### Skill 15.6 Completing number patterns by dividing by the same number.

- Find the number used to get from term to term.
- Find the operation used to get from term to term.

  Hint: Every number pattern is created by a rule involving numbers and operations.

Ask: "Are the numbers increasing or decreasing?"

"How can you get from 243 to 81?"

Answer: To get from 243 to 81, divide by 3. To get from 81 to 27, divide by 3. To get from 27 to 9, divide by 3.

So the rule of the pattern is:

"Divide the previous number by 3." Apply this rule to the last given number.

 $9 \div 3 = 3$  $3 \div 3 = 1$ 

a)  $64, 32, 16, 8, \boxed{\underline{4}, \underline{2}}$  b)  $\div 2 \div 2 \div 2 \div 2 \div 2$ 

224, 112, 56, 28,

c) 4096, 1024, 256, 64, \_\_\_, \_\_ d)

3750, 750, 150, \_\_\_, \_\_

e) 972, 324, 108, 36, \_\_\_, \_\_\_ f)

g) 486, 162, 54, 18, \_\_\_, \_\_ h)

60 000, 6000, 600, \_\_\_\_\_\_

i) 25 000, 5000, 1000, 200, \_\_\_, \_\_\_ j)

2048, 512, 128, 32, \_\_\_\_, \_\_\_

### Skill 15.7 Solving equations involving multiplication (x)

• Rewrite the multiplication as an equivalent division.

*Hint:* 
$$3 \times 8 = 24$$
 can also be written as  $24 \div 8 = 3$  OR  $24 \div 3 = 8$ 

OR

- Guess the value of the missing number that will make the equation true. (Both sides of the number sentence must be equal).
- Fill in this value in the equation and check the multiplication.

Hints: If the total on the left hand side of the equation is not enough then multiply by a larger number.

If the total on the left hand side of the equation is too great then multiply by a smaller number.

• Keep guessing and checking until the number sentence is true.

**A.** 
$$? \times 7 = 63$$
  
 $63 \div 7 = ?$   
 $9 = ?$ 

*OR* 
$$? \times 7 = 63$$
  
 $8 \times 7 = 56$   
 $\mathbf{9} \times 7 = 63$ 

The multiplication can be written as an equivalent division.

The unknown number is 9.

Guess 8.

Multiplying by 8 gives a result of 56 - not enough, so guess a larger number.

Guess 9.

Check again.

 $40 \div 8 = ?$ 

5 = ?

**d)** 
$$\times 7 = 56$$

# Skill 15.8 Completing number patterns by using changing values in the rule.

- Find the number used to get from term to term.
- Find the operation used to get from term to term.

Hint: Every number pattern is created by a rule involving numbers and operations.

Counting numbers, even numbers and odd numbers have patterns themselves that will create changing numbers in the rule.

Q. 50, 49, 46, 41, 34, \_\_\_, \_\_\_ A. 50, 49, 46, 41, 34, <u>25</u>, <u>14</u>

Ask: "Are the numbers increasing or decreasing?"

"How can you get from 50 to 49?"

Answer: To get from 50 to 49, subtract 1.

To get from 49 to 46, subtract 3.

To get from 46 to 41, subtract 5, etc.

So the rule of the pattern is:

"Subtract consecutive odd numbers from the previous number."

Apply this rule to the last given number. 34 - 9 = 25

34 - 9 = 2525 - 11 = 14

- a) 15, 15, 16, 18, 21, 25, 30 b) +0 +1 +2 +3 +4 +5
- 2, 4, 8, 14, 22,
- 42, 30, 20, 12, 6, \_\_\_, \_\_ **d)**
- 2, 5, 11, 20, 32,
- e) 21, 20, 18, 15, 11, \_\_\_, \_\_\_ f)
- 2, 9, 15, 20, 24,
- g) 3, 4, 7, 12, 19, \_\_\_, \_\_ h)
- 5, 15, 24, 32, 39, \_\_\_\_, \_\_\_
- i) 48, 46, 42, 36, 28, \_\_\_\_, \_\_\_ j)
- 41, 40, 37, 32, 25, \_\_\_\_, \_\_\_

c)

15.5 + 2.5 = 18

#### Skill 15.9 Completing number patterns involving decimals and fractions.

- Find the number used to get from term to term.
- Find the operation used to get from term to term.

  Hint: Every number pattern is created by a rule involving numbers and operations.

Q. 3, 5.5, 8, 10.5, 13, \_\_\_\_, \_\_\_ A. 3, 5.5, 8, 10.5, 13, 15.5, 18

To get from 3 to 5.5, add 2.5

To get from 8 to 10.5, add 2.5, etc.

So the rule of the pattern is:

"Add 2.5 to the previous number."

Apply this rule to the last given number.

13 + 2.5 = 15.5

- c) 4.3, 4.9, 5.5, 6.1, 6.7, \_\_\_\_, \_\_\_ d) 5.2, 4.8, 4.4, 4, 3.6, \_\_\_\_, \_\_\_
- e) 3, 4.2, 5.4, 6.6, 7.8, \_\_\_\_, \_\_\_ f) 10, 9.5, 9, 8.5, 8, \_\_\_\_, \_\_\_
- g)  $\frac{2}{7}, \frac{3}{7}, \frac{4}{7}, \frac{5}{7},$  \_\_\_\_\_ h)  $\frac{29}{6}, \frac{26}{6}, \frac{23}{6}, \frac{20}{6},$  \_\_\_\_\_\_
- i)  $\frac{62}{12}$ ,  $\frac{57}{12}$ ,  $\frac{52}{12}$ ,  $\frac{47}{12}$ ,  $\frac{1}{12}$ ,  $\frac{1}{12}$ ,  $\frac{31}{4}$ ,  $\frac{27}{4}$ ,  $\frac{23}{4}$ ,  $\frac{19}{4}$ ,  $\frac{1}{4}$ ,  $\frac{1$

### Skill 15.10 Solving equations involving 'of'.

#### **EITHER**

- Guess the value of the missing number that will make the equation true.
- To check, divide this guess by the denominator of the fraction. Hints: If the total on the left hand side of the equation is not enough then use a larger number.

If the total on the left hand side of the equation is too great then use a smaller number. 'OF' is another way of saying 'x'

#### **MULTIPLYING BY FRACTIONS**

$$\frac{1}{2}$$
 of  $8 = \frac{1}{2} \times 8 = 8 \div 2 = 4$ 

Multiplying by  $\frac{1}{2}$  means dividing by 2.

AND Multiplying by  $\frac{1}{3}$  means dividing by 3 etc.

Keep guessing and checking until the equation is true. OR

Multiply the answer by the denominator of the fraction.

**Q.** 
$$\frac{1}{2}$$
 of  $= 18$ 

A. 
$$? \div 2 = 18$$
  
 $40 \div 2 = 20$   
 $? \div 2 = 18$   
 $36 \div 2 = 18$   
so  $? = 36$ 

$$OR \ 18 \times 2 = 36$$

Guess 40

Too large, so guess a smaller number.

Guess 36

Correct.

**a)** 
$$\frac{1}{4}$$
 of  $24$  = 6

$$6 \times 4 = ?$$

**b)** 
$$\frac{1}{2}$$
 of  $= 9$ 

**c)** 
$$\frac{1}{2}$$
 of  $\boxed{\phantom{000}}$  = 12

**d)** 
$$\frac{1}{3}$$
 of  $= 10$ 

**e)** 
$$\frac{1}{4}$$
 of \_\_\_\_\_ = 7

**f)** 
$$\frac{1}{3}$$
 of  $\boxed{\phantom{0}}$  = 12

**g)** 
$$\frac{1}{2}$$
 of  $= 16$ 

**h)** 
$$\frac{1}{2}$$
 of  $= 21$ 

i) 
$$\frac{1}{4}$$
 of  $= 20$ 

page 130

## 16. [Units of Measurement]

# Skill 16.1 Selecting the appropriate units of measurement.

MM5 11 22 33 44 MM6 11 22 33 44

- Compare the size, mass or capacity to that of common objects (tennis court, bag of flour or carton of milk).
- Consider any standard units you know, chosen because they are sensible and accurate.
   Example: Carpenters measure wood lengths in millimetres.

Height of a person is measured in centimetres.

Mountains are measured in metres.

Q. Choose the appropriate units: grams, kilograms or tonnes. "The total amount of salt a healthy person should eat each day is 6..."

#### A. grams

The weight of the nutritional elements of food are usually measured in grams or milligrams.

Compare the amount of salt to known amounts of a single unit e.g.

1 kilogram of sugar or a 1 tonne truck.

 a) Choose the appropriate units: millilitres, litres or megalitres.
 "A water tap that drips every second would, each year, waste 10 000..."

litres

b) Choose the appropriate units: millilitres, litres or megalitres. "The capacity of one cup is about 250..."

c) Choose the appropriate units: centimetres, metres or kilometres. "The highest peak in Antarctica is Mt Vinson with a height of 5140... d) Choose the appropriate units: grams, kilograms or tonnes."The heaviest animal, the blue whale, weighs about 90..."

e) Choose the appropriate units: centimetres, metres or kilometres.

"From the Snowy Mountains to the Southern Ocean, the Murray River has a length of 2530...

centimetres, metres or kilometres.

"The world's tallest waterfall is Angel Falls in Venezuela measuring 979..."

g) Choose the appropriate units: millilitres, litres or megalitres. "The amount of juice in an average lemon is about 35..." h) Choose the appropriate units: grams, kilograms or tonnes.

"The average amount of rubbish produced by every Australian each year is 1..."

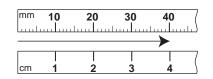

Skill 16.2 Estimating length, mass etc. using units of measurement.  MM5 1 22 33 44  MM6 1 22 33 44					
Q.	How many of these objects are to have a capacity less than A soap dispenser A bath A perfume bottle A hand basin	•	A.	Compare the capacity of each that of a standard object that e.g. 1 litre of milk.  Only the soap dispenser and bottle would be likely to have capacity of less than 1 litre.	t you know
a)	How many of these objects are to have a capacity greater the A human mouth A soft drink can A bird bath A salt shaker	•	b)	How many of these objects to have a mass less than 1 A dozen eggs A block of chocolate A loaf of bread A box of washing powder	•
c)	How many of these objects are to have an area more than 1 metre?  An open book A doona A cinema screen A bath mat	•	d)	How many of these objects to have a temperature gre 30 degrees Celsius? A lake A person A furnace A cellar	•
e)	How many of these objects are to have a mass less than 1 to An ocean liner A helium balloon A Great Dane A motorbike	•	f)	How many of these places to have an area less than Tooronga Zoo Kakadu National Park Centre court - Wimbledon Melbourne Cricket Ground	•
g)	How many of these objects are to have a temperature less the 30 degrees Celsius?  A salad  An ice cream  A bowl of soup  A glass of tap water	•	h)	How many of these objects to have a capacity less that A cattle trough A toilet cistern A baby's bottle A wheel barrow	•

# Skill 16.3 Converting units of length (1).

#### **Conversion Facts - LENGTH**

$$1 \text{ km} = 1000 \text{ m} = 100000 \text{ cm} = 1000000 \text{ mm}$$
 $1 \text{ m} = 100 \text{ cm} = 1000 \text{ mm}$ 
 $= 1 \text{ cm} = 100 \text{ mm}$ 

To change from smaller units to larger units

 Divide by the conversion factor (because you need less).

> Example: To change 40 mm to cm ÷ by 10

To change from larger units to smaller units

 Multiply by the conversion factor (because you need more).

Example: To change 4 cm to mm × by 10

- Q. Which is greater?600 cm or 50 000 mm
- **A.** 600 cm × 10 = 6000 mm **50000 mm** is greater

Decide which unit to convert. To convert cm to mm, multiply by 10.

a) Convert to metres:

1000 cm = 10 m

**b)** Convert to centimetres:

100 mm = CM

- 100 cm = 1 m so 1000 ÷ 100 =
- c) Convert to metres:

3 km = | m

d) Convert to millimetres:

60 cm = mm

e) Convert to metres:

1500 cm = m

f) Convert to millimetres:

10 m = | mm

g) Convert to kilometres:

8000 m = km

h) Convert to centimetres:

900 mm = Cm

i) Convert to millimetres:

2.4 cm = mm

i) Convert to metres:

3.75 km = m

k) Convert to centimetres:

1.9 m = cm

I) Convert to millimetres:

1.36 m = mm

# Skill 16.3 Converting units of length (2).

m) Express in metres:

$$500 \text{ cm} + 3 \text{ m} =$$

n) Express in millimetres:

o) Express in metres:

p) Express in metres:

**q)** Express in kilometres:

r) Express in centimetres:

s) Which is greater? 2 km or 1500 m

t) Which is greater? 4000 cm or 3 m

u) Which is greater?21 cm or 900 mm

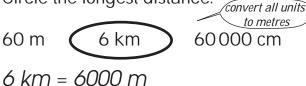

2000 cm

v) Which is greater?

30 cm or 3000 mm

w) Circle the longest distance.

x) Circle the shortest distance.

3 m 20000 mm 1000 cm

- 60 000 cm = 600 m
- y) Circle the shortest distance.

200 m

**z)** Circle the longest distance.

3000 m 2 km 10 000 cm

2 km

## Skill 16.4 Converting units of mass (1).

**Conversion Facts - MASS** 

$$1 \text{ tonne} = 1000 \text{ kg} = 1000000 \text{ g} \\ 1 \text{ kg} = 1000 \text{ g}$$

To change from **smaller** units to **larger** units

• Divide by the conversion factor (because you need less).

Example: To change 3000 g to kg ÷ by 1000

To change from larger units to smaller units

 Multiply by the conversion factor (because you need more).

Example: To change 3 kg into g × by 1000

$$4 g + 3 kg = g$$

**A.** 
$$4g + 3kg = 4g + 3000g = 3004g$$

To convert kg to g, multiply by 1000.  $3 \text{ kg} \Rightarrow$  $3 \times 1000 = 3000 \text{ g}$ 

a) Convert to grams:

 $1 \text{ kg} = 1000 \text{ g so } 20 \times 1000 =$ 

**b)** Convert to kilograms:

**c)** Convert to tonnes:

**d)** Convert to grams:

e) Convert to grams:

f) Convert to kilograms:

g) Convert to tonnes:

$$70\,000 \text{ kg} =$$
 t

h) Convert to kilograms:

i) Convert to grams:

$$0.5 \text{ kg} = g$$

j) Convert to kilograms:

k) Convert to grams:

$$4.6 \text{ kg} =$$

I) Convert to kilograms:

#### Skill 16.4 Converting units of mass (2).

m) Express in grams:

$$3 \text{ kg} + 150 \text{ g} = g$$

n) Express in kilograms:

o) Express in grams:

$$3g + 4kg = g$$

**p)** Express in tonnes:

**q)** Express in grams:

$$6.9 \text{ kg} + 300 \text{ g} = g$$

r) Express in kilograms:

s) Which is greater? 19 kg or 2000 g

t) Which is greater?

u) Which is greater?

3 t or 6000 kg

v) Which is greater?

900 g or 3 kg

w) Circle the greatest mass.

20 kg

2 t

2000 g

2000 g = 2 kg

x) Circle the smallest mass.

3000 kg 30 t 30 000 g

y) Circle the smallest mass.

13 000 g

0.5 t

750 kg

**z)** Circle the greatest mass.

4 t 400 000 g

40000 kg

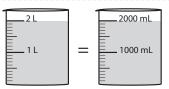

## Skill 16.5 Converting units of capacity (1).

#### **Conversion Facts - CAPACITY**

1 ML (megalitre) = 1 000 kL = 1 000 000 L 1 kL = 1000 L

0 L 1 L = 1000 mL (millilitre)

To change from smaller units to larger units

• Divide by the conversion factor (because you need less).

Example: To change 2000 mL to L ÷ by 1000 To change from larger units to smaller units

 Multiply by the conversion factor (because you need more).

Example: To change 2 L to mL  $\times$  by 1000

Q. Circle the smallest capacity.

6000 mL 5 L 600 mL

A.  $5 L \times 1000 = 5000 \text{ mL}$ The smallest capacity is 600 mL.

6000 mL 5 L 600 mL

Change each amount to the same unit (mL).

To convert L to mL, multiply by 1000.

a) Convert to litres:

20 000 mL = 20 L

 $1000 \text{ mL} = 1 \text{ L so } 20 000 \div 1000 =$ 

**b)** Convert to millilitres:

1 L = mL

c) Convert to litres:

5000 mL = L

d) Convert to litres:

3 000 000 mL =

**e)** Convert to litres:

78 000 mL = L

f) Convert to millilitres:

2.6 L = mL

g) Convert to millilitres:

5.8 L = mL

**h)** Convert to millilitres:

0.7 L = mL

# Skill 16.5 Converting units of capacity (2).

i) Express in litres:

j) Express in millilitres:

k) Express in litres:

Express in millilitres:

m) Which is greater? 40 000 mL or 4 L

n) Which is greater?100 L or 10 000 mL

o) Which is greater?6000 mL or 12 L

p) Which is greater?5.2 L or 10 000 mL

q) Circle the greatest capacity. convert all units

50 L

7.5 L

to millilitres

1000 mL

9 L

Circle the smallest capacity.

900 mL

- 50 L = 50 000 mL 7.5 L = 7500 mL
- s) Circle the smallest capacity.

4000 mL

3.5 L

40 L

t) Circle the greatest capacity.

28 L

2800 mL

3000 mL

page 138

## Skill 16.6 Solving problems involving units of measurement.

- **Q.** One lap of the oval fountain in Hyde Park, London is 21 000 cm. How many metres is this?
- **A.** 21000 ÷ 100 = **210** m

To convert cm to m divide by 100.

a) How many metres above sea level is Arthurs Seat, the highest point on Victoria's Mornington Peninsula, if it is 300 times the height of a 100 cm person?

mass of 620 g, can be taken by the coach on to the plane if there is only two and a half kilograms allowed?

b) How many basketballs, each with a

$$100 \times 300 = 30\,000\,\mathrm{cm}$$

=

c) How many 250 mL cups are necessary to fill a 3 L vase?

d) An average orange has a mass of 200 g. How many oranges would you expect to find in a 3 kg bag?

e) A half flush of a toilet uses 6 L of water. How many millilitres is this?

= mL

f) Charlie's average stride length is 80 cm. At this rate, how many steps would he take to walk the 400 m?

=

g) How many metres above ground is Uluru if it is 136 times the height of a 250 cm tree?

= m

h) A 50¢ piece is about 32 mm wide. How many 50¢ pieces, end to end, would you need to run the length of a table that is 512 cm long?

=

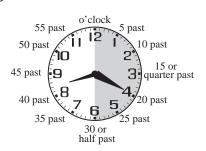

#### [Time] **17.**

#### Expressing the time in words.

TIME - Past

Big hand between 12 and 6

"Twenty PAST eight"

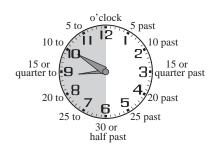

"a quarter PAST eight"

"half PAST ten"

Big hand between 6 and 12

"Ten **TO** nine" OR "eight fifty"

"a quarter TO two"

## Hours (h)

Smaller hand 1 number = 1 h

1 lap = 12 h

#### Minutes (min)

Bigger hand 1 mark = 1 min1 number = 5 min1 lap = 1 h = 60 min

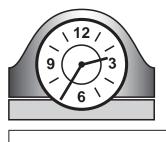

#### **Q.** Write the time in words.

#### Write the time in words.

#### Write the time in words.

# A. Five to five

# or Four fifty-five

The big hand has turned 55 minutes. It is nearly back to the o'clock. The little hand is almost, but not quite up to the five.

**b)** Write the time in words.

#### **d)** Write the time in words.

#### Skill 17.2 Expressing the time in digital form.

- Write the hours first. The smaller hand will be exactly on or just past a number.
- Then put the symbol ":"
- Count clockwise by 5's from 12 (or 0 minutes) to the bigger hand. Write the minutes.

Example: The clocks show **8:20** (eight twenty) and **8:50** (eight fifty)

#### Hours (h)

Smaller hand 1 number = 1 h 1 lap = 12 h

#### Minutes (min)

Bigger hand 1 mark = 1 min 1 number = 5 min 1 lap = 1 h = 60 min

**Q.** Write the time in digital form.

A. 2:35

Counting from 12, the big hand has turned 35 minutes.

The little hand is just past 2 or midway between the 2 (II) and the 3 (III).

a) Write the time in digital form.

5:50

**b)** Write the time in digital form.

:

c) Write the time in digital form.

:

**d)** Write the time in digital form.

e) Write the time in digital form.

:

**f)** Write the time in digital form.

:

#### Skill 17.3 Showing the time on an analogue clock.

45 11 2<mark>2</mark> 33 44 46 1<mark>1</mark> 22 33 44

Drawing the **minute** (min) hand.

- If the time says "past":
  Count clockwise by 5's, pointing as you go, the clock numbers starting with 12.
  Example: "twenty past eight" 8:20
- Draw the big hand pointing to 4.
- If the time says "to":
   Count anti-clockwise by 5's, pointing as you go, the clock numbers starting with 12.

   Example: "ten to nine"
- Draw the big hand pointing to 10.
- If the time given is digital:
   Count clockwise by 5's from 12 (or 0 min)
   Example: "eight twenty" 8:20 or
   "eight fifty" 8:50

Drawing the hour (h) hand.

- If the time says "past":
   Draw the smaller hand after the hour.
- If the time says "to":
   Draw the smaller hand before the hour.
- If the time given is digital:

  Draw the hour hand on or past the hour and moving toward the next number.

  Example: "eight fifty" 8:50

**Q.** Draw hands on the clock to show that the time is quarter past eight.

A. (12/)

One quarter of 60 is 15. So the big hand is at 15 minutes past.

Counting by 5's the big hand is pointing to the 3. The little hand is quarter of the way past the eight and toward the nine.

a) Draw hands on the clock to show that the time is 7:40.

**b)** Draw hands on the clock to show that the time is half past ten.

c) Draw hands on the clock to show that the time is 6:05.

e) Draw hands on the second clock to show that the time is 2 hours and 10 minutes later.

d) Draw hands on the watch to show that the time is 5:20.

f) Draw hands on the second clock to show that the time is 4 hours and 15 minutes earlier.

#### **Skill 17.4** Converting units of time.

#### **Conversion Facts - TIME**

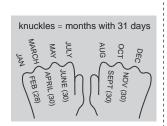

- 1 century = 100 years
- 1 decade = 10 years
- 1 year = 12 months = 52 weeks = 365 days
- 1 leap year = 366 days
- 1 fortnight = 2 weeks
- 1 week = 7 days
- 1 day = 24 hours
- 1 hour = 60 minutes
- 1 minute = 60 seconds

#### Days in the month:

30 days have September April

June

November. and

All the rest have 31

except for February alone which has

28 days clear and 29 in each leap year.

**Q.** Convert to minutes:

$$3\frac{1}{2}$$
 hours =  $\min$ 

**A.**  $3 h \times 60 = 180 \text{ min}$  To convert hours  $\frac{1}{2}$  hr = 30 min 180 + 30

to minutes, multiply by 60. Add the minutes.

Convert to years:

1 decade = 10 years so 3 × 10 =

**b)** Convert to days:

= **210** min

c) Convert to days:

d) Convert to minutes:

$$1\frac{1}{4}$$
 hours = min

Convert to weeks:

Convert to seconds:

$$2\frac{1}{2}\min = S$$

**g)** Convert to years:

h) Convert to hours:

Convert to days: i)

Convert to days:

#### Skill 17.5 Calculating periods of time (1).

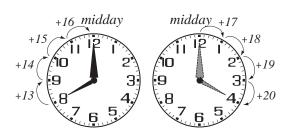

#### TIME OF DAY

Morning - sunrise to midday
Afternoon - midday to 6 pm
Evening - 6 pm to bedtime
Night - sunset to sunrise

- Rule 1: After 60 minutes go to the next hour.
- Rule 2: After 12 hours go to the same time but use, am instead of pm or pm instead of am Example: It is 11:00 am. In another twelve hours it will be 11:00 pm.
- Rule 3: After 24 hours go to the same time but the next day. (Similar for 48 and 72 hours also.)
- Rule 4: Change from am to pm when you pass midday.
- Rule 5: Change from pm to am when you pass midnight.
- **Q.** It is 8:00 pm. In another 20 hours will it be morning or afternoon?

Break 20 hours up into 12 + 4 + 4 h. 12 hours after 8:00 pm is 8:00 am. Add the remaining 8 hours by adding 4 hours to get to midday and then 4 more hours to get to 4:00 pm.

a) It is 1:00 pm on Monday. In another 40 hours what day will it be?

**b)** It is 9:30 pm on Saturday. In another 36 hours what day will it be?

c) It is 7:00 am. In another 50 hours will it be morning or afternoon?

be morning or alternoon?

d) It is 3:00 pm. In another 20 hours will it be morning or afternoon?

e) It is 1:30 am. What was the time 2 hours and 20 minutes before this?

:

f) It is 3:00 pm. In another 10 hours what time will it be?

:

g) It is 18:00. In another 10 hours what time will it be?

[Use the 24-hour clock.]

h) It is 17:15. What was the time 2 hours and 20 minutes before this?[Use the 24-hour clock.]

page	1	45

Sk	ill 17.5 Calculating periods of time (2).		MM5 11 22 33 44 MM6 11 42 33 44
i)	The Australian F1 Grand Prix starts at 2:00 pm. At what time will it finish if it goes for 1 hour and 25 minutes?	j)	Clarke woke at 6:30 am after 10 hours sleep. At what time did Clarke go to sleep?
	:		:
k)	The movie started at 3:40 pm and played for 105 minutes. At what time did the movie finish?	I)	Samantha was in a queue for 3 hours and 55 minutes and purchased concert tickets at 5:20 pm. At what time did she join the queue?
			:
m)	A fruit cake requires 75 minutes baking time. It is 11:10 am when the mix is put in the oven. At what time will the cake be cooked?	n)	It is now 9:25 am. Fred has an appointment in 4 hours and 35 minutes time. At what time is Fred's appointment?
	;		:
0)	Queen's Bohemian Rhapsody plays for nearly 6 minutes. If the song finishes when the clock strikes 10:00 pm, at what time did it start?	p)	The women's world record for the 3000 m is 8:06.11. The youth world record for girls over the same distance is 8:36.45. How much faster are the women?
			S
q)	The movie 'A Hitchhiker's Guide to the Galaxy' runs for 110 minutes. If the movie finishes at 1:20 pm, at what time does it start?	r)	Up to 2013, the longest ever Davis Cup tennis match went for 7 hours and 2 minutes. How much longer was the Wimbledon match that lasted 11 hours and 5 minutes?
			h min
s)	You get on the bus at 10:30 am. The trip is expected to take 2 hours and 50 minutes. At what time should you arrive?	t)	Joseph spends 1 hour and 20 minutes swimming each morning. He starts at 6:15 am. At what time does Joseph finish?

#### Skill 17.6 Comparing periods of time.

- Convert all times to the same unit. (see skill 17.4, page 144)
- · Compare the times.
- **Q.** Circle the longest time.

2 h

2100 s

210 min

**A.** 2 h = 120 min 2100 s = 35 min 210 min = 210 min

Convert to minutes.

#### Skill 17.7 Reading timetables.

**Q.** According to the schedule, what is the longest amount of time the Yarraville Library is open for in any one day?

#### Yarraville Library

Opening Hours

Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Closed	10am - 1pm	10am - 1pm	2pm - 5pm	2pm - 5pm	10pm - 12noon	Closed

#### A. 3 hours

Check the number of open hours for each day.

10 am until 1 pm is 3 hours.

2 pm until 5 pm is 3 hours.

a) How much time do you spend watching TV if you watch 'Jakers' through to the end of 'Roller Coaster'?

000	ABC
3:30	Play School (R) 81786
3:55	Todd World (R) 8467250
4:10	Jakers! (R) 133298
4:35	Basil Brush 7752328
5:00	Roller Coaster
6:05	<b>Doctor Who</b> (R,S) 9597415
6:30	Beat The Chef (S) 8434
7:00	<b>News</b> (S) 637

You watch from 4:10 to 6:05. There are 50 min from 4:10 until 5:00 and 1 h and 5 min after that.

1 h 55 min

b) What train would you need to catch from Central station to be at Bondi station by 5:15 am?

Fastana Cubanba 0	III I !		
Eastern Suburbs & to Bondi Junction Week

# 18. [Measuring]

#### Skill 18.1 Estimating length.

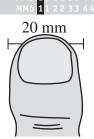

#### **EITHER**

• Compare the length of the object to a known length.

Example: The line segments shown.

#### OR

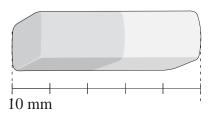

Measure the length against an everyday object.
Example: Your thumb.

**Q.** Estimate the length of the eraser.

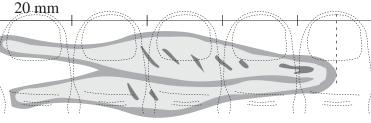

A. 50 mm

The eraser looks to be about five times the length of the 10 mm line. A reasonable estimate would be 50 mm.

a) Estimate the length of the tweezers.

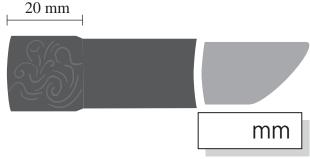

Accept 85 to 95 — 90 mm

**b)** Estimate the length of the postage stamp.

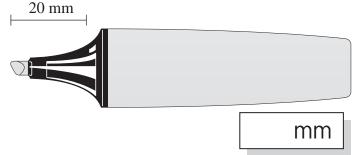

cm

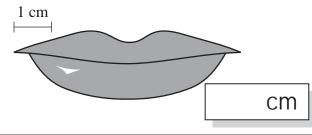

c) Estimate the length of the lipstick.

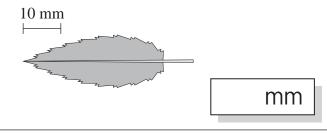

d) Estimate the length of the hi-liter.

**e)** Estimate the length of the lips.

f) Estimate the length of the leaf.

#### **Skill 18.2** Reading and using scales.

- Determine the value of each mark and... **EITHER**
- Start at zero and count by that amount, pointing to each mark as you go.

OR

Count on from a known point.

At what speed is the car travelling?

A. 56 km/h

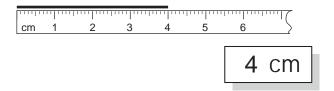

The darker calibrations mark every 20 km.

The arrow is between 40 and 60 but after 50 km.

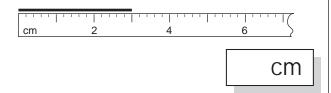

The lighter calibrations mark every 2 km. The arrow is at 3 marks after 50. Counting 2, 4 to 6.

The car is travelling at 56 km/h.

Using the ruler, measure the length of the line.

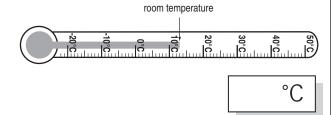

b) Using the ruler, measure the length of the line.

- Using a ruler, measure the length of a side of the square in millimetres.
  - mm

According to the thermometer what is the temperature of the room?

How much water is in the measuring

At what speed is the car travelling?

50 mL

cylinder?

20 mL 10 mL

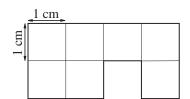

mL

km/h

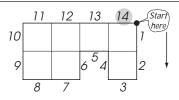

#### Skill 18.3 Calculating the perimeter of a shape using a grid.

5 11 22 33 44 5 11 22 33 44

**Q.** Find the perimeter of the shape.

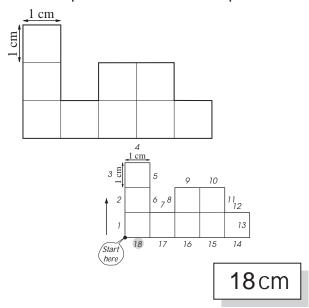

A. 14 cm

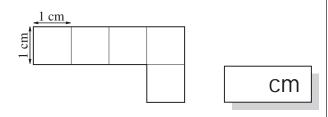

Each grid length measures 1 cm.
Mark a starting point.
Count the number of grid lengths around the outside of the shape.

There are 14 lengths or centimetres.

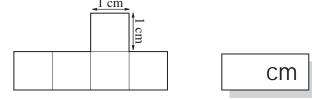

a) Find the perimeter of the shape.

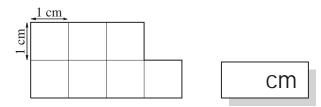

**b)** Find the perimeter of the shape.

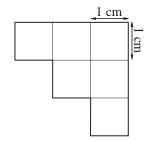

c) Find the perimeter of the shape.

d) Find the perimeter of the shape.

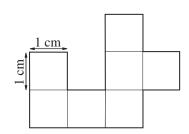

e) Find the perimeter of the shape.

cm

f) Find the perimeter of the shape.

cm

# Skill 18.4 Calculating the area of a shape by counting squares (1).

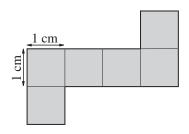

• Count the number of squares of a certain size that are needed to cover the shape.

8

 $cm^{2}$ 

**Q.** Find the area of this shape.

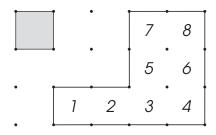

A. 6 cm<sup>2</sup> Each square is 1 cm on each side.

Count the squares that cover the surface inside the rectangle.

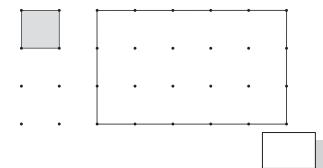

There are 6 squares, each with an area of 1  $cm^2$ 

Area = 
$$6 \times 1 \text{ cm}^2$$
  
=  $6 \text{ cm}^2$ 

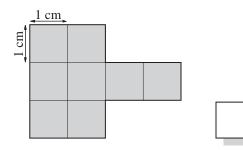

a) How many small squares are needed to cover the larger shape?

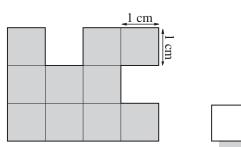

**b)** How many small squares are needed to cover the larger rectangle?

**c)** Find the area of this shape.

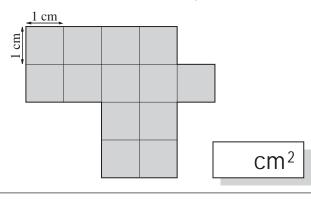

d) Find the area of this shape.

 $cm^2$ 

e) Find the area of this shape.

f) Find the area of this shape.

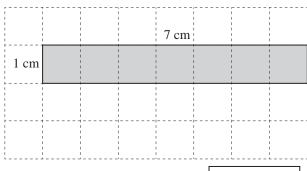

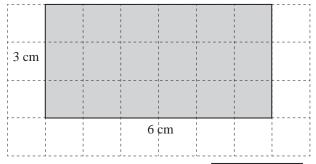

#### **Skill 18.4** Calculating the area of a shape by counting squares (2).

g) Find the area of the shaded rectangle.

 $cm^2$ 

 $cm^2$ 

Find the area of the shaded rectangle. i)

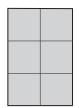

Find the area of the shaded square.

 $cm^2$ 

 $cm^{2} \\$ 

- **k)** The shapes below have the same:
  - A) perimeter and area
  - B) perimeter
  - C) area

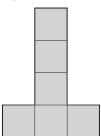

-2-em

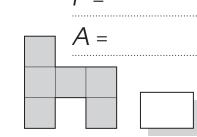

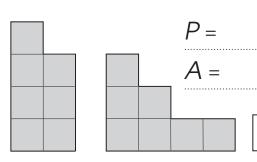

- The shapes below have the same: A) perimeter and area
  - perimeter B)
  - C) area

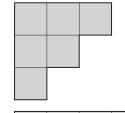

- **m)** The shapes below have the same:
  - A) perimeter and area
  - B) perimeter
  - C) area

- n) The shapes below have the same:
  - A) perimeter and area
  - B) perimeter
  - C) area

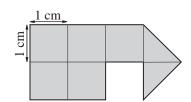

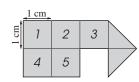

#### Skill 18.5 Calculating the area of a shape by counting triangles.

**Q.** Find the area of this shape.

A.  $6 \text{ cm}^2$ 

First count the number of complete squares.

There are 5 complete squares.

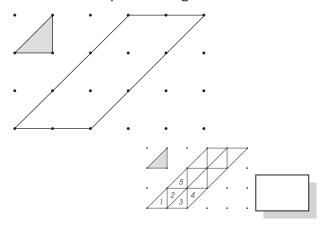

Then count the triangles. Each triangle doubled forms 1 square.

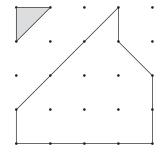

There are 2 triangles in the shape. Together they make 1 more square.

$$5 + 1 = 6$$
 squares

a) How many small triangles are needed to cover the parallelogram?

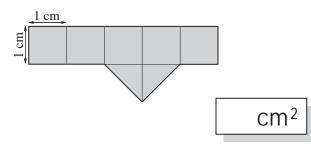

**b)** How many small triangles are needed to cover the shape?

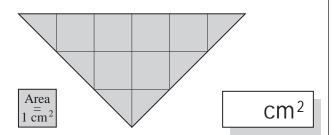

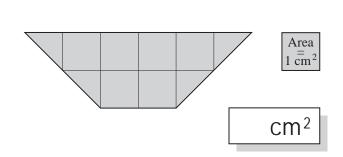

c) Find the area of this shape.

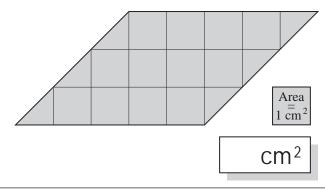

d) Find the area of this triangle.

e) Find the area of this trapezium.

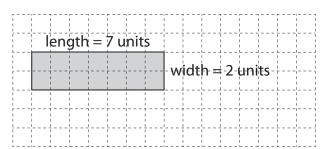

f) Find the area of this parallelogram.

# Skill 18.6 Calculating the area of a shape as a result of the enlargement of another shape.

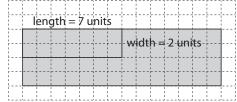

- Count the number of squares that make the area of both the original and the enlarged rectangles.
- Divide the enlarged area by the original area.
- **Q.** Double the length and the width of this rectangle. How many times bigger is the area of the new rectangle compared to the original rectangle?

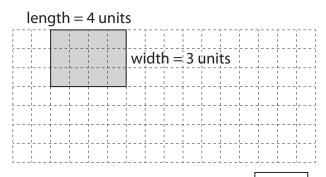

#### A. 4

Original area = 14 square units Enlarged area = 56 square units

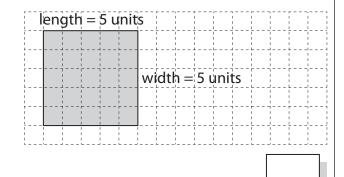

Enlarged area ÷ original area = = 56 ÷ 14 = 4

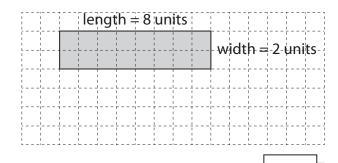

a) Double the length and the width of this rectangle. How many times bigger is the area of the new rectangle compared to the original rectangle?

b) Double the length of this square. How many times bigger is the area of the new rectangle compared to the original square?

c) Triple the width of this rectangle. How many times bigger is the area of the new rectangle compared to the original rectangle?

d) Triple the length and the width of this rectangle. How many times bigger is the area of the new rectangle compared to the original rectangle?

length = 3 units

width = 2 units

## Skill 18.7 Describing volume of prisms by counting cubes.

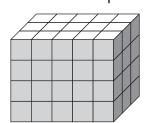

- Count the number of cubes needed to fill the top layer.
- Multiply this amount by the number of layers.

#### 1 CUBIC UNIT

**Q.** How many cubes were used to make the prism?

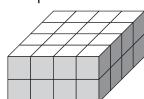

**A.**  $3 \times 5 = 15$   $15 \times 4 = 60$ 

First count the cubes in the top layer. There are 3 rows of 5 cubes.

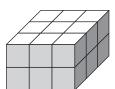

Then count the number of layers. There are 4 layers of cubes.

a) How many cubes were used to make the prism?

 $4 \times 4 = 16$ 

b) How many cubes were used to make the prism?

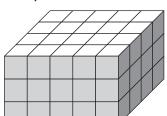

**c)** Count the cubes to find the volume of the prism.

Juma = 1 c

d) Count the cubes to find the volume of the prism.

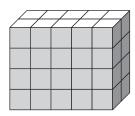

Volume =  $1 \text{ cm}^3$ 

cm<sup>3</sup>

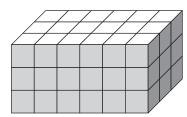

cm<sup>3</sup>

**e)** Count the cubes to find the volume of the prism.

Volume =  $1 \text{ cm}^3$ 

f) Count the cubes to find the volume of the prism.

Volume =  $1 \text{ cm}^3$ 

 $cm^3$ 

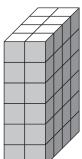

cm<sup>3</sup>

#### **Skill 18.8** Comparing volume of prisms by counting cubes.

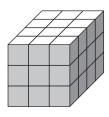

- Count the number of cubes in each prism. Hint: Find a shortcut. Count the cubes in the top layer and multiply by the number of rows.
- Compare the number of cubes in each shape.
- **Q.** Which prism has the greater volume?

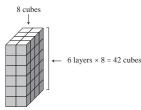

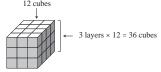

B)

- A. *A* 
  - A) Top layer = 8 cubesNumber of layers = 6 $6 \times 8 = 48$  cubes

B) Top layer = 12 cubes Number of layers = 3 layers  $3 \times 12 = 36$  cubes

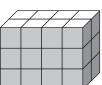

48 > 36 so the answer is A

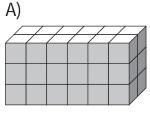

Which prism has the greater volume?

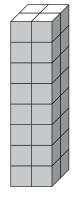

A)

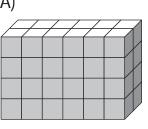

**b)** Which prism has the lesser volume?

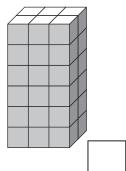

**c)** Which prism has the greater volume?

A)

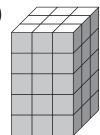

B)

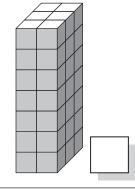

d) Which prism has the lesser volume?

A)

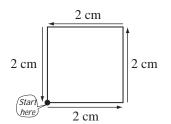

B)

#### Skill 18.9 Calculating perimeter by using a ruler.

- Measure the side lengths of the shape.
- Add the lengths of all sides.

Example: Side length = 2 cm, then the perimeter of the square = 2 + 2 + 2 + 2 = 8 cm

**Q.** Using a ruler measure the side lengths of the rectangle in centimetres. What is the perimeter of the rectangle?

2 cm + 2 cm

**A.** 5 cm

5 cm

14 cm

sides the same length.

Measure the length of 1 side.
(5 cm long)

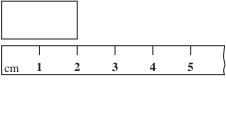

Measure the length of the adjacent side.
(2 cm long)

Add all four sides.

A rectangle has opposite

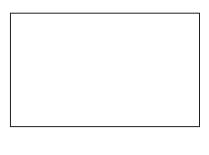

(2 cm long)
Add all four sides.
The perimeter of the rectangle is 14 cm.

a) Using a ruler measure the side lengths of the rectangle in centimetres. What is the perimeter of the rectangle?

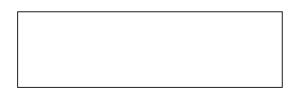

cm

**b)** Using a ruler measure the side lengths of the rectangle in centimetres. What is the perimeter of the rectangle?

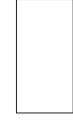

cm

c) Using a ruler measure the side lengths of the rectangle in centimetres. What is the perimeter of the rectangle?

d) Using a ruler measure the side lengths of the rectangle in centimetres. What is the perimeter of the rectangle?

cm

cm

# 19. [Shapes]

#### **Skill 19.1** Comparing angles to a right angle.

- Place the corner of a page (which is a right angle) at the corner (vertex) of the angle.
- Align the base of the page with one line of the angle.
- Compare the angle to the right angle that is the page.

If the other line of the angle extends beyond the page, then the angle is "greater than" a right angle.

#### **RIGHT ANGLE**

If the corner of the page matches perfectly, then the angle is "equal to" a right angle.

If the other line of the angle is inside the page, then the angle is "less than" a right angle.

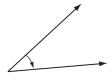

Q. Is the angle shown "less than", "equal to" or "greater than" a right angle?

#### A. greater than

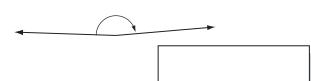

The angle appears greater than 90°. Check by placing the corner of a Maths Mate page inside the angle.

a) Is the angle "less than", "equal to" or "greater than" a right angle?

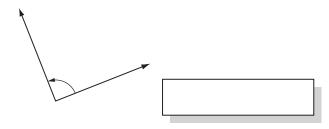

less than

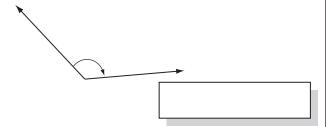

b) Is the angle "less than", "equal to" or "greater than" a right angle?

c) Is the angle "less than", "equal to" or "greater than" a right angle?

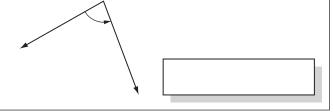

d) Is the angle "less than", "equal to" or "greater than" a right angle?

e) Is the angle "less than", "equal to" or "greater than" a right angle?

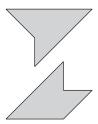

f) Is the angle "less than", "equal to" or "greater than" a right angle?

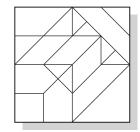

#### Skill 19.2 Recognising 2D shapes.

Q. One of these shapes is hidden in the maze. Find it and colour it in. [Same size and orientation.]

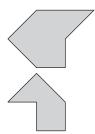

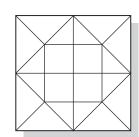

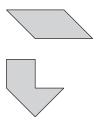

Trace and cut out the shapes to lay over the maze. Slide them to check possible positions. [Remember: Do not change their orientation by turning them. The shapes must have every edge outlined.]

 a) One of these shapes is hidden in the maze. Find it and colour it in. [Same size and orientation.]

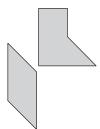

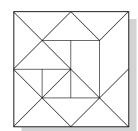

b) One of these shapes is hidden in the maze. Find it and colour it in. [Same size and orientation.]

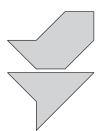

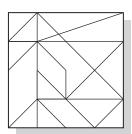

c) One of these shapes is hidden in the maze. Find it and colour it in. [Same size and orientation.]

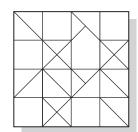

d) One of these shapes is hidden in the maze. Find it and colour it in. [Same size and orientation.]

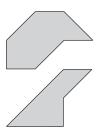

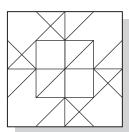

e) One of these shapes is hidden in the maze. Find it and colour it in. [Same size and orientation.]

f) One of these shapes is hidden in the maze. Find it and colour it in. [Same size and orientation.]

## Skill 19.3 Drawing 2D shapes.

LATIN	and	d GREEK TERMS	mono	-	one	hexa	-	six
poly	-	many	bi or di	-	two	hepta	-	seven
equi	-	equal	tri	-	three	octa	-	eight
gon	-	angle	quad or tetra	-	four	nona	-	nine
lateral	-	side	penta	-	five	deca	-	ten

- Draw two dimensional shapes (2D) in two directions, length and width. Hint: 2D shapes have no height.
- Use the name of the shape (based on Latin and Greek words) to work out the number of sides.
- Q. Draw a pentagon.

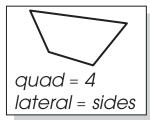

Consider the name: gon = angle

penta = 5

You need to draw a shape that has 5 interior angles and therefore 5 sides.

a) Draw a quadrilateral.

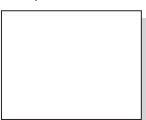

b) Draw a triangle.

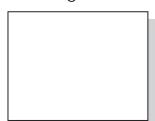

c) Draw a rectangle.

d) Draw a square.

e) Draw a decagon.

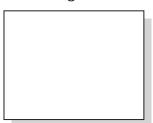

f) Draw a heptagon.

g) Draw a pentagon.

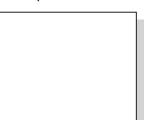

h) Draw an octagon.

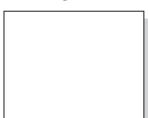

i) Draw a nonagon.

j) Draw a trapezium.

k) Draw a hexagon.

I) Draw a rhombus.

## Skill 19.4 Describing polygons.

• Use the name of the polygon (poly means 'many' and gon means 'angle' to determine the number of interior angles or the number of sides.

Hint: The number of interior angles = The number of sides.

**Q.** How many sides does a rhombus have?

A. 4

A rectangle, square, trapezium and rhombus all belong to the quadrilateral family: quad = 4 lateral = sides

a) How many interior angles does a triangle have?

3

**b)** How many sides does a rectangle have?

c) How many sides does a decagon have?

d) How many interior angles does a square have?

e) How many interior angles does a hexagon have?

f) How many sides does a pentagon have?

g) How many sides does a nonagon have?

h) How many sides does an octagon have?

i) How many interior angles does a quadrilateral have?

j) How many sides does a heptagon have?

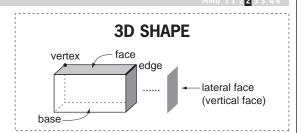

Sk	ill 19.5 Recognising properties of triang	gles	and quadrilaterals.  MM5 11 22 33 44  MM6 11 22 33 44
•	Look for equal sides or equal angles.  Look at the types of angles inside the triang  Look at the types of lines inside the triangle symmetry).		uadrilateral (parallel, perpendicular,
Q.	This triangle has:	A.	D
	<ul><li>A) one line of symmetry</li><li>B) two parallel sides</li><li>C) all sides of equal length</li><li>D) one right angle</li></ul>		A, B and C are not true.  D is the correct answer, because the triangle has a right angle.
a)	This square has:  A) one obtuse angle B) no line of symmetry C) all sides of equal length D) two acute angles	b)	This kite has:  A) two parallel sides B) one line of symmetry C) two perpendicular sides D) all sides of equal length
c)	This rhombus has:  A) one right angle B) two perpendicular sides C) all angles equal D) two lines of symmetry	d)	This trapezium has:  A) one line of symmetry B) two perpendicular sides C) two parallel sides D) all sides of equal length
e)	I am a quadrilateral. I have both pairs of sides parallel. I have four right angles. Any two adjacent sides are not equal in length. What shape am I?  A) rectangle B) square C) rhombus	f)	I am a quadrilateral. I have opposite sides that are parallel. My diagonals are not equal in length. What shape am I?  A) square B) parallelogram C) trapezium
g)	I am a quadrilateral. I have both pairs of sides parallel. My diagonals are not equal in length but they do cross at right angles. What shape am I?  A) parallelogram  B) square  C) rhombus	h)	I am a quadrilateral. I have two pairs of equal sides. My diagonals cross at right angles. I have only one line of symmetry. What shape am I?  A) square  B) kite  C) rectangle

#### **Skill 19.6** Describing 3D shapes.

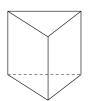

Edges and/or

Vertices (points/corners).

**Q.** What is the shape of the 3 lateral faces of the triangular prism?

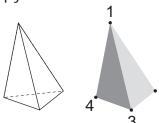

A. rectangle

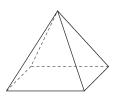

The 2 parallel bases of a triangular prism are triangular in shape. These triangles, as for all prisms, are joined by rectangular faces. The number of rectangular faces is the same as the number of sides on the base shape.

How many vertices does a triangular pyramid have?

Count the number of points.

b) How many edges does a rectangular pyramid have?

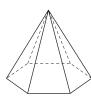

c) How many edges does a rectangular prism have?

d) How many faces does a hexagonal pyramid have?

The base of a tetrahedron is triangular. What shape are the other faces?

What is the shape of the 8 lateral (vertical) faces of the octagonal prism?

g) How many vertices does a pentagonal pyramid have?

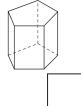

**h)** What is the name of this solid?

- A) pentagonal prism
- B) hexagonal pyramid
- C) pentagonal pyramid
- D) hexagonal prism

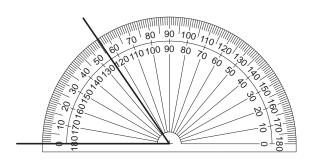

#### Skill 19.7 Measuring angles using a protractor.

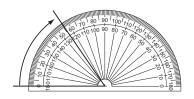

- Place the centre of the protractor at the corner (vertex) of the angle.
- Align one line of the angle with a zero line on the protractor.
- Take the reading from where the second line of the angle crosses the scale on the protractor.

Hint: Protractors can be read using either the inside or outside scale depending on which zero is used.

**Q.** Using the protractor measure the size of the angle shown.

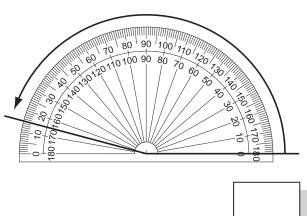

A. 55°

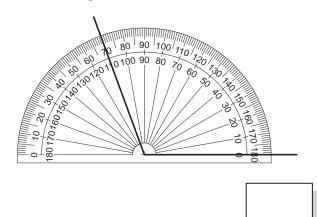

Read from the outside scale. One line of the angle is at  $0^{\circ}$  and the other line of the angle extends around to  $55^{\circ}$ .

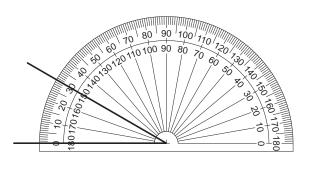

a) Using the protractor measure the size of the angle shown.

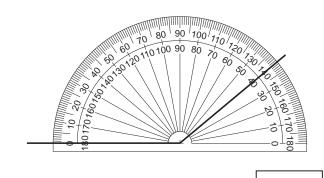

**b)** Using the protractor measure the size of the angle shown.

c) Using the protractor measure the size of the angle shown.

**d)** Using the protractor measure the size of the angle shown.

#### Skill 19.8 Recognising and drawing different types of angles.

#### To recognise a type of angle

- Draw a right angle using one of the lines and the corner over each of the given angles.
- Compare each angle to the right angles you have drawn.

#### To draw a type of angle

- Draw a line starting from one end of the given line.
- Draw the line according to the type of angle required (see Glossary).
- Mark the angle with a curved line.

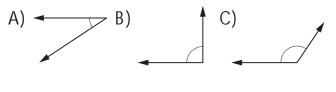

A right angle measures 90° (degrees). It is marked with a corner.

It is marked

**Q.** Which angle is an obtuse angle?

A.

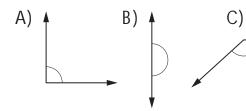

The angle is smaller than a right angle  $\Rightarrow$  not obtuse

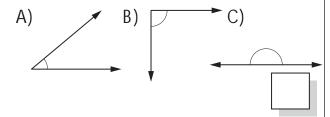

The angle is greater than a right angle  $\Rightarrow$  obtuse

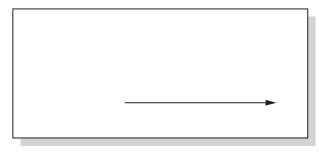

a) Which angle is a right angle?

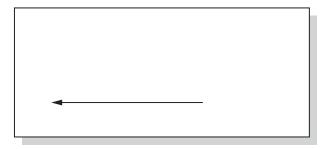

**b)** Which angle is a straight angle?

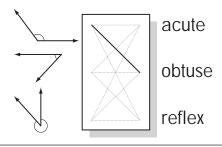

c) Draw an obtuse angle using this line.

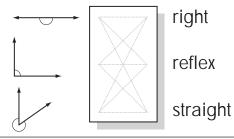

**d)** Draw an acute angle using this line.

**e)** Match the angle to its description.

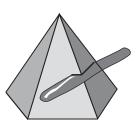

**f)** Match the angle to its description.

#### Skill 19.9 Identifying the shape of a cross section.

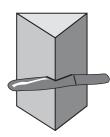

**Q.** Name the shape of the cross section through the pentagonal pyramid.

# A. pentagon

The base of the pyramid is a pentagon. The shape of the cross section will also be pentagonal.

a) Name the shape of the cross section through the triangular prism.

The view of the cross-section is the same as the view from the top.

c) A fly on the ceiling, a father and a baby all looked at the television. Which view looks like the one seen by the fly?

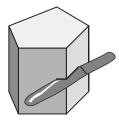

e) Name the shape of the cross section through the pentagonal prism.

g) Which shape shows the cross section produced by slicing through the points indicated on the cube?

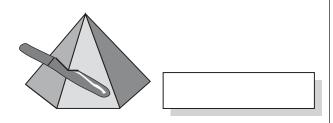

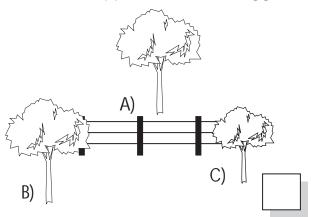

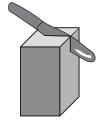

b) Name the shape of the cross section through the hexagonal pyramid.

d) Which tree appears to be the biggest?

f) Name the shape of the cross section through the square prism.

Which shape shows the cross section produced by slicing through the points indicated on the cube?

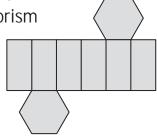

# Skill 19.10 Identifying nets of 3D shapes (1). NETS of 3D SHAPES Cube Prism Pyramid

- Identify the shapes in the net.
- Imagine the shape folded.

OR

Make a model by tracing, cutting out and folding the net.

- **Q.** Which shape can this net be used to make?
  - A) hexagonal pyramid
  - B) hexagonal prism
  - C) rectangular prism

A. *B* 

The net is formed from 2 hexagons and 6 rectangles. Pyramids have triangles as their lateral sides. Prisms have rectangles. It must be a prism not a pyramid. This prism has hexagons as its base and top.

OR

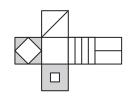

Trace, cut out and fold the shape.

a) Which of the boxes can be made from the net below?

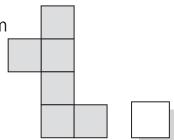

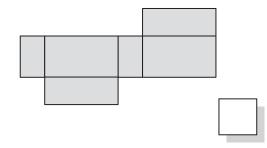

Trace, cut out and fold the shape.

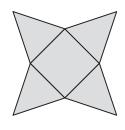

- b) Which shape can this net be used to make?
  - A) cube
  - B) tetrahedron
  - C) square prism

- c) Which shape can this net be used to make?
  - A) square prism
  - B) rectangular prism
  - C) cube

- d) Which shape can this net be used to make?
  - A) triangular pyramid
  - B) square prism
  - C) square pyramid

# Skill 19.10 Identifying nets of 3D shapes (2).

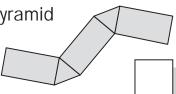

**e)** Which shape can this net be used to make?

B) triangular prism

C) triangular pyramid

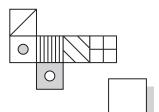

f) Which of the boxes can be made from the net below?

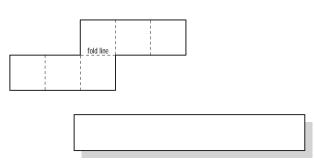

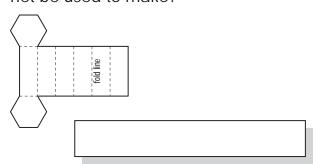

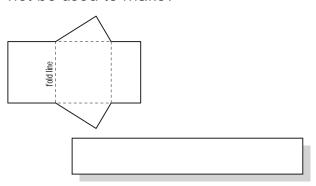

**g)** What 3-dimensional shape can this net be used to make?

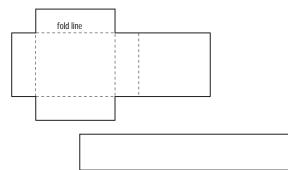

**h)** What 3-dimensional shape can this net be used to make?

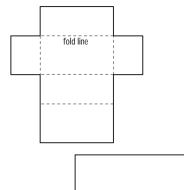

i) What 3-dimensional shape can this net be used to make?

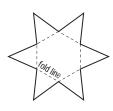

j) What 3-dimensional shape can this net be used to make?

**k)** What 3-dimensional shape can this net be used to make?

What 3-dimensional shape can this net be used to make?

#### Skill 19.11 Drawing top, side and front views of 3D shapes.

#### Drawing the top view of a 3D shape

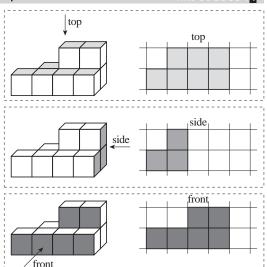

• Imagine what you would see if you were looking at the solid from directly above.

#### Drawing the side view of a 3D shape

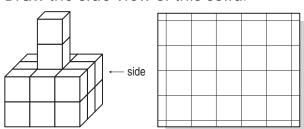

• Imagine what you would see if you were looking at one of the sides of the solid.

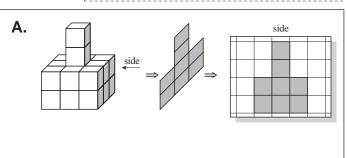

• Imagine what you would see if you were looking at the front of the solid.

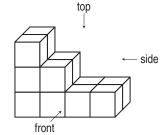

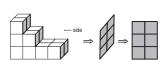

**Q.** Draw the side view of this solid.

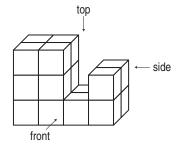

a)

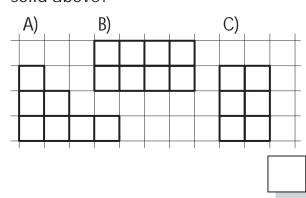

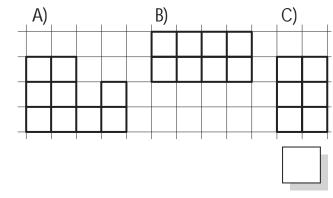

b)

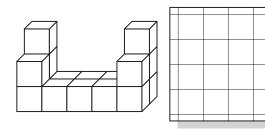

Which shape is the side view of the solid above?

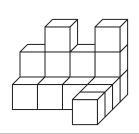

Which shape is the top view of the solid above?

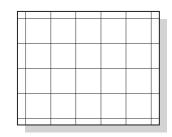

c) Draw the front view of this solid.

d) Draw the side view of this solid.

#### [Location / Transformation] 20.

#### **Skill 20.1** Describing the movement of an object.

- Q. Which movement has transformed this shape?
  - A) flip (reflection)
  - B) slide (translation)
  - C) turn (rotation)

Position 1

Position 2

A) Hold a mirror vertically on the right edge of position 1. This shows the object has been reflected to achieve position 2. correct

Sketch the object as in position 1.

- B) Try sliding it. Note the change in position as a result. incorrect
- C) Try turning it. Note the change in position as a result. incorrect
- Which movement has transformed this shape?
  - A) flip (reflection)
  - B) slide (translation)
  - C) turn (rotation)

Position 1

Position 2

The truck has been turned a quarter of a turn, anticlockwise.

- **b)** Which movement has transformed this shape?
  - A) flip (reflection)
  - slide (translation)
  - C) turn (rotation)

Position 1

Position 2

- Which movement has transformed this shape?
  - A) flip (reflection)
  - B) slide (translation)
  - C) turn (rotation)

Position 1

Position 2

- d) Which movement has transformed this shape?
  - A) flip (reflection)
  - slide (translation)
  - C) turn (rotation)

Position 1

Position 2

- Which movement has transformed this shape?
  - A) flip (reflection)
  - B) slide (translation)
  - C) turn (rotation)

Position 1 Position 2

- Which movement has transformed f) this shape?
  - A) flip (reflection)
  - slide (translation)
  - C) turn (rotation)

Position 1

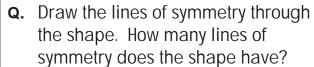

Position 2

# Skill 20.2 Drawing lines of symmetry through a shape.

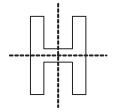

MM5 11 22 33 44 MM6 11 22 33 44

• Imagine a line along which the shape can be folded to have one part fit exactly over the other part.

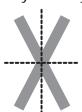

a) Draw the lines of symmetry through the shape. How many lines of symmetry does the shape have?

2

b) Draw the lines of symmetry through the shape. How many lines of symmetry does the shape have?

d) Draw the lines of symmetry through the shape. How many lines of symmetry does the shape have?

c) Draw the lines of symmetry through the shape. How many lines of symmetry does the shape have?

e) Draw the lines of symmetry through the shape. How many lines of symmetry does the shape have?

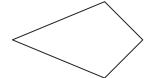

Draw the lines of symmetry through

the triangle. How many lines of

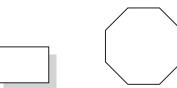

symmetry does it have?

f) Draw the lines of symmetry through the kite. How many lines of symmetry does it have?

h) Draw the lines of symmetry through the octagon. How many lines of symmetry does it have?

g)

#### Skill 20.3 Locating places using compass bearings N, E, S and W.

5 11 <mark>2</mark> 2 3 3 4 4 6 11 2 2 3 3 4 4

- Refer to the 4 point compass to find your bearings.
   Hint: (Clockwise) 'Never Eat Sea Weed' North, East, South, West.
- **Q.** Which capital city is east of Skopje, the capital of Macedonia?

#### A. *Istanbul*

Find Skopje on the map.

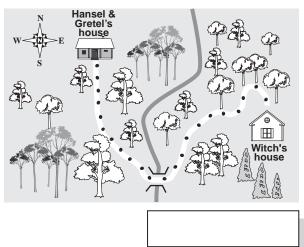

Consider that you are there.

Imagine the central point of a compass on Skopje.

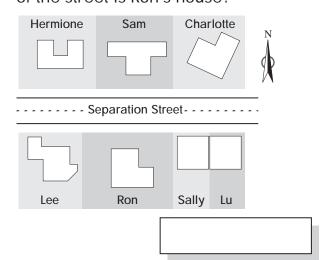

Turn and face the direction of the arrow pointing east.

Which capital city would you be looking at?

a) Hansel and Gretel left a trail along the forest path. In which direction did they walk when they first left their house?

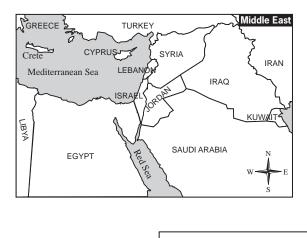

b) Hermione's house is on the north side of Separation Street. On which side of the street is Ron's house?

c) Of the Queensland cities shown below, which city is the most northerly?

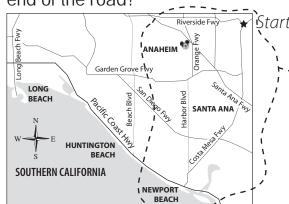

d) In which direction is the Red Sea from Saudi Arabia?

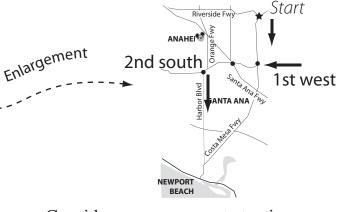

#### Skill 20.4 Following directions to find a place on a map.

Q. Head south from the starting point. Take the first road west and the second south. Which beach is at the end of the road?

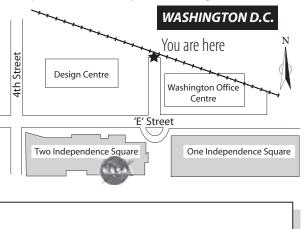

A. Newport Beach

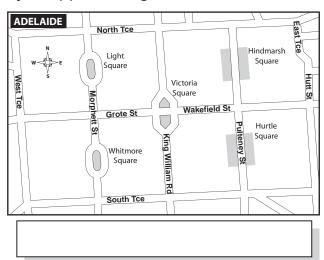

Consider one movement at a time. Mark your position as you go.

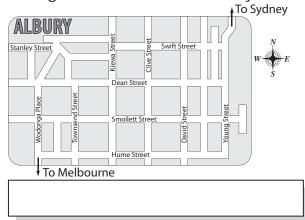

a) You head south towards 'E' street and turn west. To which number Independence Square are you headed?

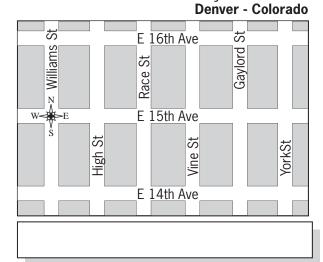

into North Terrace. Then take the second turn south. Which square are you approaching?

Street you walk east for two blocks and then walk south for two blocks. If you then go west, which street are you in?

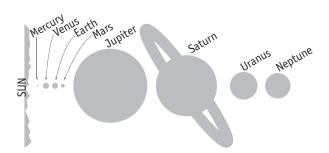

E 15th Ave and take the second road north. Turn east again at the next corner. Which street are you in?

# Skill 20.5 Locating places using simple bearings (closest, left, first turn).

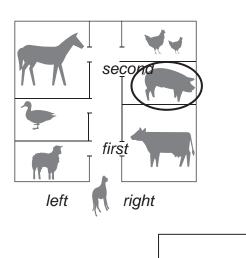

**Q.** In our Solar System which planet is between Mars and Neptune but closest to Mars?

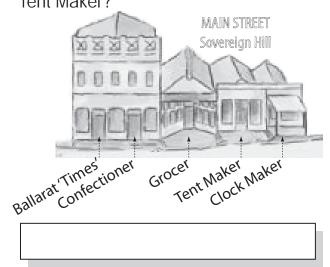

# A. Jupiter

Check the meaning of any unknown terms used to describe location. *Between* means somewhere in the middle of the boundaries. *Closest* means the shortest distance from.

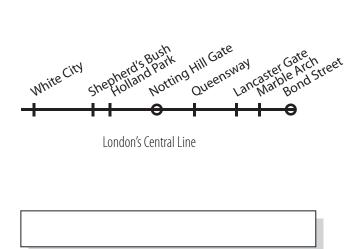

a) A dog enters a shed and goes into the pen that is second on the right. What animal is it now with?

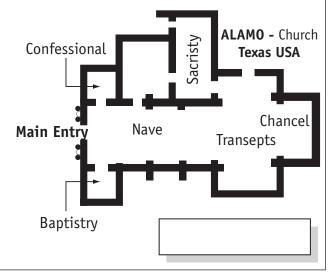

b) At Sovereign Hill, which building is between the Ballarat 'Times' and the Tent Maker but closest to the Tent Maker?

c) On the Central Line in London which station is between White City and Bond Street but closest to Bond Street?

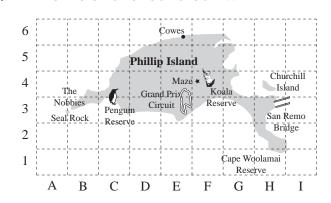

d) From the main entry of the church in the Alamo compound you take the second opening on the left and then the first on the right. Where are you?

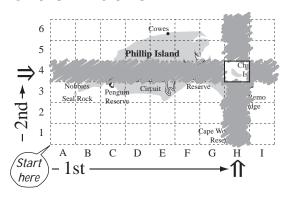

#### Skill 20.6 Using regions on a grid to describe location, e.g. A3 (1).

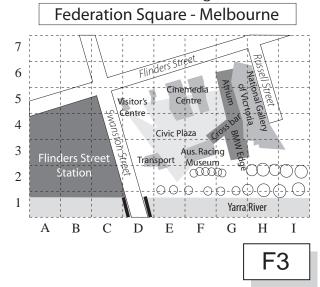

- Start at the bottom left corner of the grid.
- First read across the horizontal axis to find the letter that matches the column you need.
- Then read **up** the vertical axis to find the number that matches the row you need. The grid space that is common to both lines marks the position you are locating.
- Q. Which Island is found at H4?

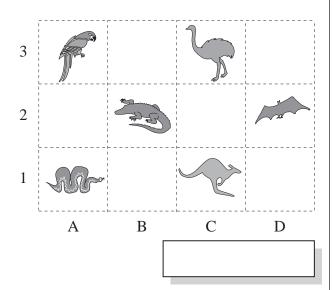

A. Churchill Island

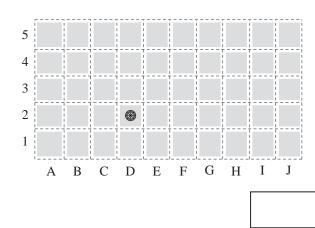

a) Where is the Australian Racing Museum located on the grid?

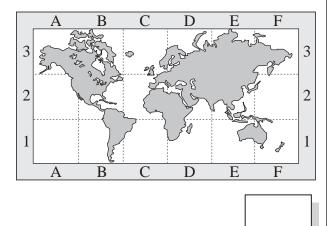

b) Which Australian animal is located at C1?

c) What is the location of the drain on the tiled bathroom floor?

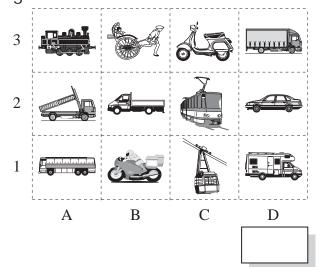

d) Alaska is located at A3 on this map. Where is New Zealand located?

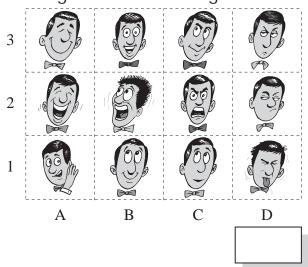

# Skill 20.6 Using regions on a grid to describe location, e.g. A3 (2).

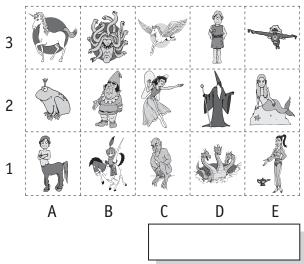

**e)** Where is the rickshaw located on the grid?

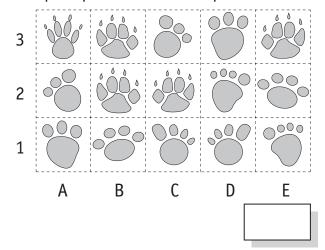

f) Where is the person who is poking out his tongue located on the grid?

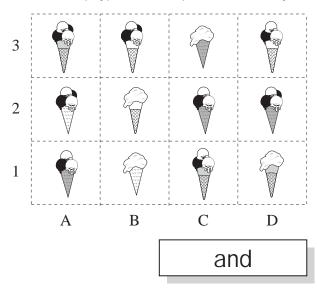

g) Of these fantasy creatures, what would you be if you were at E2?

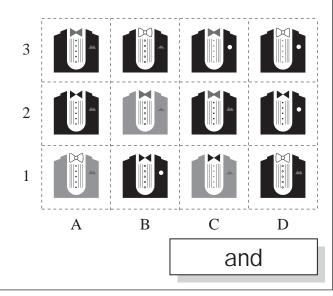

h) There are 7 pairs of paw prints in this diagram. Find the grid reference of the paw print that has no pair.

i) Find the coordinates of the only two identical icecreams. [Hint: cone type, cone colour, scoop type and scoop number all vary.]

j) Find the coordinates of the only two identical tuxedos. [Hint: suit colour, bow tie, buttons and pocket handkerchief all vary.]

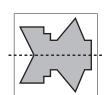

### Skill 20.7 Sketching symmetrical shapes.

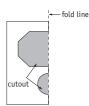

- Hold a mirror on the fold line to see what you should sketch.
- Sketch this image on the other side of the fold line.
- **Q.** Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

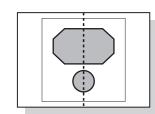

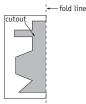

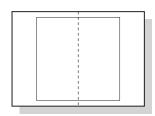

a) Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

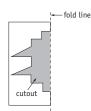

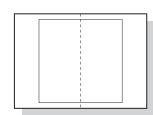

b) Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

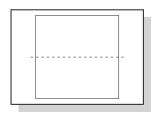

c) Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

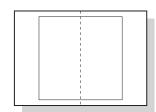

d) Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

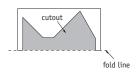

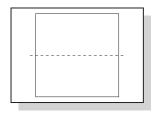

e) Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

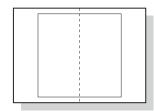

f) Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

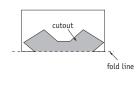

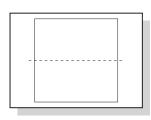

g) Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

h) Paper is folded in half. This design is cut out. Draw the paper unfolded with the full cutout.

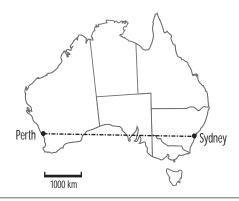

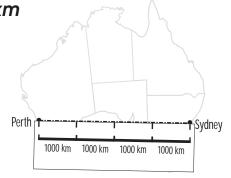

#### Skill 20.8 Using a linear scale to calculate distance (1).

- Put a piece of paper along the distance to be measured.
- Mark the start and end points on the paper.
- Place the paper against the scale matching the starting points.
- Slide the paper across the length of the scale marking the start and end points as you go.
- Add together the distance covered.
- Q. Using the scale, what is the marked distance from Perth to Sydney? [Round off to the nearest 500 km.]

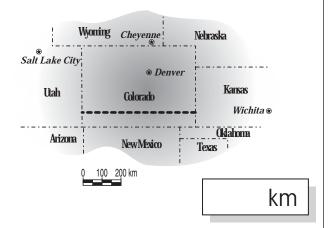

Check the scale against the length of the line. Slide the scale as necessary.  $4 \times 1000 = 4000$ 

a) Use the scale to find the length of Brauman Street.

[Round off to the nearest 50 m.]

**b)** Use the scale to find the width of Colorado. [Round off to the nearest 100 km.]

c) Using the scale, what is the marked distance from Cape Manifold to Wreck Reef? [Round off to the nearest 100 km.]

The Great Barrier Reef

Mackay

Fredrick
Reef

Reef

Wreck
Reef

Rockhamptone

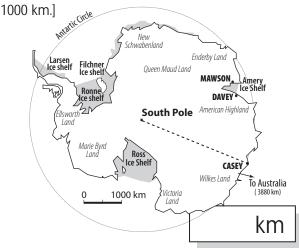

Capricorn Bunker

Group'

neets Wreck
Reef

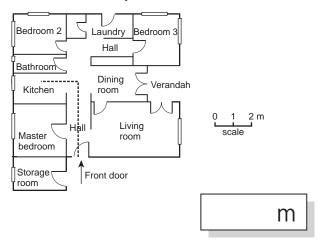

0 100 km

d) Using a ruler and the scale, find the distance between the South Pole and Casey Station. [Round off to the nearest

### Skill 20.8 Using a linear scale to calculate distance (2).

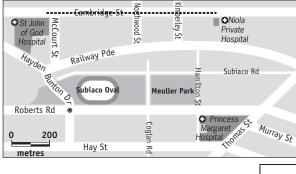

e) Calculate the marked distance from the front door to the kitchen. [Round off to the nearest 1 m.]

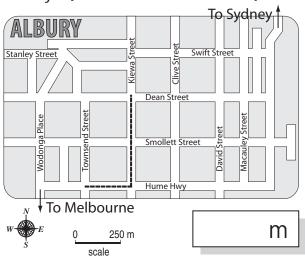

- g) Is the distance between St John of God Hospital and Niola Private Hospital
  - A) less than 800 m,
  - B) between 800 m and 1000 m or

C) more than 1000 m?

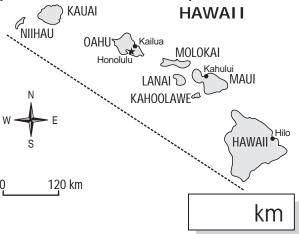

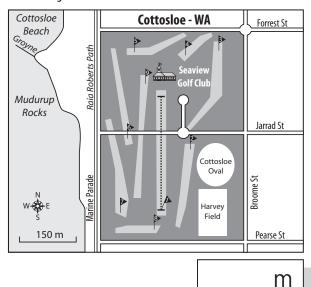

i) What is the marked distance from the intersection of the Hume Highway and Townsend Street to Dean Street in Albury? [Round off to the nearest 50 m.]

f) What is the marked distance from end to end of the Hawaiian islands? [Round off to the nearest 20 km.]

from the scale, what is the distance from the tee to the hole on the first fairway? [Round off to the nearest 1 m.]

j) What is the marked distance from Dr Sun Yat-sen Classical Chinese Garden to the Police station? [Round off to the nearest 100 m.]

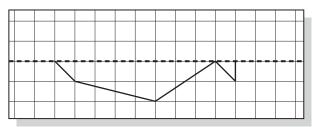

200

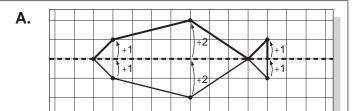

metres

m

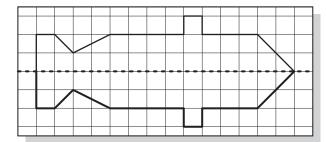

# Skill 20.9 Drawing reflections on a grid (1).

- Mark every vertex on the shape.
- Measure the distance to the dashed line.
- Measure the same distance on the other side of the dashed line.
- Draw a point.
- Join the points.
- **Q.** Complete the drawing so that it has a line of symmetry as shown by the dotted line.

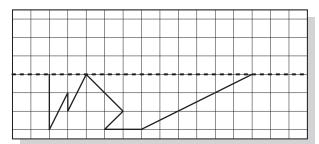

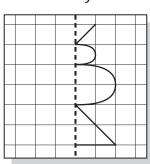

a) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

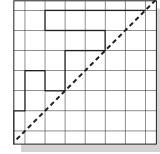

**b)** Complete the drawing so that it has a line of symmetry as shown by the dotted line.

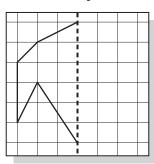

c) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

d) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

e) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

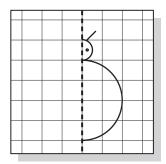

f) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

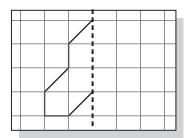

# Skill 20.9 Drawing reflections on a grid (2).

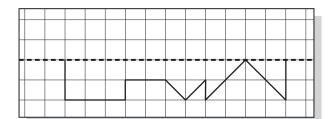

g) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

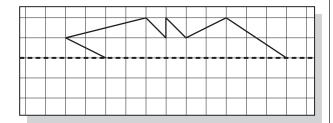

h) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

 i) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

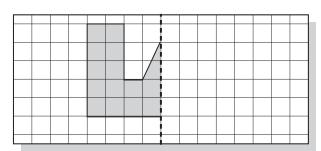

j) Complete the drawing so that it has a line of symmetry as shown by the dotted line.

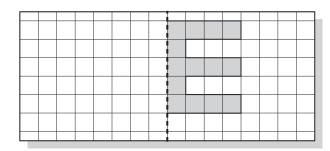

**k)** Draw the reflection of this shape in the dotted line.

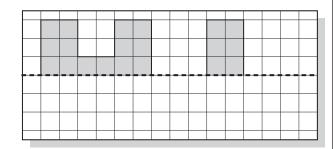

Draw the reflection of this shape in the dotted line.

**m)** Draw the reflection of this shape in the dotted line.

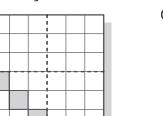

**n)** Draw the reflection of this shape in the dotted line.

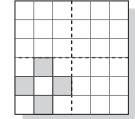

# Skill 20.9 Drawing reflections on a grid (3).

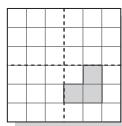

o) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

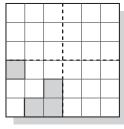

lines of symmetry as shown by the dotted lines.

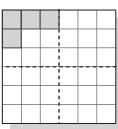

q) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

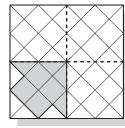

r) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

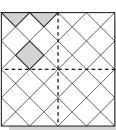

s) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

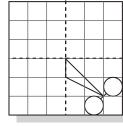

t) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

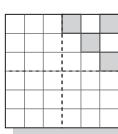

u) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

v) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

w) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

x) Complete this design so that it has two lines of symmetry as shown by the dotted lines.

#### To draw a shape moved by a reflection

- Mark every vertex on the shape.
- Measure the distance to the dashed line.
- Measure the same distance on the other side of the dashed line.
- Draw a point.
- · Join the points.

#### To draw a shape moved by a rotation

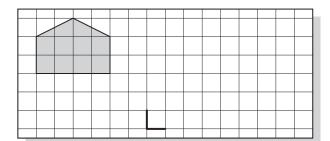

- Rotate each vertex by the given angle, in the given direction.
- Plot and join the rotated points.

#### To draw a shape moved by a translation

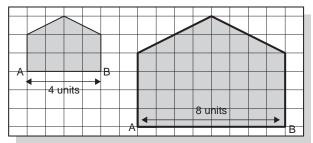

- Mark every vertex on the shape.
- From each vertex move across the required number of units.
- Draw a point.
- Join the points.

#### To draw a reduced or enlarged shape

- Measure the length of one side.
- Calculate the reduction or enlargement for this side.
- · Repeat for all sides of the shape.
- Redraw the shape.
- **Q.** Redraw this shape after doubling its size.

A.

Doubling means ×2.

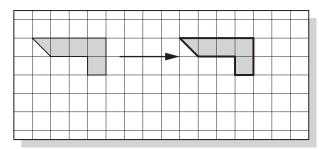

The distance from A to B is 4 units.

 $4 \times 2 = 8$  units

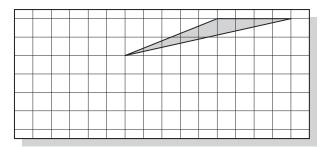

Start drawing the enlargement, 8 units long, from the given corner.

Repeat for all sides of the shape.

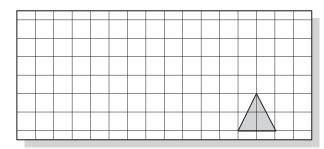

a) Redraw this shape after translating it 8 units to the right.

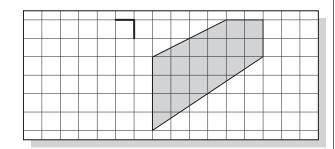

b) Redraw this shape after translating it 4 units down.

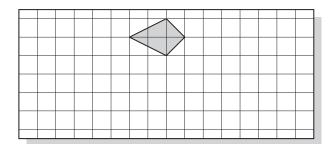

c) Redraw this shape after translating it 7 units to the left and then 3 units up.

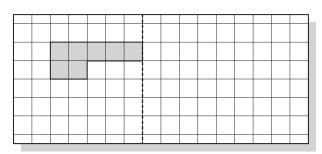

**d)** Redraw this shape after halving its size.

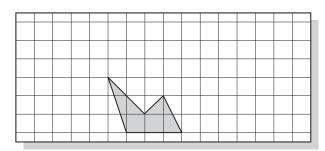

e) Redraw this shape after translating it 6 units to the right and then 3 units down.

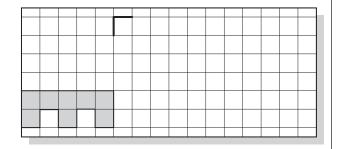

f) Redraw this shape after reflecting it in the dotted line, and then translating it 3 units down.

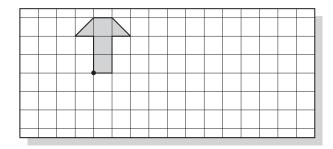

g) Redraw this shape after translating it 3 units up and then 5 units to the left.

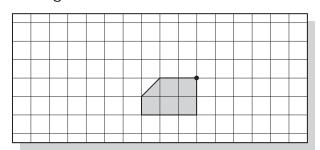

Redraw this shape after doubing its size.

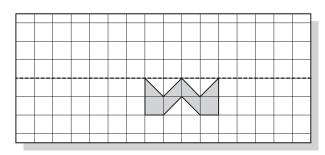

i) Redraw this shape after turning it 90° anticlockwise around the marked point.

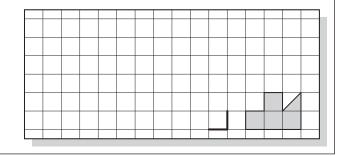

j) Redraw this shape after turning it 90° clockwise around the marked point and then translating it 4 units to the right.

k) Redraw this shape after reflecting it in the dotted line, and then translating it 6 units to the left.

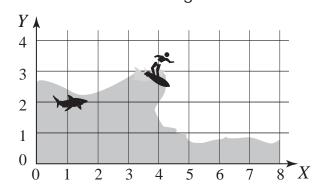

Redraw this shape after tripling its size.

#### Authorised for the use of: MAITLAND HIGH SCHOOL 2016 Skill 20.11 Identifying line and rotational symmetry. For rotational symmetry For line symmetry Try to visualise the shape during a full turn Imagine a line along which the shape can of 360° and make sure that the shape be folded to have one part fit exactly over could cover itself at least once before the the other part. full turn is completed. Q. The shape has: C Α. A) line symmetry B) rotational symmetry original 90° 180° 270° both line and rotational symmetry position position This shape covers itself 4 times before a full 360° turn. The shape has also line symmetry. The shape has: b) The shape has: A) line symmetry A) line symmetry B) rotational symmetry B) rotational symmetry C) both line and rotational symmetry C) both line and rotational symmetry The shape has: The shape has: A) line symmetry A) line symmetry B) rotational symmetry B) rotational symmetry C) both line and rotational symmetry C) both line and rotational symmetry The shape has: The shape has: A) line symmetry A) line symmetry B) rotational symmetry B) rotational symmetry C) both line and rotational symmetry both line and rotational symmetry The shape has: h) The shape has: A) line symmetry A) line symmetry B) rotational symmetry B) rotational symmetry C) both line and rotational symmetry C) both line and rotational symmetry

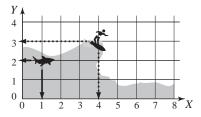

# Skill 20.12 Finding the coordinates of a point on a Cartesian plane, first quadrant.

- Read the coordinate along the horizontal or *x*-axis first.
- Then read the coordinate on the vertical or *y*-axis. *Hint: x comes before y in the alphabet.*
- **Q.** What are the coordinates of the shark and the surfer on the grid?

**A.** shark = (1,2) surfer = (4,3)

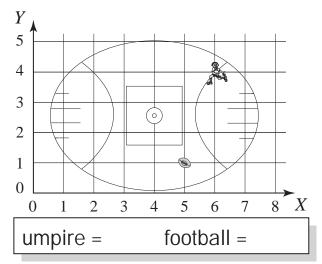

Trace down from the shark to the x-axis. Write the number (1, ).

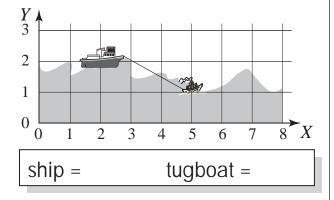

1 is the *x*-coordinate for the shark.

Trace across from the shark to the *y*-axis. Add the number 2 to the coordinate pair (1,2). 2 is the *y*-coordinate for the shark. Repeat for the surfer: (4,3)

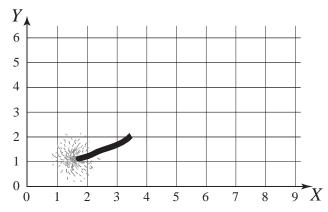

a) What are the coordinates of the umpire and the football on the oval?

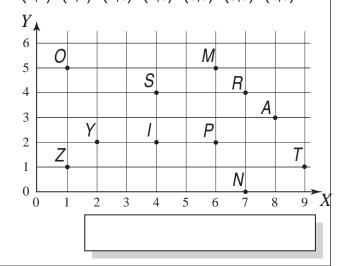

**b)** What are the coordinates of the ship and the tugboat on the grid?

c) Start at (4,1). Draw a line to (3,3) and continue to (6,5), (8,5), (7,3) and (4,1).

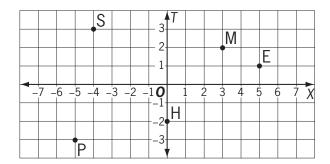

d) Find the letter at each pair of coordinates to decode the word.(4,2) (7,4) (1,5) (7,0) (6,5) (8,3) (7,0)

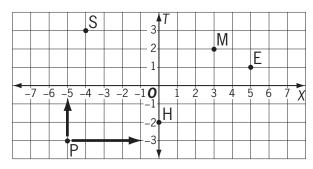

# **Skill 20.**13 Finding the coordinates of a point on a Cartesian plane, all quadrants.

MM5 11 22 33 44 MM6 11 22 33 44

- Read the coordinate along the horizontal or *x*-axis first.
- Then read the coordinate on the vertical or *y*-axis. *Hint: x comes before y in the alphabet.*
- **Q.** What are the coordinates of the point labelled P on the Cartesian plane?

A. P = (-5, -3)

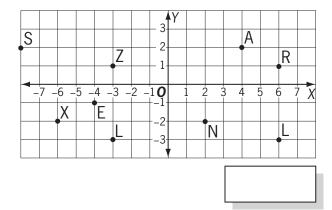

Trace toward the *x*-axis. Write the number (-5, ).

-5 is the x-coordinate for P.

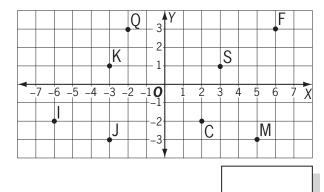

Trace across from P to the *y*-axis. Add the number –3 to the coordinate pair.

−3 is the y-coordinate for P.

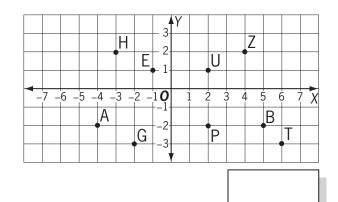

a) List the points in the second quadrant.

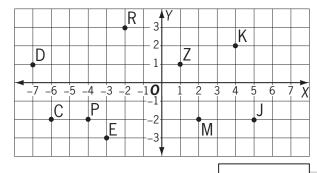

b) What are the coordinates of the point labelled M on the Cartesian plane?

c) List the points in the fourth quadrant.

d) What are the coordinates of the point labelled C on the Cartesian plane?

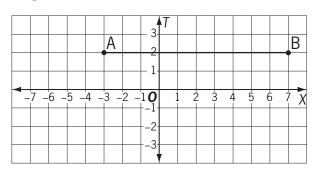

### Skill 20.14 Measuring distance on a Cartesian plane.

Count the number of grid spaces along the line.

OR

- If the line crosses an axis, add the number of grid spaces from either side of the axis.
- **Q.** What is the length in units of the segment AB?

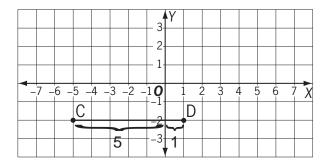

A. Length of AB = 10 units

There are 3 grid spaces from A to the *x*-axis.

There are 7 grid spaces from the *x*-axis to B.

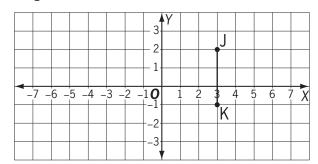

$$3 + 7 = 10$$

a) What is the length in units of the segment CD?

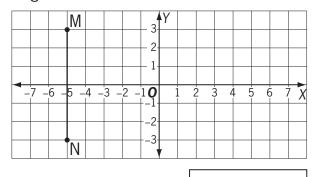

units

**b)** What is the length in units of the segment JK?

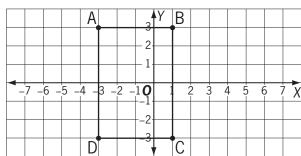

units

c) What is the length in units of the segment MN?

units

**d)** What is the perimeter in units of the rectangle ABCD?

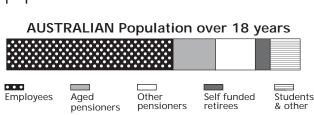

units

# 21. [Statistics / Probability]

# **Skill 21.1** Interpreting stacked bar graphs without a scale.

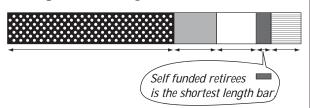

**Q.** Which group of Australians represent the smallest proportion of our over 18 population?

A. Self funded retirees

Compare the length of each shaded bar.

a) Australian and English cricketers have played for the Ashes since 1876. Which country has had the most

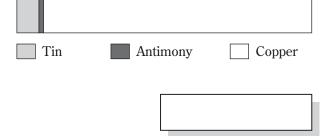

Ashes Series	
Australia	Draw

b) Which coloured medal did Canadians win second most at the 2010 Vancouver Winter Olympics?

WINTER OLYMPIC ME (Vancouver 2010)	DALS [	GOLD SILVER BRONZE

c) What is the main metal in British Pewter?

**Typical Composition of British Pewter** 

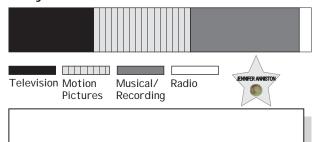

d) Which of the ancient Chinese dynasties reigned for the least amount of time?

Length of ancient Chinese Dynasties

Three so		_	
Xia	Sha	ang	Zhou

e) Which category had the most additions to the Hollywood Walk of Fame in 2012?

Hollywood Walk of Fame - 2012 additions

Which of the types of adult body tissue shown has the lowest percentage of water?

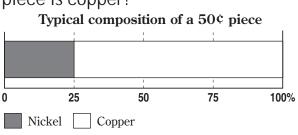

Adult body tissue - percentage of water by weight

Muscle	□ Blood	□ Fat	Bone

Q. How many more woodwind than brass instruments are in the ABC Symphony Orchestra?

A. 6

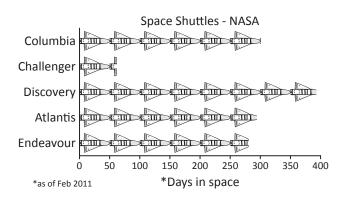

Each interval on the scale equals one instrument.

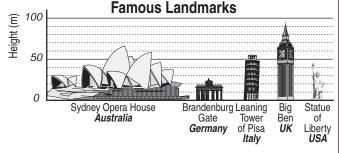

There are 18 woodwind instruments. There are 12 brass instruments.

$$18 - 12 = 6$$

a) Which space shuttle has spent closest to 1 year in space?

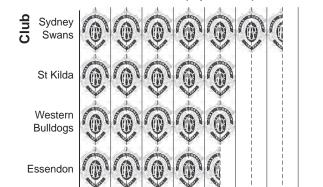

b) Which landmark is closest to 70 m in height?

c) How many Brownlow medals in total have been won by Essendon and the Sydney Swans?

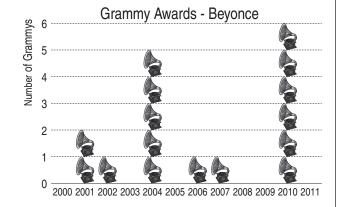

AFL Brownlow medal winners 1924 - 2012 (top 4 clubs)

10

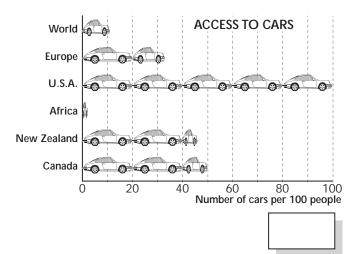

**Number of Brownlows** 

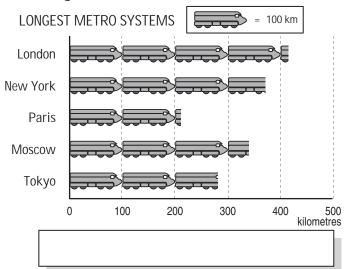

### Skill 21.4 Interpreting pictographs with a scale (2).

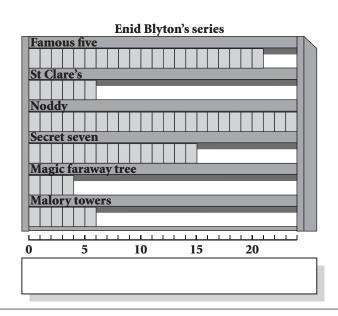

e) How many cars per 100 people are there in Canada?

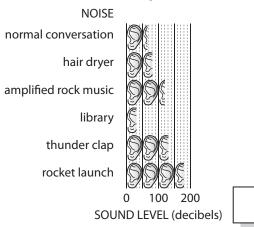

g) Name the cities with metro systems between 300 and 400 kilometres in length.

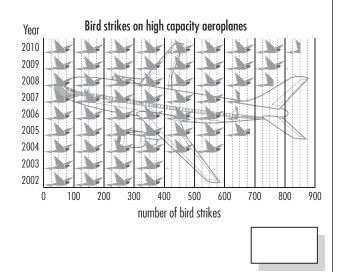

i) Which Enid Blyton Series has 15 books?

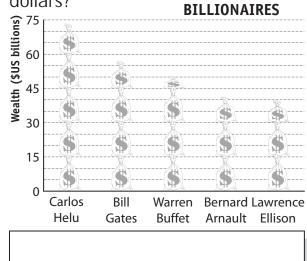

f) Pain is felt once a sound goes beyond 125 decibels. How many of these sounds would hurt your ears?

h) How many of the years shown had between 600 and 700 birds hitting high capacity aeroplanes.

Which of these billionaires has a wealth of approximately 50 billion dollars?

#### Skill 21.5 Interpreting tables.

MM5 11 2 2 3 3 4 4 MM6 11 2 2 3 3 4 4

- Check what each row and column represents.
- **Q.** Which lessons are Australian girls most likely to choose?

**Cultural lessons** - Australian Children (5 - 14)

Class	Participation Rate (%)	
Class	Boys	Girls
Musical Instrument	13	22
Singing	3	7
Dancing	2	24
Drama	3	6

A. Dancing

First find the 'girls' column.

Cultural lessons - Australian Children (5 - 14)				
Class	Participation Rate (%)			
Class	Boys Girls			
Musical Instrument	13	22		
Singing	3 7			
Dancing -	2 —	24		
Drama	3	6		

Then check participation rates down the column. The highest is 24%.

Trace the 24% back along the row to its title, dancing.

a) Which Australian state recorded the earthquake with the highest magnitude?

Earthquakes in Australia			
Date Location State Magnitude			Magnitude
27.05.2013	NE of Koorda	WA	2.4
25.05.2013 NW of Koorda		WA	1.7
25.05.2013 W of Macquarie Island		WA	4.9
22.05.2013	S of Mundubbera	QLD	2.5
22.05.2013	Franklin River	WA	2.6

b) Which Imperial ship is closest in length to the Rebellion ship the Y-wing?

Rebellion Ships	Length (m)	Imperial Ships	Length (m)
X-wing	12.5	Twin-Ion Engine Starfighters (TIE)	6.3
Y-wing	16	Imperial Shuttle	20
B-wing	16.9	AT - AT	14
Blockade Runner	150	Imperial Star Destroyer	1600
Mon Calamari Cruiser	1200	Death Star	120 000

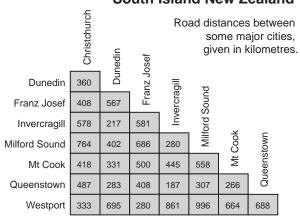

c) Which group, males or females, are twice as likely to play with the Wii as their primary console?

**Primary Console Players** 

Console	Males	Females
X box 360	11%	38%
Wii	80%	41%
PS3	9%	21%

**d)** How far is it from Invercargill to Queenstown?

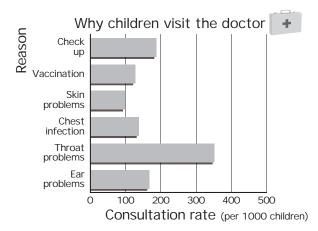

South Island New Zealand

km

#### Skill 21.6 Interpreting bar graphs (1).

**Q.** What was the most common reason for children to visit the doctor?

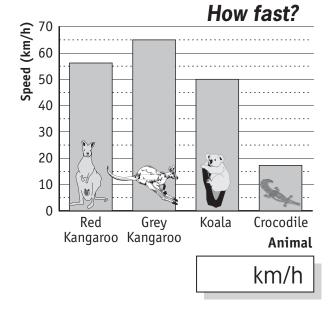

# A. Throat problems

Check the scale along the base of the graph. The more visits to the doctor, the longer the bar.

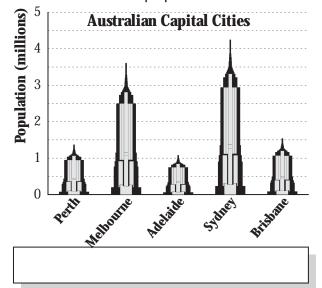

3 4 4

The longest bar is beside 'Throat problems'.

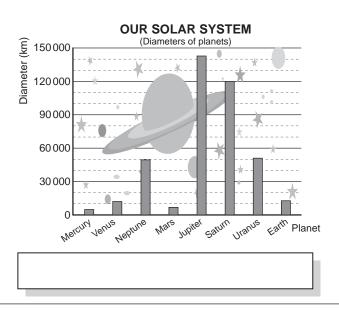

a) What speed can a koala reach?

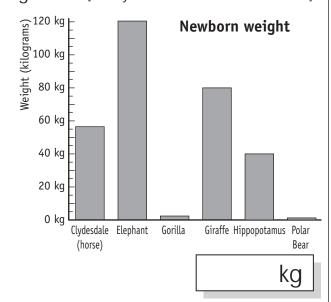

b) Which of the capital cities shown has the smallest population?

c) Name the planet with the greatest diameter.

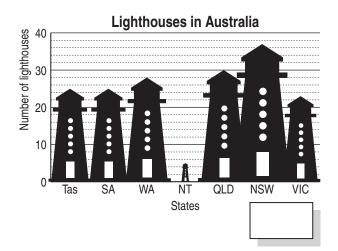

**d)** What is the weight of a newborn giraffe? [Give your answer to the nearest ten.]

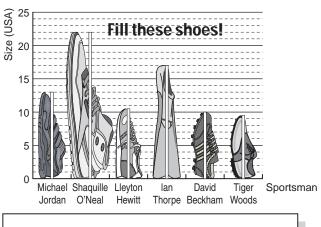

### Skill 21.6 Interpreting bar graphs (2).

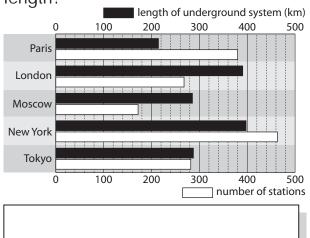

e) How many more lighthouses are there in Queensland than Victoria?

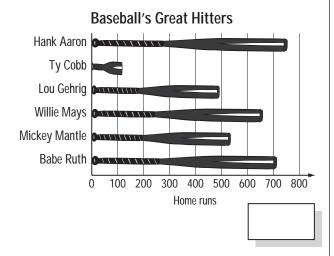

g) Who is closest to filling Shaquille O'Neals' one shoe with two shoes?

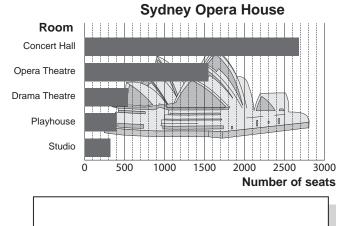

i) The underground railway system in which city has nearly the same number of stations as kilometres in its length?

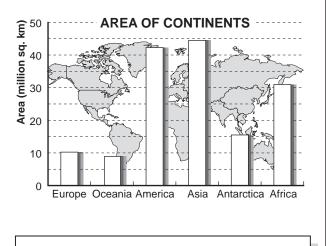

f) How many of baseball's great hitters have made over 700 home runs?

h) Harry booked the 398th and last seat in the room. Which part of the Sydney Opera House was Harry in?

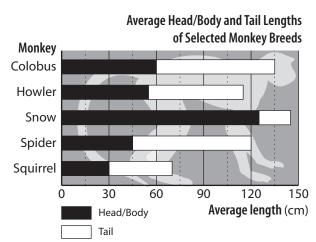

j) Which continent is closest to 15 million square kilometres in area?

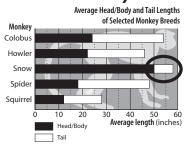

#### Skill 21.7 Interpreting multiple stacked bar graphs.

**Q.** Which of these monkeys has the shortest average tail length?

A. Snow monkey

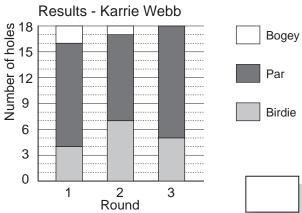

Check the scale along the base of the graph. The shorter the tail length, the shorter the bar.

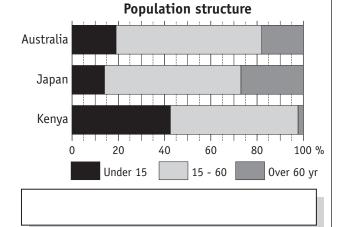

Check the key. The white bars represent the tail. The shortest white bar is beside the snow monkey.

a) In which round of the 2013 Australian Masters did Karrie Webb score the least pars?

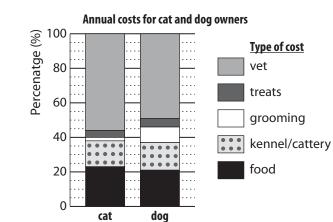

b) Which of the 3 countries shown has the largest percentage of under 15 year olds in their population structure?

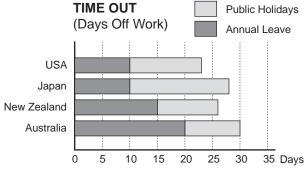

c) Which country has the greatest number of public holidays?

Which expense is greater than the cost of food for both dog and cat owners?

Skill 21.8 Recognising the relative likelihood of an event.  MM5 11 22 33 44  MM6 11 22 33 44					
Q.	Which alternative is closest in meaning to the expression "Par for the course"?  A) certain  B) likely  C) impossible	A.	Consider each alternative. Par on a golf course is set so that 'some' people can achieve it. Par is neither certain, nor impossible.		
a)	Choose the best phrase (is likely to / is unlikely to / will not) to complete this statement:  "The moon will not collide with the Earth tonight."	b)	Which alternative is closest in meaning to the expression "Find a needle in a haystack"?  A) occurs about half the time B) not common C) extremely rare		
c)	Which alternative is closest in meaning to the expression "Skating on thin ice"?  A) most likely to succeed B) unlikely to succeed C) certain to succeed	d)	Which alternative is closest in meaning to the expression "It's a toss up"?  A) 50 - 50 chance B) unlikely C) impossible		
e)	Which alternative is closest in meaning to the expression "Fat chance"?  A) 50 - 50 chance  B) unlikely  C) certain	f)	Choose the best phrase (is certain to / is likely to / is unlikely to / will not) to complete this statement: "The Southern Cross be in the Southern sky."		
g)	Choose the best phrase (is certain to / is likely to / is unlikely to / will not) to complete this statement:  "A Russian  win a Commonwealth Games gold medal."	h)	Choose the best phrase (is certain to / is likely to / is unlikely to / will not) to complete this statement:  "Beethoven have played the piano."		

Sk	ill 21.9	Finding the number of	objects to a	ach	ieve a given outcome.	MM5 11 22 3 <mark>3</mark> 44 MM6 11 2 <mark>2</mark> 33 44
Q.	ARC Letters a many le	ontains the letters HITECT  Ire drawn at random. H  Iters do you need to pic  to be certain you can m  IR?	ow k from	A.	It is possible to pick these lett H, I, T, E, T Then it is possible to pick the C, C The next pick will either be a A or an R and still the word CAR cannot formed. Therefore all 9 letters must be be certain that the word CAR	se letters:  n of be e picked to
a)	20-cent of the sma to take of	e six 10-cent coins and tooins in your pocket. Wallest number of coins your pocket to be at least one of each contact.	hat is ou need certain	b)	In the game of Mahjong there 16 wind tiles, 4 each of North East and West. If the tiles are face down on the table, how do you need to select to be sechoose at least one East wind?	, South, e turned many tiles
c)	work. W light bul	e 10 light bulbs and 3 de hat is the smallest num bs you must check to be of having a good one?	ber of	d)	There are 6 orange, 8 blue as flippers in the swimming bag many flippers must you take bag, without looking, to be su have a pair of orange flipper	g. How out of the ire you
e)	back of closet is runners	e six pairs of runners in Mike's closet. Because dark, how many individent the take out of the sure he has a matchingrs?	the dual closet	f)	A shop keeper has six green pads, four red pads and two pads in the store room. Ther power failure and he reache room in the dark. How many must he take out to be certain having at least two green cricket pads?	white e is a es into the pads
g)	M E A Letters a many le	ontains the letters SUREMENT  The drawn at random. Heters do you need to picton to be certain you can meed.	ow k from	h)	A bag contains the letters MISSISSIPPI Letters are drawn at random many letters do you need to the box to be certain you car word SIP?	pick from

- Q. A bag contains 2 white marbles and 12 green marbles. What is the chance that the first marble drawn will be white?
  - A) impossible
  - B) unlikely
  - C) likely
  - D) certain

#### A. *E*

Only 2 of the 14 marbles are white. Only 2 out of 14 draws will give a white marble.

It is not impossible but it is unlikely that with your first draw you will pick a white marble.

There are 12 chances to draw a green marble.

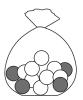

- a) In a lotto draw, balls numbered 1 to 50 are mixed together. A machine then randomly selects balls numbered 8, 14, 2, 26 and 42. Is the sixth number drawn:
  - A) more likely to be odd than even,
  - B) more likely to be even than odd or
  - C) just as likely to be odd as even?

- b) A bag contains 4 white marbles and 4 green marbles. What is the chance that the first marble drawn will be orange?
  - A) impossible
  - B) unlikely
  - C) likely
  - D) certain

- c) In a lotto draw, balls numbered 1 to 50 are mixed together. A machine then randomly selects balls numbered 8, 14, 2, 21 and 17. Is the sixth number drawn:
  - A) more likely to be more than 25,
  - B) more likely to be less than 25 or
  - C) just as likely to be less than 25 as more than 25?
- d) A bag contains 8 white marbles and 4 green marbles. What is the chance that the first marble drawn will be white?
  - A) impossible
  - B) unlikely
  - C) likely
  - D) certain

- e) A pack contains 5 white, 9 purple, 6 green and 3 orange jelly beans. What is the chance that the first jelly bean taken will be purple?
  - A) impossible
  - B) unlikely
  - C) likely
  - D) certain

- f) Amanda has six \$1 coins and twelve \$2 coins in her pocket. What is the chance that the first coin she takes out will be a \$1 coin?
  - A) impossible
  - B) unlikely
  - C) likely
  - D) certain

### Skill 21.11 Calculating the probability of a simple event (1).

# **Probability of an event** = $\frac{number\ of\ favourable\ outcomes}{number\ of\ possible\ outcomes}$

- Find the number of favourable outcomes for the event.
- Find the total number of possible outcomes.
- Divide the number of favourable outcomes by the number of possible outcomes.
- Q. What is the probability of rolling a number greater than 2 with one roll of a die? [Give the answer as a fraction in its simplest form.]

A.  $\frac{2}{3}$ 

Event: rolling a number greater than 2 Favourable outcomes (FO): 4

(rolling 3, 4, 5 or 6)

Possible outcomes (PO): 6

(rolling 1, 2, 3, 4, 5, or 6)

Probability: 4 out of 6

or  $\frac{4^{\div 2}}{6_{\div 2}} = \frac{2}{3}$ 

a) What is the probability of drawing a Queen from a standard deck of playing cards? [Give the answer as a fraction in its simplest form.]

$$\frac{FO}{PO} = \frac{4}{52} = \frac{1}{13}$$

b) What is the probability of throwing a dart inside an 11-point area when you hit the dart board? [Give the answer as a fraction in its simplest form.]

$$\frac{FO}{PO} = \frac{3}{12} + 3$$

c) Each of the letters in PROBABILITY is put into a bag. If a letter is randomly selected, what is the probability of choosing a consonant?

[Give the answer as a fraction in its simplest form.]

d) A money bag contains twenty 50-cent coins and sixty 10-cent coins. A coin is randomly selected. What is the probability of a 50-cent coin being selected? [Give the answer as a fraction in its simplest form.]

 $\frac{FO}{PO} =$ 

# Skill 21.11 Calculating the probability of a simple event (2).

e) A spinner is spun. What is the probability that it will stop on an even number? [Give the answer as a fraction.]

A spinner is spun. What is the f) probability that it will stop on an odd number? [Give the answer as a fraction.]

$$\frac{FO}{PO} =$$

g) A box has 10 chocolate, 10 plain and 12 creamed biscuits. If a biscuit is randomly selected from the box, what is the probability of choosing a plain biscuit? [Give the answer as a fraction.]

$$\frac{FO}{PO} =$$

h) A deck of cards has 5 navy, 5 yellow and 5 black cards. A card is randomly picked from the deck. What is the probability of a black card being picked? [Give the answer as a fraction.]

$$\frac{FO}{PO} =$$

What is the probability of rolling a i) number less than 5 with one roll of a die? [Give the answer as a fraction.]

$$\frac{FO}{PO} =$$

What is the probability of rolling an even number with one roll of a die? [Give the answer as a fraction.]

$$\frac{FO}{PO} =$$

**k)** Ben and 11 other athletes are racing in the 800 m event. What is the probability that Ben will win one of 3 medals? [Give the answer as a fraction.]

Janet bought 20 raffle tickets. If there are 200 tickets altogether, what is the probability that one of her tickets will win? [Give the answer as a fraction.]

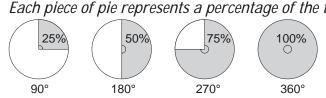

Γ		$\neg$	
L			

## Skill 21.12 Interpreting pie charts.

Consider each section of the pie chart as a sector of a circle (pie).

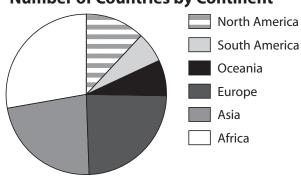

#### **PIE CHARTS**

Each piece of pie represents a percentage of the total.

**Q.** Which continent has the least number of countries?

# **Number of Countries by Continent**

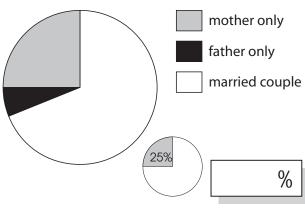

#### South America

Look for the smallest sector of the circle.

South America is slightly smaller than Oceania.

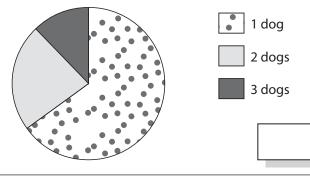

What percentage of children in the USA live with their mother only?

## **Child Population by Household USA**

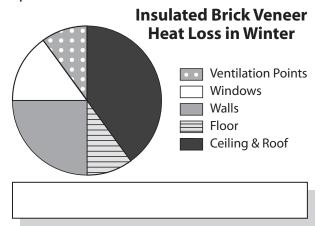

If you were one of the 65 000 000 households in the USA to have dogs as a pet, how many are you most likely to have?

### **Households With Dogs**

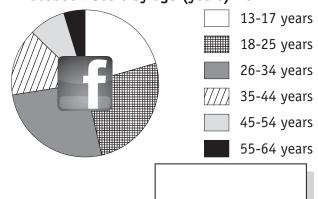

**b)** Which part of an insulated brick veneer home is responsible for one quarter of the heat loss in winter?

d) Which age group accounts for closest to 20% of all facebook users?

# Facebook Users by age (years) 2011

# **GLOSSARY**

TERMS	DEFINITIONS	EXAMPLES
abacus	Beads on a frame used for counting and calculating.	T H T O
acute angle	• An <i>angle</i> measuring less than 90°.	90° 0°
add (+)	• To join together.	If you add together the number of cows, there are 3.
addition	• The <i>operation</i> of finding the total or sum of two or more numbers to make one number.	Adding 15 and 6 we reach a total (sum) of 21. 15 + 6 = 21
am (ante meridiem)	• The <i>time</i> from midnight to midday (morning).	
analogue clock	• A clock or watch that has rotating hands and shows 12 <i>hour time</i> .	11 12 1 2 2 9 8 8 4 4 7 6 5 4 9
angle	<ul> <li>The amount of turning between two straight lines that are fixed at a point.</li> <li>An angle is measured in <i>degrees</i>.</li> </ul>	
annual	• Happening once a year.	REAL NEW LEAD
anticlockwise	• Moving in the <i>opposite direction</i> to the hands on a clock.	
approximate	<ul><li> Very close to the actual size.</li><li> To estimate by rounding off.</li></ul>	If you have \$24.85 in your wallet, you can say you have approximately \$25.00.

area	<ul> <li>The amount of surface covered by a 2D-shape.</li> <li>Area is measured in square units e.g. square centimetres (cm²) or square metres (m²).</li> </ul>	The area of a rectangle is calculated by multiplying length by width:  A = Iw A = 4 × 2 A = 8  Area = 8 square units  4 units
axis of symmetry	• (pl. axes) See line of symmetry.	Axis of symmetry
backwards	<ul><li>Away from your front.</li><li>In reverse of the usual way.</li></ul>	
bar graph	Uses bars to show quantities or numbers so they can be easily compared.	Favourite Holiday  To get 100  Favourite Holiday  To get 100  Page 100  Type  Camping is the favourite holiday.
base	A line or surface on which a figure stands.	base
between	• At a place bounded by two or more places.	Canberra is between Sydney and Melbourne.  Canberra Sydney  Melbourne
bi	• (or <b>di</b> ) Prefix meaning two.	A bicycle has 2 wheels.
brackets ()	• A <i>pair</i> of symbols used to group mathematical expressions together.	$(20 \div 5) + 5 = 9$ Brackets group 20 divided by 5
calculate	• To work something out.	3+5+6=14

calendar	• A time chart that tells us what day, week, month and year it is.	OCTOBER THE PROPERTY OF THE PR
calibration	• A mark on a <i>scale</i> .	0 1 2
capacity	• Or <i>volume</i> , is the measure of the amount of liquid a container can hold.	A jug has capacity because it can hold liquid, a brick does not.
cardinal number	• A whole number that shows the amount.	1, 2, 3, 4, 5 are cardinal numbers.
carry over	• The amount passed to the next <i>place value</i> in an algorithm.	1 4 6 over + 4 7
Cartesian plane	• A plane divided into four quadrants by a horizontal line called the x-axis and a vertical line called the y-axis.	Y Quadrant 2 Coordinate (-3,2)  2  1  1  -3 -2 -1 (0,0) Origin  -2  Quadrant 3  Quadrant 4
cent (¢)	• The <i>smallest unit</i> of money. 100 cents = 1 <i>dollar</i>	5 cents 10 cents 20 cents 50 cents
century	• A unit of time equal to 100 years.	The 21st century will go from 2001 until 2100.

	Authorised for the use of that I	
certain	<ul><li>Being sure.</li><li>Will definitely happen.</li></ul>	death taxes
chance	• The possibility of getting a particular result.	Roll the die! There's a 1 in 6 chance of rolling a 2!
change (money)	• The leftover money you are given back after buying something.	\$0.70 change from \$1
clockwise	• Moving in the direction of the hands on a clock.	
closest	• Nearest to.	The son is closest to the mother.
column	• A vertical line of data in a table.	Netball: Aust v NZ    NZ   Shooting chances   Actual   Success with su
compass	• An instrument that shows direction.	**************************************
composite number	• A <i>positive integer</i> that has <i>factors</i> other than just 1 and the number itself.	12 is a composite number. 12 = 1 × 12 = 2 × 6 = 3 × 4 The factors of 12 are: 1,2,3,4,6,12
commutative property (of addition and multiplication)	• Rule: When <i>adding</i> or <i>multiplying</i> , no matter how the numbers are ordered, the answers will always be the same.	$a + b = b + a$ $1 + 3 = 3 + 1$ $4 = 4$ $a \times b = b \times a$ $3 \times 4 = 4 \times 3$ $12 = 12$ "\Lambda"

cone	• A <i>solid</i> with one circular base and one <i>vertex</i> .	vertex
consecutive numbers	Numbers that follow each other.	4 and 5 are consecutive numbers.
convert	Change from a unit to another.	Five \$20 notes can be converted to a \$100 bill.
coordinates	<ul> <li>Two numbers that locate a <i>point</i>.</li> <li>The <i>first</i> number tells you the position of a point along the <i>x</i>-axis. The <i>second</i> tells you the position of a point along the <i>y</i>-axis.</li> <li>They are written in <i>brackets</i> with a comma between.</li> </ul>	(4,2) are the coordinates of a point located 4 units to the right and 2 units upward.  Y-axis  (4,2)  (4,2)  (4,2)  (4,2)
counting number	• Any of the <i>whole numbers</i> from zero onwards.	0, 1, 2, 3, 4, 5 are counting numbers.
cross section	• The face that results when an object is cut through.	rectangle
cube	• A solid with six identical square faces.	
cylinder	• A <i>solid</i> with two <i>parallel</i> circular ends of the same size.	
data	• Collection of information that can include facts, numbers or measurements.	HOSPITAL EMERGENCIES (MAY)  Sopposition of the second seco
day	• A unit of time equal to 24 hours.	A day starts and ends at midnight.
deca	Prefix meaning ten.	Decathlon is an athletics contest with ten events.

	Authorised for the use of: MAIT	LAND HIGH SCHOOL 2016
decade	• A unit of time equal to 10 years.	2000 to 2009 make a decade.
decagon	• A shape with 10 sides.	
decimal number	• A number based on the ten <i>place value</i> system.	The decimal number 4.3 represents: 4 - ones 3 - tenths. OR 4 and 3 tenths.
decimal place	units tenths tenths thundredths thousandths	7 is in the tenths place. 6 is in the hundredths place. 3 is in the thousandths place.
decimal point (.)	• A point that separates the <i>units</i> and <i>tenths</i> in a <i>decimal number</i> .	2.5 is a decimal number where the 2 and the 5 are separated by a decimal point.
decrease	• To make smaller.	8 must decrease by 5 to become 3.
deduct	• To take away.	If you deduct 1 from 3 there are 2 left. 3 – 1 = 2
degree (°)	• A <i>unit</i> used to measure the amount of turn in an <i>angle</i> .	The measure of this angle is 45°
degrees Celsius (°C)	• A unit used to measure temperature.	The thermometer shows 14°C.
denominator	• The number below the fraction bar in a fraction.	3 denominator - how many equal parts in one whole

diagonal	• A straight line inside a <i>polygon</i> joining any two corners that are not next to each other.	diagonal
die	• (pl. <b>dice</b> ) A numbered <i>cube</i> that is used in games.	
difference	<ul> <li>The result when a number is <i>subtracted</i> from another number.</li> <li>The amount by which one number is bigger or smaller than another number.</li> </ul>	The difference between 5 and 3 is 2. 5 – 3 = 2
digit	• Any of the first ten <i>whole numbers</i> from 0 to 9.	There are 10 digits: 0, 1, 2, 3, 4, 5, 6, 7, 8 or 9.
digit sum	• The <i>sum</i> of the <i>digits</i> in a number.	124 has a digit sum of 7. 1 + 2 + 4 = 7
digital clock	• A clock that uses only numbers to show the <i>time</i> . (No hands!)	2:55
dimension	• A measure of size.  A two dimensional shape (2D shape) has length and width.  A three dimensional shape (3D shape) has length, width and height.	2D shape    W   W   W   W   W   W   W   W   W
direction	The way something is placed or pointing.	North, east, south, west, up, down, sideways, backwards and forwards.
distance	• The <i>length</i> between two points.	The distance between the fish is 3 metres.
divide (÷)	• To share into groups.	These 6 cows are divided into 2 groups. $6 \div 2 = 3 \text{ in each group}$
divisible	• Can be divided without a remainder.	$20 \div 2 = 10$ with 0 remainder. So 20 is divisible by 2.

	Authorised for the use of: MALL	LAND HIGH SCHOOL 2016
division	• The <i>operation</i> of sharing or grouping a number into <i>equal</i> parts.	The division 6 ÷ 2 = 3 means: How many groups of 2 can 6 be divided into? OR How many groups of 2 can be taken from 6 before none remain? ⇒3 groups of 2.
divisor	• The <i>second</i> number written in a <i>division</i> . In a <i>fraction</i> the divisor is the <i>denominator</i> .	$8 \div 4 = 2 \qquad \text{OR} \qquad \frac{8}{4} = 2$
dollar (\$)	• A <i>unit</i> of money. 1 dollar = 100 <i>cents</i>	5 dollars 10 dollars  20 dollars 50 dollars  100 dollars
double	<ul><li> Twice as much.</li><li> Multiplied by two.</li></ul>	Double 4 is: 4 + 4 = 8 OR 4 × 2 = 8.
east	• A compass direction.	The sun rises in the east.
edge	• Where two faces of a solid meet.	face edge
eighth	• The position after <i>seventh</i> .	1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th
enlargement	To reproduce and make bigger.	The original triangle has been enlarged to make it 2× bigger.
equal (=)	• Exactly the same in value or size.	100 centimetres is equal to 1 metre: 100 cm = 1 m

equation	• A mathematical sentence formed by placing an <i>equals</i> sign (=) between two <i>expressions</i> .	$6 \times 2 = 9 + 3$ is an equation.
equivalent fractions	• Fractions that represent the same number.	$\frac{2}{16}$ and $\frac{8}{64}$ are equivalent fractions. They both equal $\frac{1}{8}$ .
estimate	• To make a close guess based on <i>rounding</i> .	48 + 21 = ? By rounding to $50 + 20$ , the estimation of the sum is $70$ .
evaluate	• To work out the value.	$21 \div x = 3$ Evaluate for x. $x = 7$
even numbers	<ul> <li>A whole number that can be divided by two.</li> <li>Even numbers end with 0, 2, 4, 6 and 8.</li> </ul>	134 is an even number.  134   431 is not an even number.  431   43
event	• Possible <i>outcomes</i> resulting from a particular <i>experiment</i> .	Experiment: A die is rolled. Possible outcomes: Either a 5 or a 6 may result
faces of a solid	• Polygons that join on their edges to form a solid.	A rectangular prism has 6 rectangular faces.
factor	• A whole number that divides exactly into another number. See <i>divisibility tests</i> .	Because $1 \times 12 = 12$ $2 \times 6 = 12$ and $3 \times 4 = 12$ 1, 2, 3, 4, 6 and 12 are all factors of 12.
fifth	• The position after <i>fourth</i> .	1st, 2nd, 3rd, 4th, <b>5th</b>
first	Placed before anything else.	The first athlete to cross the finish line won the gold medal.
flip	• To turn across a line so the result is a mirror image. See <i>reflection</i> .	

	Authorised for the use of: MAIT	LAND HIGH SCHOOL 2010
fortnight	• A <i>unit</i> of <i>time</i> equal to 2 whole <i>weeks</i> or 14 <i>days</i> .	OCTOBER
forwards	<ul><li>In the <i>direction</i> of your front.</li><li>The usual way.</li></ul>	
fourth	• The position after <i>third</i> .	1st, 2nd, 3rd, <b>4th</b>
fraction	<ul> <li>Part of a group.</li> <li>Part of a whole.</li> <li>A number in the form <sup>a</sup>/<sub>b</sub> (b ≠ 0) where a is the <i>numerator</i> and b is the <i>denominator</i>.</li> <li>Fractions can be <i>proper fractions</i> or <i>improper fractions</i>.</li> </ul>	5 out of a group of 8 dots are circled.  1 half of a whole orange.  1 \frac{1}{2}
front view	<ul> <li>What you see of an object looking from a frontal perspective.</li> <li>Three-dimensional objects have 3 views: front, top and side.</li> </ul>	front
gram (g)	• A unit of measurement for mass equal to 1000 milligrams.	250 g of butter.
graph	• A diagram that shows a collection of data.	Homework time  Fig. 70  Homework time  Fig. 70  Homework time  Mon Tues Wed Thurs  Day
greater than (>)	• A symbol showing which is bigger.	10 > 2 means that 10 is greater than 2.
grid reference	• A pair of letters and/or numbers that describe location within a grid. See also <i>coordinates</i> .	4 3 2 1 A B C D E

GST (money)	• An abbreviation for the Goods and Services Tax which is applied to certain purchases at a designated <i>rate</i> .	The standard GST in Australia is 10%. If the price of an item is \$150 excluding GST then its GST inclusive price would be \$165.
half	• (pl. halves) One of two equal parts expressed as a fraction.	One half is 1 of 2 parts of one whole pizza:  \[ \frac{1}{2} \]
hectare (ha)	• A unit of area equal to 10000 square metres (100 m × 100 m).	The field measures 2 hectares.
hedron	• (pl. hedra) Face.	Polyhedron - A solid object that has polygons as faces.
height	• The <i>vertical</i> distance from top to bottom.	76 m
hepta	Prefix meaning seven.	See heptagon
heptagon	• A polygon with 7 sides.	Heptagon Regular heptagon
hexa	Prefix meaning six.	See hexagon
hexagon	• A polygon with 6 sides.	Hexagon Regular hexagon
hexagonal prism	• A three dimensional shape. Two identical bases are hexagons. Six faces are rectangles.	OR OR
hexagonal pyramid	• A three dimensional shape. The base is a hexagon. Six faces are triangles.	
horizontal line	• Parallel to the horizon.	<b>←</b>

	Authorised for the use of. WAT	LAND HIGH SCHOOL 2016
hour (h)	• A unit of time equal to 60 minutes.	One hour is the amount of time between 1 o'clock and 2 o'clock.
hundreds	• The place value between tens and thousands.	1825.763 has 8 hundreds.  thousands the support of
hundredth	• One part out of 100 parts of one whole.	
hundredths	• The <i>place value</i> between <i>tenths</i> and <i>thousandths</i> .	1825.763 has 6 hundredths.  spensor of the support
identity element (for addition)	Rule: The <i>sum</i> of any number and zero equals that number.  • Zero is the identity element for <i>addition</i> .	a + 0 = a $OR$ $0 + a = a3 + 0 = 3$ $0 + 3 = 3$
identity element (for multiplication)	Rule: The <i>product</i> of any number and one equals that number.  • One is the identity element for addition.	$a \times 1 = a$ $OR$ $1 \times a = a$ $3 \times 1 = 3$ $1 \times 3 = 3$
impossible	• Cannot happen.	Christmas Day - 4th of April?
improper fraction	• Any <i>fraction</i> in which the <i>numerator</i> is greater than or equal to the <i>denominator</i> .	$\frac{9}{8}$ the numerator is 9 the denominator is 8 $9 \ge 8$ so $\frac{9}{8}$ is an improper fraction.
increase	• To make larger or grow in size.	8 must increase by 5 to get to 13.
interior angle	• An angle inside a polygon.	Interior angle

intersecting lines	_		
integer (ℤ)	<b>teger (<math>\mathbb{Z}</math>)</b> • Any negative number, zero or positive number.		
inverse of an operation			
kilogram (kg)	logram (kg) • A unit of weight equal to 1000 grams.		
kilometre (km)	• A unit of distance equal to 1000 metres.	The distance from Melbourne to Sydney is 900 km.	
largest to smallest	• Ranking in order from the biggest to the littlest.	1st 2nd 3rd 4th	
lateral faces	• The <i>vertical</i> surfaces on a solid.	A rectangular prism has 4 lateral faces.	
leap year	• A <i>year</i> with 366 <i>days</i> that falls every <i>fourth</i> year and includes the 29th of February as the extra day.	A leap year is divisible by 4. 2012 will be a leap year.	
left	• The <i>direction</i> to the <i>west</i> of your body if you are facing <i>north</i> .	W left right E	
length	<ul><li> The <i>distance</i> from one end to the other.</li><li> How long a shape is.</li></ul>	← /= length →	

	Authorised for the use of: MAII	EI II (D III OII DEIIO OE 2010
less than (<)	• A symbol showing which is smaller.	2 < 10 means that 2 is less than 10.
likely	Will probably happen.	This spinner is likely to land on a Z.
line of symmetry	• A line that divides a shape so that one <i>side</i> is a mirror image of the other. Both sides match exactly when folded.	Line of symmetry
litre (L)	• A unit of capacity equal to 1000 millilitres.	1 litre of milk.
location	• The exact place, where something is situated.	X
longest	• Having the biggest <i>length</i> .	The reticulated python of SE Asia regularly exceeds 6.25 m. The record length is 10 m for a specimen shot in Celebes, Indonesia in 1912.
magic square	<ul> <li>A square grid filled with numbers</li> <li>The <i>sum</i> of the numbers in every <i>row</i>, <i>column</i> and <i>diagonal</i> is the same.</li> </ul>	A 9 2 3 5 7 8 1 6 Rows: 4 + 9 + 2 = 3 + 5 + 7 = 8 + 1 + 6 = 15 Columns: 4 + 3 + 8 = 9 + 5 + 1 = 2 + 7 + 6 = 15 Diagonals: 4 + 5 + 6 = 2 + 5 + 8 = 15
map	• A diagram of a region showing its position in the world.	South Pacific  Pacific Ocean  Pacifi

mass	• The amount of matter in an object.	The mass of 3 oranges is about 1 kg.
maximum	• The highest value.	The maximum speed in a residential area is 50 kilometres per hour.
metre (m)	• A unit of length equal to 100 centimetres.	Track distances are measured in metres.
millilitre (mL)	<ul><li>A unit of capacity.</li><li>1000 millilitres is equal to 1 litre.</li></ul>	Medicines are measured in mL.
millimetre (mm)	<ul><li>A unit of length.</li><li>1000 millimetres is equal to 1 metre.</li></ul>	Timber length is measured in millimetres.
million	• A thousand thousands.	1000000
minimum	• The lowest value.	The minimum temperature reached yesterday was 25°C.
minus (–)	• Another word for <i>subtract</i> . To take away.	\$20 minus \$5 is \$15. 20 - 5 = 15
minute (min)	• A unit of time equal to 60 seconds.	One minute has 60 seconds.
mixed number	• The <i>sum</i> of a <i>whole number</i> and a <i>fraction</i> less than one.	$3\frac{5}{7}$ is a mixed number.
month	• A unit of time equal to 28, 29, 30 or 31 days.	There are 12 months in a year starting with January.
morning	• The early part of the <i>day</i> ending at 12 noon.	
multiple	• A multiple of a <i>whole number</i> is the <i>product</i> of that number with any non-zero whole number.	The multiples of 2 are 2, 4, 6, 8, 10, 2 × 1 = 2 2 × 2 = 4 2 × 3 = 6 etc.

mandalin lin nations		LAND HIGH SCHOOL 2010		
multiplication	• An <i>operation</i> where a number is added to	2+2+2+2+2=10  or		
	itself a number of times.	$5 \times 2 = 10$		
multiply (x)	• To find the <i>total</i> of a number of identical	Three lots of 2 cows is 6.		
	groups.	$3 \times 2 = 6$ or $2 + 2 + 2 = 6$		
negative number	• A number that is less than zero.	-1, -2, -3, -4, -5, are negative numbers.		
net	• The pattern you cut out to form a 3D shape.	Net of a cube.		
ninth	• The position after eighth.	1st, 2nd, 3rd, 4th, 5th, 6th, 7th, 8th, <b>9th</b>		
nona	Prefix meaning nine.	See nonagon		
nonagon	• A polygon with 9 sides.	Nonagon Regular nonagon		
north	• A compass direction.	N **		
northeast	• A compass direction.	NE		
northwest	• A compass direction.	NW		
number line	• An evenly marked <i>line</i> that shows position of <i>numbers</i> .	-4 -3 -2 -1 <b>0</b> 1 2 3 4		
number sentence	• A sentence using numbers and operations.	"Mary had four cats and two dogs. How many pets did she have?" Number sentence: 4 + 2 = 6		
numeral	• A symbol used to represent a number.	Arabic numerals: 1, 2, 3, 4, 5 Roman numerals: I, II, III, IV, V		

numerator	• The number above the fraction bar in a <i>fraction</i> .	numerator - how many parts are counted (three fifths)			
oblique line	• A line at an <i>angle</i> to the horizon.				
obtuse angle	• An <i>angle</i> measuring greater than 90° and less than 180°.	90° 140° 0° ——180°			
octa	• Prefix meaning eight.	An octopus has 8 legs.			
octagon	• A polygon with 8 sides.	Octagon Regular octagon			
odd numbers	• A whole number that is not divisible by 2.	Odd numbers end with 1,3,5, 7 and 9.			
of	• Means to <i>multiply</i> .	Whenever you say or read 'of' then multiply!			
once	On one occasion.	Just this time!			
operation	• A mathematical process performed according to certain rules.	There are four basic operations in arithmetic: addition 3 + 12 subtraction 3 - 1 multiplication 1 × 5 division 6 ÷ 3			
opposite	• The equivalent position but on the other side.	The opposite: left/right +4/-4			
order	Placing a group in a special arrangement.	The aliens are arranged in order of height.			

	Authorised for the use of. WAT			
order of operations	<ul> <li>The order of doing <i>operations</i>.</li> <li>1) <i>Simplify</i> inside all <i>brackets</i>.</li> <li>2) Calculate × and ÷ from left to right.</li> <li>3) Calculate + and – from left to right.</li> </ul>	Calculate $4 + 3 \times (6 - 2)$ by 1) = $4 + 3 \times 4$ 2) = $4 + 12$ 3) = 16		
ordinal numbers	• A whole number that shows position.	1st, 2nd, 3rd, 4th, 5th are ordinal numbers.		
orientation	• Position relative to <i>direction</i> .	The tornado is coming from the west.		
outcome	• Result.	The outcome (result) of $2 \times 4$ is 8		
pair	• Two together.			
parallelogram	• A special quadrilateral.  Opposite sides are parallel lines.  Opposite sides are equal in length.			
pattern	• Numbers or objects that are arranged following a rule.	\\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\		
penta	• Prefix meaning five.	See pentagon		
pentagon	• A polygon with 5 sides.	Pentagon Regular pentagon		
pentagonal prism	• A three dimensional shape. Two identical, parallel bases are pentagons. Five faces are rectangles.	OR OR		
pentagonal pyramid	• A three dimensional shape.  Base is a pentagon.  Five faces are triangles.			
per	<ul><li>For each.</li><li>Can be written as a forward slash (/).</li></ul>	5 kilometres per hour or 5 km/h means 5 km travelled for each hour.		
percentage	<ul><li>Out of 100</li><li>'Per' means for each, 'cent' means 100.</li></ul>	$59\% = \frac{59}{100} = 0.59$		

•	perimeter							ne length of eter = 4 + 5 5 cm 4 cm			
-	perspective		• The appeand position		of objects	affected	by siz	ze			
	pictograph	represent data.					y Sales in Wint				
	• A graph that represents data as a sector of a circle.				Nobel Pr (Total o		Chemistry Medicine / Physiology Literature Peace Peace Physics				
place holder			• Minds a spot in a number.					holdei algorit	13 4 × 2 1 7 3 4 6 8 0 Zero	place ultiplication o as a o e holder	
	place value		Value according to position in a number.					954 5 is in the tens place 5 has a value of 50			
	million		hundreds of thousands	tens of thousands	thousands	hundreds	tens		tenths	hundredths	thousandths

plane • A flat surface.											
plus (+) • Another word for <i>addition</i> . To add.				2 cows 5 cows 2 + 3 =		s gives you					

pm (post meridiem) • The time for		om midday to midnight	Every night Jimmy starts reading at 9 pm.			
polygon	sides are line	o-dimensional shape for segments. Ses and angles.	r which all	'Poly' means many 'gon' means angle. triangle (3 angles)		
<b>polygon</b> (many angles)		regular polyg		Number of Sides	Number of Interior angles	
Triangle 3 angles	2 3	Equilateral triangle		3	3	
Quadrilateral 4 angles		Square		4	4	
Pentagon 5 angles		Regular pentagon		5	5	
Hexagon 6 angles		Regular hexagon		6	6	
Heptagon 7 angles		Regular heptagon		7	7	
Octagon 8 angles		Regular octagon		8	8	
Nonagon 9 angles		Regular nonagon		9	9	
<u>Deca</u> gon 10 angles		Regular decagon		10	10	
polyhedron	Four or more	ensional shape. faces. their faces, edges and	vertices.	'Poly' means ma 'hedron' means tetrahedron (4	faces.	
position	• Where some around it.	ething is in relation to t	hings	In, on, under, be	chind, next to.	
positive numbers	• A number th	nat is <i>greater than</i> zero.	+1, +2, +3, +4, +5, are positive numbers.			
possible	• Can happen	•		landing on a head		

power	r	• An expression, such as 4 (4) is multiplied by itself a equal to the <i>exponent</i> (3).	$4^3$ or 4 to the power of 3 is $4 \times 4 \times 4 = 64$				
power	rs of ten	• 1 followed by a certain r	number	of zero	S.	10, 100, 1000, 10 000 are powers of 10	)
previo	ous	• The one before.				If the current year is the previous year is	
prime	number	<ul> <li>A whole number that has 1 and itself.</li> <li>1 is not a prime number.</li> </ul>	59 is a prime number only factors are 1 are 1 are 1 are 1 and 100 are: 2, 3, 5, 7, 11, 13, 17, 131, 37, 41, 43, 47, 53, 71, 73, 79, 83, 89 and	nd 59. between 9, 23, 29, 59, 61, 67,			
prism		• A three dimensional shap Two parallel bases are the					
pı	rism	Properties		lumber o		Examples	
•		·	Faces	Edges	Vertices		
Triang	ular Prism	Bases are triangles Lateral faces are rectangles	5	9	6		
Square	Prism	Bases are squares Lateral faces are rectangles	6	12	8		
Rectan	gular Prism	Bases are rectangles Lateral faces are rectangles	6	12	8	OR /	
Pentag	jonal Prism	Bases are pentagons Lateral faces are rectangles	7	15	10	OR OR	
Hexago	onal Prism	Bases are hexagons Lateral faces are rectangles	OR .				
produ	ct	• The result when two or multiplied.	The product of 4 an $4 \times 5 = 5 \times 4 = 20$	d 5 is 20:			
profit		• What is gained, less any Profit = Revenue – Expen	Revenue from a bus activity is \$20. If the expenses are \$ the profit would be	\$15 then			

		Authorise	d for the us	e of: MAITI	LAND HIGH SCHOOL 2016
proper fraction	• Any fraction in which the than the denominator.	$\frac{5}{8}$ the numerator is 5 8 the denominator is 8 5 < 8 so $\frac{5}{8}$ is a proper fraction.			
protractor	• A semi-circular tool used There are 180° on a protra	egrees.	20 00 100 10 100 100 100 100 100 100 100		
pyramid	• A three dimensional shap One base is a polygon. All other faces are triangle point called vertex. A pyramid is named for the				
		Ni	umber o	f	
pyramid	Properties	Faces	Edges	Vertices	Examples
Triangular Pyramid	Base is a triangle Lateral faces are triangles	4	6	4	
Square Pyramid	Base is a square Lateral faces are triangles	5	8	5	
Rectangular Pyramid	Base is a rectangle	5	8	5	

• •		Number of

Pentagonal Pyramid	Base is a pentagon Lateral faces are triangles	6	10	6	
Hexagonal Pyramid	Base is a hexagon Lateral faces are triangles	7	12	7	
quadrant	• Any quarter of a plane of and a y-axis.	livided	by an x	-axis	Quadrant 2 Quadrant 1  -3 -2 -1 -1 -2 -3 -2 -1 -1 -1 -1 -2 -3 -3 -3 -3 -3 -3 -3 -3 -3 -3 -3 -3 -3

quadrilateral	• A polygon with 4 sides.	'Quad' means 4 'lateral' means side.		
quadrilateral	Sides	Interior angles	Diagram	
Square	4 sides of equal length	4 right angles		
Rectangle	Opposite sides of equal length	4 right angles	+ +	
Trapezium	2 opposite sides parallel			
Rhombus	4 sides of equal length and opposite sides parallel	Opposite angles equal		
Parallelogram	Opposite sides of equal length and opposite sides parallel	ength and opposite sides		
quarter		<ul> <li>One of four equal parts of a group or object</li> <li>Written as the fraction \(\frac{1}{4}\).</li> </ul>		
rectangle	• A special <i>parallelogram</i> . Four <i>right angles</i> .			
rectangular prism	• A three dimensional shap Six rectangular faces.	e.	OR	
rectangular pyramid	• A three dimensional shape One rectangular base. All the other faces are trian			
reduction	Make smaller or decrease	The original triangle has been reduced to make it 2× smaller.		
reflection	• A movement that <i>flips</i> a father that the figure is in the mire	Shape B is a reflection of shape A.		

	Fundingsed for the use of. While	LAND HIGH SCHOOL 2010	
reflex angle	• An <i>angle</i> measuring greater than 180° and less than 360°.	0° 220°180°	
regular shape	• A shape with all <i>sides</i> and all <i>angles equal</i> .  A regular hexa sides and 6 equal.  Regular h		
remainder	• The amount left over when one number cannot be <i>divided</i> exactly by another.	17 ÷ 5 = 3 with 2 remainder.	
reversible	• Able to be turned in the <i>opposite</i> way.	The process of freezing the water is reversible: water →ice →water	
rhombus	• A special parallelogram. Four equal sides. Opposite angles equal.		
right	• The <i>direction</i> to the <i>east</i> of your body if you are facing <i>north</i> .	W left right E	
right angle	• An <i>angle</i> measuring exactly 90°. It is marked with a corner.		
Roman numerals	• Numeral system invented by the ancient Romans.	I = 1	
rotation	• A movement that turns a shape about a fixed <i>point</i> (the centre of rotation) by a given <i>angle</i> (the angle of rotation).	The centre of rotation is the origin O and the angle of rotation is 90°.	

rotational symmetry	• A shape has rotational symmetry if a <i>rotation</i> of 180° or less produces an image that fits exactly on the original shape.	This shape has rotational symmetry because after a rotation of 120° it looks identical to the original.	
round	• To approximate a number to a given place value.  Look at the next digit after the given place value you are rounding to.  If this digit is less than 5, keep the digit in the given place value the same.  If this digit is greater than or equal to 5, add 1 to the digit in the given place value. Then make the digit you were looking at zero.	Round 263 to the nearest 10:  HTU Round  263 $\approx 260$ Round 268 to the nearest 10:  HTU  268 $\approx 260$ Round 268 to the nearest 10:  HTU  268 $\approx 260$	
row	• A horizontal line of data in a table.	Netball: Aust v NZ    NZ   Shooting   Actual   Success   %	
scale	<ul> <li>A key on a <i>scale drawing/map</i> that tells how the drawing's <i>dimensions</i> and life size dimensions are related.</li> <li>Set of marks on a line.</li> </ul>	If the scale on a map is 1 cm:10 m then every cm on the drawing represents 10 m in real life.	
scale drawing	• Changing the size of an object but not the shape.	A life size staple.  The staple scaled by 50%.	
second	• The <i>position</i> after <i>first</i> .	1st, <b>2nd</b>	
second (s)	• A very short unit of time.	There are 60 seconds in 1 minute.	
segment	• Two <i>points</i> and all points on the <i>line</i> between the two points. Part of a line.	Segment AB A B	
seventh	• The position after sixth.	1st, 2nd, 3rd, 4th, 5th, 6th, <b>7th</b>	

	Authorised for the use of. What I	LAND IIIOII SCHOOL 2010		
shortest	• Having the smallest <i>length</i> .  Sam is the shortest in the class.			
side	• One of the lines that form a <i>polygon</i> .	side		
side view	<ul> <li>What you see of an object looking from a side <i>perspective</i>.</li> <li><i>Three-dimensional</i> objects have 3 views: front, top and side.</li> </ul>			
simplest form of a fraction	• A <i>fraction</i> is in its simplest form when the only number that divides into both the <i>numerator</i> and the <i>denominator</i> is 1.	The simplest form of $\frac{6}{9}$ is $\frac{2}{3}$ . (Divide 6 and 9 by 3. 2 and 3 can only be divided by 1 so they can not be reduced.)		
simplify	• To reduce to the <i>simplest form</i> .	To simplify the ratio 14:6 divide both sides by 2. 14:6 simplified is 7:3.		
sixth	• The <i>position</i> after <i>fifth</i> .	1st, 2nd, 3rd, 4th, 5th, <b>6th</b>		
size	• How big an object is.	The size of the wave is 2 metres.		
slide	Move without changing direction.			
smallest to largest	• Ranking in order from the littlest to the biggest.	1st 2nd 3rd 4th		
solid	• A three dimensional shape that encloses a part of space.	OR OR		
south	• A compass direction.	N S		
southeast	• A compass direction.	SE		

sphere	• A set of <i>points</i> in space of equal distance from the central point.			
square	• A rectangle with all sides of equal length.			
square number	• A number that results from multiplying another number by itself.	$4 \times 4 = 16$ 16 is a square number.		
square centimetre	• A <i>unit</i> of <i>area</i> equal to 1 <i>centimetre</i> by 1 centimetre.	E 1 cm →		
square metre	• A unit of area equal to 1 metre by 1 metre.	= 1 m		
square prism	• A three dimensional shape. Two identical square bases. All the other faces rectangles.			
square pyramid	• A three dimensional shape. One square base. All the other faces are triangles.			
square units	• A <i>unit</i> of <i>area</i> equal to the area of a square with side lengths of 1 unit.	$A = IW$ $A = 3 \times 2$ $A = 6$ 2 units 3 units Area = 6 square units		
squared	• Multiplying a number by itself. A number raised to the second <i>power</i> .	4 squared written as $4^2$ : $4^2 = 4 \times 4 = 16$		
straight angle	• An angle measuring 180°.	0° 180°		
subtract	• To take away or minus.	If you subtract 10 from 15 you are left with 5: 15 – 10 = 5		
sum	• The result when two or more numbers are added.	The sum of 20 and 6 is 26: 20 + 6 = 6 + 20 = 26		

symmetry	• A shape has a <i>line of symmetry</i> when a line can be drawn through the shape so that one side of the shape is the mirror image of the other.	There are 3 kinds of symmetry: horizontal symmetry vertical symmetry rotational symmetry	
		Lines of symmetry	
table	• Data organised in columns and rows.	Netball: Aust v NZ           NZ Shooting chances         Actual goals         Success %           1st         9         9         100           2nd         14         13         92.85           3rd         23         20         86.95           4th         18         17         94.44	
temperature	<ul> <li>How hot or cold a thing is.</li> <li>Temperature is measured in <i>degrees</i> Celsius (°C) with a <i>thermometer</i>.</li> </ul>	100°C is the temperature at which water boils.	
tens	• The <i>place value</i> between the <i>units</i> and <i>hundreds</i> .	1825.763 has 2 tens.    Solution	
tenth	• One part out of 10 parts of one whole.		
tenths	• The <i>place value</i> after the <i>decimal point</i> between the <i>units</i> and <i>hundredths</i> .	1825.763 has 7 tenths.    thousands	
term	• A number or unknown amount.	1) +(x) = 3 terms	
tetrahedron	• A three dimensional, regular shape. The base is an equilateral triangle. Three faces are equilateral triangles.		

thermometer	• An instrument used to measure temperature.	100°C. 100°C.
third	• The <i>position</i> after <i>second</i> .	1st, 2nd, <b>3rd</b>
thousands	• The <i>place value</i> between <i>hundreds</i> and tens of thousands.	1825.763 has 1 thousand.  should be a series of the series
thousandth	• One part out of 1000 parts of one whole.	One gram is a thousandth of a kilogram.
thousandths	• The place value after hundredths.	1825.763 has 3 thousandths.  span punduseds a thousandths.  span pundused the state of the state
three dimensional (3D)	• Able to be measured in three directions namely <i>length</i> , <i>width</i> and <i>height</i> .	height width length
time	• The continuum from past to present to future.	The time is 9:25 am.
time zone	• Regions of different times around the world.  Based on Greenwich Mean Time (GMT), each 15° of longitude away from Greenwich,  England represents 1 hour of time.	NSW time is 3 hours ahead of WA time during daylight saving.  Daylight Saving Time Zones - Summer - Greenwich Mean Time +9.5 +10 Brisbane +10.5 +11 Canberra Melburne Hobart
tonne (t)	• A unit of measurement for mass equal to 1000 kilograms.	The humpback whale can weigh 58 tonnes.

top view	<ul> <li>What you see of an object looking from a top perspective.</li> <li>Three-dimensional objects have 3 views: front, top and side.</li> </ul>	top		
total	<ul><li> The whole lot.</li><li> The <i>sum</i> of two or more quantities.</li></ul>	The total of 2 and 7 and 3 is 12: 2 + 7 + 3 = 12		
transformation	• A movement of a shape in a <i>coordinate</i> plane. Types of transformations are translations, reflections and rotations.	See translation, reflection and rotation		
translation	• A movement that <i>slides</i> a shape without lifting or changing <i>direction</i> .  The shape is unchanged.			
trapezium	• A quadrilateral. Two opposite sides are parallel.	or		
tri	Prefix meaning three.	A tricycle has 3 wheels.		
trial and error	• To try repeatedly and learn from mistakes.	This sum can be solved using trial and error.  TWO +TWO FOUR		
triangle	• A polygon with 3 straight sides.			
triangular prism	• A three dimensional shape. Two identical triangular bases. Three rectangular faces.			
triangular pyramid	• A three dimensional shape. One triangular base. The other three faces are triangles.			
triple	Multiply by three.	Children × 3 = triplets!		

turn	• To rotate about a point.		
twenty-four hour time	• Time told in 24 hour lots using 4 <i>digits</i> .	Nine thirty is 0930 or 09:30 Two thirty is 1430 or 14:30	
twice	• Two times.	Sam has \$5 and Jo has \$10. Jo has twice as much as Sam.	
two dimensional (2D)	• Able to be measured in 2 directions (length and width).	width length	
uncertain	• Not sure it will happen.	It will rain tomorrow?	
unit	• One.	The unit of measurement for length is metre (m).	
units	• The place value before the decimal point between the tens and tenths.	1825.763 has 5 units.  shundred the shundred	

units of measurement	Standard amount or quantity.		
unit	Abbreviation	Examples	Used for measuring
• millimetre	mm	thickness of a plank of wood	LENGTH
• centimetre	cm	width of a photo frame	distance - length, width, height,
• metre	m	length of a lap of a stadium	diameter, perimeter
• kilometre	km	distance between two cities	
• gram	g	weight of an egg	MASS
• kilogram	kg	weight of a bag of apples	weight - people, animals, objects
• tonne	t	weight of an elephant	animais, cojects
• millilitre	mL	liquid in a glass	CAPACITY
• litre	L	liquid in a bucket	quantity - liquids
• megalitre	ML	liquid in a water tower	
• square centimetre	cm <sup>2</sup>	area of a Maths book cover	AREA
• square metre	m <sup>2</sup>	area of basketball court	surface - objects
unlikely	Probably v	will not happen.	110
Venn diagram	• A diagram using shapes to show the relationship between sets of objects.		cioners Leaven
vertex	• (pl. <b>vertices</b> ) The point at which two <i>sides</i> (of a <i>polygon</i> ) or three <i>edges</i> (of a <i>solid</i> ) meet.		Polygon  edge vertex  edge edge  Solid
vertical line	• A line at right angles to the horizon.		

- r		Additionsed for the use of MATLAND	1110115011002 2010
	volume	• The amount of space that a <i>solid</i> occupies. Volume is measured in cubic units. e.g. cubic centimetres (cm <sup>3</sup> ) or cubic metres (m <sup>3</sup> ).	Volume of a rectangular prism is calculated by multiplying length by width by height:  V = Iwh V = 4 × 2 × 3 V = 24  Volume = 24 cubic units  3 units 4 units
	week	• A <i>unit</i> of <i>time</i> equal to 7 days; Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday.	Roger was on holidays for one week (seven days).
	weight	• The heaviness of an object.  Equals the <i>mass</i> of an object times the force of gravity. This means that weight changes with any change in gravity.	A 3 kg brick weighs: 3 kg on Earth, about 0.5 kg on the moon, 0 kg in space.
	west	• A compass direction.	The sun sets in the west.
	whole numbers	• The <i>counting numbers</i> from zero to infinity.	0, 1, 2, 3, 4, 5, are whole numbers.
	width	• How wide an object is. The sideways <i>dimension</i> .	The width of the CD is 12 cm.  12 cm $\psi = \text{width}$
	x-axis	• The horizontal axis.	X-axis
	x-coordinate	• The <i>first</i> number in an ordered pair. The position of a point along the <i>X</i> -axis.	Y-axis  (4,)  1 0 0 1 2 3 4 X-axis

y-axis	• The vertical axis.	Y-axis
y-coordinate	• The <i>second</i> number in an ordered pair. The position of a point along the <i>Y</i> -axis.	Y-axis  (,2)  1 0 0 1 2 3 4 X-axis
year	• A unit of time equal to 365 days. (366 in a leap year).	1st of January to the 31st of December.

## MATHS FACTS

#### **SYMBOLS**

- + plus or add
- minus or subtract
- × multiplied by, times, lots of
- ÷ divided by, into groups of
- = equals, is equal to
- ≠ is not equal to
- ≈ is approximately equal to
- < is less than, 4 < 6
- $\rightarrow$  is greater than, 8 > 5
- ≤ is less than or equal to
- ≥ is greater than or equal to
- % percentage,  $12\% = \frac{12}{100}$
- decimal point as in 7.9
- () parentheses, or brackets a grouping symbol
- $\frac{4}{7}$  fraction,  $4 \div 7$ , four sevenths

parallel lines

lines of equal length

www.mathsmate.net

## **NUMBER FACTS (1)**

#### **ZERO**

## Adding and subtracting 0

Adding and subtracting to any number leaves the number unchanged.

$$3 + 0 = 3$$

$$3 - 0 = 3$$

$$2.5 + 0 = 2.5$$

$$2.5 - 0 = 2.5$$

$$\frac{4}{9} + 0 = \frac{4}{9}$$

$$\frac{4}{9} - 0 = \frac{4}{9}$$

Power of 0

is 1

Dividing by 0

Multiplying by 0

 $7 \times 0 = 0$ 

 $\frac{3}{5} \times 0 = 0$ 

 $81.6 \times 0 = 0$ 

Dividing by is meaningless.

The product of any number and

 $4 \div 0$  and  $\frac{3}{6}$  are meaningless operations.

Any number raised to the power of

### O used in decimals

's can be added when needed after the last digit and the decimal point.

$$4 = 4.000$$

's can be added when needed before the first digit of the decimal number.

$$4 = 4.0 = 0004.0$$

By convention, decimal numbers less than 1 are written with a before the decimal point.

$$.4 = 0.4$$

## O as the result of a sum

 $1^0 = 1$ 

 $(0.5)^0 = 1$ 

 $(-24)^0 = 1$ 

The sum of any number, except zero, and its opposite is

$$4 + (-4) = 0$$

$$2.6 + (-2.6) = 0$$

$$\frac{5}{8} + (-\frac{5}{8}) = 0$$

## 0 as a probability

When the probability of an event is the event is 'impossible'.

#### 0 in words

Some of the words used to represent nought, nil, none, nothing, zilch, zip.

#### 0 facts

is a whole number and a digit but is neither a positive nor a negative number.

#### ONE

## Multiplying by 1

Any number multiplyed by remains unchanged.

$$3 \times 1 = 3$$

$$2.5 \times 1 = 2.5$$

$$\frac{4}{9} \times 1 = \frac{4}{9}$$

## Dividing by 1

Any number divided by remains unchanged.

$$7 \div 1 = 7$$

$$81.6 \div 1 = 81.6$$

$$\frac{3}{5} \div 1 = \frac{3}{5}$$

Power of 1

## 1 as a fraction

can be renamed as a fraction whenever Any number raised to the power of the numerator is the same as the denominator.

$$1 = \frac{2}{2}$$

$$1 = \frac{3}{3}$$

$$1 = \frac{3}{3}$$
  $1 = \frac{4}{4}$   $1 = \frac{5}{5}$ 

$$1 = \frac{5}{5}$$

# 1 as a percentage

remains unchanged

 $7^1 = 7$ 

 $(6.8)^1 = 6.8$ 

 $(-4)^1 = -4$ 

is the same as 100%.

$$1 = \frac{100}{100} = 100\%$$

## 1 as a probability

When the probability of an event is event is 'certain' to happen.

### 1 as a denominator

Any whole number can be written as a fraction with denominator

$$20 = \frac{20}{1}$$

## 1 as the result of a product

The product of any number, except zero, and

its reciprocal is

$$4 \times \frac{1}{4} = 1$$

## 1 in words

Some of the words used to represent one, a, an, each, single, unit.

## 1 facts

is a whole number and a digit but not a prime number.

is a factor of any whole number.

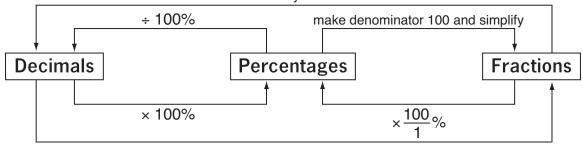

#### **NUMBER FACTS (3)**

#### **Place Value**

millions	hundreds of thousands	tens of thousands	thousands	hundreds	tens	units	tenths	hundredths	thousandths
1,000,000	100,000	10,000	1000	100	10	1	1/10	<u>1</u> 100	1/1000

#### **Decimals / Fractions / Percentages**

+ numerator by denominator

For denominator put 1 followed by one zero for each digit after the decimal point and simplify

Fraction	Decimal	Percentage
$\frac{1}{1}$	1	100%
$\frac{1}{2}$	0.5	50%
$\frac{1}{4}$	0.25	25%
$\frac{3}{4}$	0.75	75%

Fraction	Decimal	Percentage
$\frac{1}{5}$	0.2	20%
$\frac{2}{5}$	0.4	40%
$\frac{3}{5}$	0.6	60%
$\frac{4}{5}$	0.8	80%

#### Prime numbers < 100

2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47, 53, 59, 61, 67, 71, 73, 79, 83, 89 and 97

#### **Operation terminology**

Addition: sum, all together, in total, more than Subtraction: difference, less than, change Multiplication: product, times, lots of Division: a fraction (half, third, quarter) of, quotient

#### Order of operations

- 1) Simplify inside all brackets first.
- 2) Evaluate powers and square roots.
- 3) Do all multiplications or divisions in order from left to right.
- 4) Do all additions or subtractions in order from left to right.

### **MEASUREMENT FACTS (1)**

#### **CONVERSIONS**

#### Length

10 millimetres (mm) = 1 centimetre (cm)

$$1000 \text{ m} = 1 \text{ kilometre (km)}$$

## Temperature - degrees Celcius (°C)

 $0^{\circ}$ C = freezing point of water

100°C = boiling point of water

37°C = human body temperature

## Area

100 square mm (mm $^2$ ) = 1 square cm (cm $^2$ )

 $10000 \text{ cm}^2 = 1 \text{ square metre } (\text{m}^2)$ 

 $10000 \text{ m}^2 = 1 \text{ hectare (ha)}$ 

#### Mass

1000 milligrams (mg) = 1 gram (g)

1000 g = 1 kilogram (kg)

1000 kg = 1 tonne (t)

## **Liquid Capacity**

1000 millilitres (mL) = 1 litre (L)

1000 L = 1 kilolitre (kL)

1000 kL = 1 megalitre (ML)

#### **Time**

60 seconds (s) = 1 minute (min)

60 minutes (min) = 1 hour (h)

24 hours (h) = 1 day

7 days = 1 week

2 weeks = 1 fortnight

4 weeks (approx.) = 1 month

365 =

52 weeks (approx.) = 1 year

12 months =

366 days = 1 leap year

10 years = 1 decade

100 years = 1 century

## **MEASUREMENT FACTS (2)**

#### TIME

#### O'CLOCK

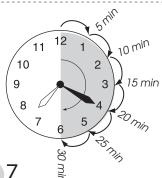

BIG HAND on 12 LITTLE HAND on the hour

five o'clock 5:00

#### **ANALOGUE - PAST**

PAST big hand to the right

20 minutes past 7

## A QUARTER PAST

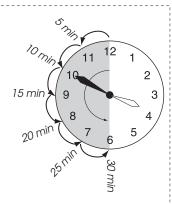

big hand on 3 LITTLE HAND past the hour

a quarter past five 5:15

#### **ANALOGUE - TO**

**TO** - big hand to the left

10 minutes to 4

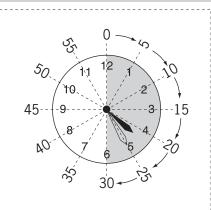

#### **HALF PAST**

BIG HAND
on 6
LITTLE HAND
half way past
the hour

half past five

#### **DIGITAL - PAST**

5:30 (4:25

## A QUARTER TO

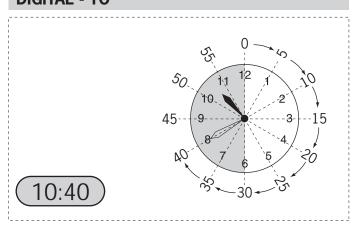

BIG HAND on 9 LITTLE HAND before the hour

a quarter to six

5:45

#### **DIGITAL - TO**

## **GEOMETRY FACTS**

## 2D shapes

Acute         Right           < 90°         90°		Obtuse more than 90° less than 180°	Straight 180°	Reflex more than 180° less than 360°	Revolution 360°	
90°		90° 140° 0° 180°	-	360° 220°180°	360°	

## **Triangle types**

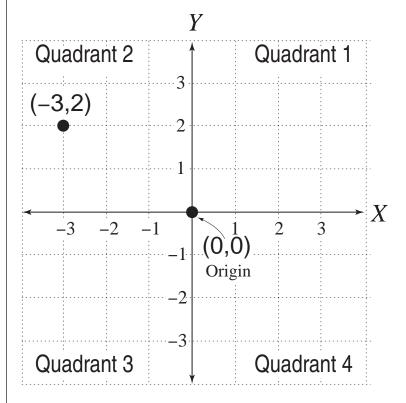

Sides and angles	Triangle type
no equal sides/angles	scalene
two equal sides/angles	isosceles
three equal sides/angles	equilateral

Angles	Triangle type
all acute angles	acute-angled
one right angle	right-angled
one obtuse angle	obtuse-angled

## Quadrants

There are 4 quadrants in a Cartesian plane.

In this Cartesian plane coordinates (-3,2) are in quadrant 2.

#### 18. [Measuring]

page 149

- a) 90 mm (accept 85 to 95 mm) Skill 18.1
  - b) 3 cm (accept 2.5 to 3.5 cm)
  - c) 80 mm (accept 75 to 85 mm)
  - d) 90 mm (accept 85 to 95 mm)
  - e) 6 cm (accept 5.5 to 6.5 cm)
  - f) 45 mm (accept 40 to 50 mm)
- **Skill 18.2** a) 4 cm, b) 3 cm, c) 20 mm, d) 13°C, e) 98 km/h, f) 36 mL
- **Skill 18.3** a) 18 cm, b) 12 cm, c) 12 cm, d) 12 cm, e) 12 cm, f) 16 cm
- **Skill 18.4** a) 8, b) 15, c) 8 cm<sup>2</sup>, d) 10 cm<sup>2</sup>, e) 13 cm<sup>2</sup>, f) 11 cm<sup>2</sup> g) 7 cm<sup>2</sup>, h) 18 cm<sup>2</sup>, i) 10 cm<sup>2</sup>, j) 9 cm<sup>2</sup>, k) B, l) A, m) C
- **Skill 18.5** a) 12, b) 20, c) 6 cm<sup>2</sup>, d) 9 cm<sup>2</sup>, e) 8 cm<sup>2</sup>, f) 15 cm<sup>2</sup>
- **Skill 18.6** a) 4, b) 2, c) 3, d) 9
- **Skill 18.7** a) 32, b) 18, c) 36 cm<sup>3</sup>, d) 60 cm<sup>3</sup>, e) 40 cm<sup>3</sup>, f) 54 cm<sup>3</sup>
- **Skill 18.8** a) B, b) B, c) A, d) B
- **Skill 18.9** a) 6 cm, b) 16 cm, c) 18 cm, d) 9 cm

# 19. [Shapes] page 159 a) less than, b) greater than, c) equal to, d) greater than e) less than, f) less than **Skill 19.2** d) **Skill 19.3 Skill 19.4** a) 3, b) 4, c) 10, d) 4, e) 6, f) 5, g) 9, h) 8, i) 4, j) 7 **Skill 19.5** a) C, b) B, c) D, d) C, e) A, f) B, g) C, h) B **Skill 19.6** a) 4, b) 8, c) 12, d) 7, e) triangle, f) rectangle, g) 6, h) A **Skill 19.7** a) 165°, b) 110°, c) 30°, d) 140° **Skill 19.8** a) A, b) C

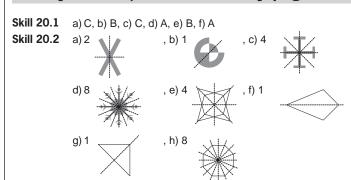

obtuse

h) hexagonal prism, i) triangular prism, j) rectangular prism k) rectangular prism, l) hexagonal pyramid

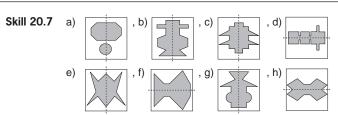

**Skill 19.11** a) C, b) B, c)

## 20. [Location / Transformation] page 171

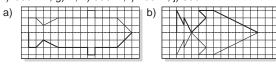

- Skill 20.3 a) south, b) south, c) Cairns, d) west
- **Skill 20.4** a) Two Independence Square, b) Hume Street c) Hindmarsh Square, d) E 16th Avenue
- Skill 20.5 a) pig, b) grocer, c) Marble Arch, d) sacristy
- **Skill 20.6** a) F3, b) kangaroo, c) D2, d) F1, e) B3, f) D1, g) mermaid h) A3, i) A1 and C2, j) A3 and C2

**Skill 20.8** a) 600 m, b) 600 km, c) 400 km, d) 3000 km, e) 6 m f) 600 km, g) B, h) 300 m, i) 750 m, j) 800 m

Skill 20.9

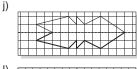

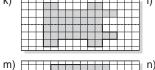

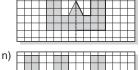

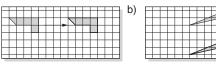

## 20. [Location / Transformation] (cont.)

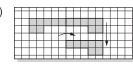

Skill 20.10 a)

c)

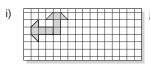

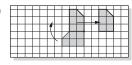

e)

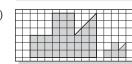

g) h

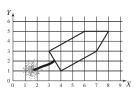

**Skill 20.11** a) A, b) C, c) A, d) C, e) C, f) C, g) C, h) B

**Skill 20.12** a) umpire = (6,4) football = (5,1)

d) IRONMAN

**Skill 20.13** a) S,Z, b) (5,-3), c) P,B,T, d) (-6,-2)

Skill 20.14 a) 6 units, b) 3 units, c) 6 units, d) 20 units

# 21. [Statistics / Probability] page 191

**Skill 21.1** a) Australia, b) silver, c) copper, d) Xia e) musical/recording, f) fat

**Skill 21.2** a) iron, b) 6, c) 8, d) 30%, e) manufacturing, f) \$10

**Skill 21.3** a) 8, b) 10, c) Warsaw, d) 2400000

Skill 21.4 a) Discovery, b) Sydney Opera House, c) 22, d) 2006 e) 50 f) 2, g) New York and Moscow, h) 3, i) Secret seven j) Warren Buffet

**Skill 21.5** a) WA, b) AT - AT, c) males, d) 187 km

Skill 21.6 a) 50 km/h, b) Adelaide, c) Jupiter, d) 80 kg, e) 7, f) 2 g) Lleyton Hewitt, h) Playhouse, i) Tokyo, j) Antarctica

Skill 21.7 a) 2, b) Kenya, c) Japan, d) vet

Skill 21.8 a) will not, b) C, c) B, d) A, e) B, f) is certain to, g) will not h) is certain to

**Skill 21.9** a) 11, b) 13, c) 4, d) 20, e) 7, f) 8, g) 10, h) 10

**Skill 21.10** a) A, b) A, c) A, d) C, e) C, f) B

**Skill 21.11** a)  $\frac{1}{13}$ , b)  $\frac{1}{4}$ , c)  $\frac{7}{11}$ , d)  $\frac{1}{4}$ , e)  $\frac{1}{2}$ , f) 1, g)  $\frac{5}{16}$ , h)  $\frac{1}{3}$ , i)  $\frac{2}{3}$  j)  $\frac{1}{2}$ , k)  $\frac{1}{4}$ , l)  $\frac{1}{10}$ 

Skill 21.12 a) 25%, b) walls, c) 1, d) 13 - 17 years
